Abstract	I
Kurzfassung	III
Preface	V
Contents	IX
List of Figures	IX
List of Tables	XVI
1 Introduction	1
1.1 Underground Hydrogen Storage	4
1.2 Underground Bio Methanation	6
1.3 Motivation and objectives	7
1.4 Outline of the thesis	9
2 Fundamentals and state of the art	11
2.1 Relevant processes during the storage of hydrogen in the subsurface	11
2.1.1 Hydrodynamics	12
2.1.2 Microbiology	18
2.1.3 Geochemical reactions	30
2.2 Numerical modeling of reactive transport processes in porous media	34
2.2.1 Transport equation of two-phase multi-component flow in porous media	35
2.2.2 Discretization in time and space	38
2.2.3 General structure and solving strategy	45
2.2.4 Overview of the open-source simulator DuMu ^x	46

3	Extension and calibration of the bio-geo-reactive transport model for UHS	49
3.1	Mathematical model of bio-geo-reactive transport processes	49
3.1.1	Biochemical reactions	51
3.1.2	Geochemical reactions	52
3.2	Realization of bio-geo-reactive transport model in DuMu ^x	53
3.2.1	Implementation of bio-geo-reactive transport model	55
3.2.2	Implementation of fluid model, solid system, and chemical reactions	55
3.3	Calibration of simulation model based on laboratory investigations	56
3.3.1	Calibration of gas-gas diffusion process for a hydrogen-methane binary system at underground gas storage conditions	57
3.3.2	Characterization of microbial growth parameters on laboratory scale	75
3.3.3	Calibration of pyrite-to-pyrrhotite reduction based on modeling of laboratory experiments	81
3.4	Benchmark study for the simulation of UHS operations	90
3.4.1	Benchmark scenario description	90
3.4.2	Results and discussion	93
3.4.3	Summary	101
3.5	Conclusions and outlook	102
4	Extension of UHS field-scale simulation on CVFE method to allow for the modeling of mechanical dispersion	103
4.1	Extension of source code and modeling description	103
4.1.1	Implementation of mechanical dispersion for a two-phase n-component system	104
4.1.2	Workflow of modification from non-conforming to conforming mesh	106
4.1.3	Extension of Peaceman well model for CVFE method . . .	108
4.1.4	Operation schedule implementation for actual field data .	116
4.1.5	Modifications of the fluid model	119
4.2	Numerical simulation of UHS field test	120

4.2.1	History match of recent field operation	120
4.2.2	Prediction of UHS field test	125
4.3	Conclusions and outlook	132

5 Coupling of microbial growth to the salt component for modeling of Underground Bio Methanation **135**

5.1	Extension of microbial growth in dependency of the salinity	136
5.2	Definition of simulation scenarios and sensitivity study	138
5.3	Results of sensitivity study	141
5.4	Conclusions and outlook	147

6 Conclusions **149**

Bibliography **153**
