

Contents

Part I Basics of Metrology

1	True Values and Traceability	3
1.1	Metrology	3
1.2	Traceability	3
1.3	Measurement Errors	4
1.4	Precision and Accuracy	6
1.5	Measurement Uncertainty	6
1.6	Measuring Result	6
1.7	Rivaling Physical Approaches	8
2	Models and Approaches	9
2.1	Gaussian Error Model	9
2.2	Generalized Gaussian Approach	10
2.3	Robust Testing Conditions	14
2.4	Linearizations	15
2.5	Quiddity of Least Squares	16
2.6	Analysis of Variance	20
2.7	Road Map	21

Part II Generalized Gaussian Error Calculus

3	The New Uncertainties	25
3.1	Gaussian Versus Generalized Gaussian Approach	25
3.2	Uncertainty and True Value	25
3.3	Designing Uncertainties	26
3.4	Quasi Safeness	29
4	Treatment of Random Errors	31
4.1	Well-Defined Measuring Conditions	31
4.2	Multidimensional Normal Model	32
4.3	Permutation of Repeated Measurements	33

5	Treatment of Systematic Errors	35
5.1	Repercussion of Biases	35
5.2	Uniqueness of Worst-Case Assessments	36

Part III Error Propagation

6	Means and Means of Means	39
6.1	Arithmetic Mean	39
6.2	Extravagated Averages	41
6.3	Mean of Means	41
6.4	Individual Mean Versus Grand Mean	47
7	Functions of Erroneous Variables	53
7.1	One Variable	53
7.2	Two Variables	56
7.3	More Than Two Variables	61
7.4	Concatenated Functions	66
7.5	Elementary Examples	68
7.6	Test of Hypothesis	74
8	Method of Least Squares	79
8.1	Empirical Variance–Covariance Matrix	79
8.2	Propagation of Systematic Errors	82
8.3	Uncertainties of the Estimators	83
8.4	Weighting Factors	84
8.5	Example	87

Part IV Essence of Metrology

9	Dissemination of Units	91
9.1	Working Standards	91
9.2	Key Comparisons	95
10	Multiples and Sub-multiples	101
10.1	Calibration Chains	101
10.2	Pairwise Comparisons	110
11	Founding Pillars	113
11.1	Consistency	113
11.2	Traceability	114

Part V Fitting of Straight Lines

12 Preliminaries	117
12.1 Distinction of Cases	117
12.2 True Straight Line	118
13 Straight Lines: Case (i)	121
13.1 Fitting Conditions	121
13.2 Orthogonal Projection	121
13.3 Uncertainties of the Input Data	123
13.4 Uncertainties of the Components of the Solution Vector	124
13.5 Uncertainty Band	126
13.6 <i>EP</i> -Region	127
14 Straight Lines: Case (ii)	131
14.1 Fitting Conditions	131
14.2 Orthogonal Projection	132
14.3 Uncertainties of the Components of the Solution Vector	132
14.4 Uncertainty Band	135
14.5 <i>EP</i> -Region	137
15 Straight Lines: Case (iii)	141
15.1 Fitting Conditions	141
15.2 Orthogonal Projection	142
15.3 Series Expansion of the Solution Vector	143
15.4 Uncertainties of the Components of the Solution Vector	145
15.5 Uncertainty Band	147
15.6 <i>EP</i> -Region	148

Part VI Fitting of Planes

16 Preliminaries	155
16.1 Distinction of Cases	155
16.2 True Plane	155
17 Planes: Case (i)	157
17.1 Fitting Conditions	157
17.2 Orthogonal Projection	157
17.3 Uncertainties of the Input Data	158
17.4 Uncertainties of the Components of the Solution Vector	159
17.5 <i>EPC</i> -Region	161

18 Planes: Case (ii)	165
18.1 Fitting Conditions	165
18.2 Orthogonal Projection	166
18.3 Uncertainties of the Components of the Solution Vector	166
18.4 Confidence Intervals and Overall Uncertainties	168
18.5 Uncertainty Bowls	169
18.6 <i>EPC</i> -Region	171
19 Planes: Case (iii)	179
19.1 Fitting Conditions	179
19.2 Orthogonal Projection	180
19.3 Series Expansion of the Solution Vector	181
19.4 Uncertainties of the Components of the Solution Vector	183
19.5 Uncertainty Bowls	185
19.6 <i>EPC</i> -Region	187

Part VII Fitting of Parabolas

20 Preliminaries	193
20.1 Distinction of Cases	193
20.2 True Parabola	193
21 Parabolas: Case (i)	195
21.1 Fitting Conditions	195
21.2 Orthogonal Projection	195
21.3 Uncertainties of the Input Data	196
21.4 Uncertainties of the Components of the Solution Vector	197
21.5 Uncertainty Band	199
21.6 <i>EPC</i> -Region	199
22 Parabolas: Case (ii)	203
22.1 Fitting Conditions	203
22.2 Orthogonal Projection	204
22.3 Uncertainties of the Components of the Solution Vector	204
22.4 Uncertainty Band	207
22.5 <i>EPC</i> -Region	209
23 Parabolas: Case (iii)	213
23.1 Fitting Conditions	213
23.2 Orthogonal Projection	214
23.3 Series Expansion of the Solution Vector	215
23.4 Uncertainties of the Components of the Solution Vector	217
23.5 Uncertainty Band	219
23.6 <i>EPC</i> -Region	220

Part VIII Non-linear Fitting

24 Series Truncation	227
24.1 Homologous True Function	227
24.2 Fitting Conditions	228
24.3 Orthogonal Projection	228
24.4 Iteration	230
24.5 Uncertainties of the Components of the Solution Vector	231
25 Transformation	237
25.1 Homologous True Function	237
25.2 Fitting Conditions	237
25.3 Orthogonal Projection	238
25.4 Uncertainties of the Components of the Solution Vector	239

Part IX Appendices

A Graphical Scale Transformations	245
B Expansion of Solution Vectors	251
C Special Confidence Ellipses and Ellipsoids	257
D Extreme Points of Ellipses and Ellipsoids	261
E Drawing Ellipses and Ellipsoids	265
F Security Polygons and Polyhedra	267
G EP Boundaries and EPC Hulls	277
H Student's Density	283
I Uncertainty Band Versus EP-Region	287
J Quantiles of Hotelling's Density	295
References	297
Index	299
