

Contents

1	The origins of biotechnology — 1
1.1	Introduction — 1
1.2	Introduction, historical — 1
1.3	Fermentation — 2
1.4	Leavening — 3
1.5	Cheese making — 4
1.6	Modern biotechnology and recombinant DNA — 5
	References — 6
2	Biotechnological processes today — 9
2.1	Introduction — 9
2.2	Biotechnology companies — 9
2.3	Biotechnology sectors — 10
2.3.1	Fuel and energy — 13
2.3.2	Food and food supplements — 13
2.3.3	Drugs and other pharmaceuticals — 14
2.3.4	Industrial products — 14
	References — 15
3	Bioethanol — 17
3.1	Introduction — 17
3.2	Bioethanol from starch — 18
3.3	Cellulosic bioethanol — 18
3.4	Future challenges — 20
	References — 22
4	Biodiesel — 23
4.1	Introduction — 23
4.2	Petrodiesel production — 23
4.3	Biodiesel — 24
4.3.1	Animal fat sources — 26
4.3.2	Soybean feedstock — 26
4.3.3	Algae — 27
4.4	Challenges for the future — 27
	References — 28
5	Biobutanol — 31
5.1	Introduction — 31
5.2	Sources — 31
5.3	Production — 32

5.4	Advantages to biobutanol — 34
	References — 34
6	Biofuels from animal and vegetable waste — 37
6.1	Introduction — 37
6.2	Conversion of waste to biogas — 37
6.3	Use of animal renderings — 39
6.4	Use of vegetable oils — 39
6.5	Comparisons of biofuels to traditional sources — 40
	References — 41
7	Yeasts — 43
7.1	Introduction, traditional yeasts — 43
7.1.1	Bread yeasts — 43
7.1.2	Beer and wine yeasts — 44
7.2	Recent yeast modifications — 46
	References — 46
8	Vitamins — 49
8.1	Introduction — 49
8.2	Vitamin B ₂ , riboflavin — 50
8.3	Vitamin B ₃ , niacin — 50
8.4	Vitamin B ₆ — 51
8.5	Vitamin B ₁₂ — 52
8.6	Vitamin C — 55
	References — 57
9	Pharma/Drugs — 59
9.1	Introduction — 59
9.2	Insulin — 59
9.3	Taxol (paclitaxel) — 60
9.4	Interferons — 62
9.5	Other common drugs — 63
	References — 64
10	Insect sources — 67
10.1	Introduction — 67
10.2	Termite gut bacteria and cellulosic ethanol — 67
10.3	Cochineal — 68
10.4	Silk — 68
10.4.1	Silk production — 69
10.4.2	Uses of silk — 70

- 10.4.3 Future possibilities for silk production — 70
- 10.5 Beeswax — 70
- 10.5.1 Introduction and structural chemistry — 70
- 10.5.2 Uses of beeswax — 71
- References — 72

11 Flavors — 73

- 11.1 Introduction — 73
- 11.2 Cinnamic aldehyde — 73
- 11.3 Limonene — 76
- 11.4 Vanillin — 77
- 11.5 Reuse and recycling — 77
- References — 78

12 Plastics — 79

- 12.1 Introduction — 79
- 12.2 Polylactic acid — 83
- 12.3 Production of polyacrylonitrile — 84
- 12.4 Polyhydroxyalkanoates — 85
- 12.5 Polyols — 85
- 12.6 Recycling and reuse possibilities — 86
- References — 86

13 Wood — 89

- 13.1 Introduction — 89
- 13.2 Wood production — 89
- 13.2.1 Means of genetic engineering — 89
- 13.2.2 Cuttings — 90
- 13.2.3 Gene insertion — 90
- 13.2.4 Control of engineered trees — 90
- 13.3 Pulp and paper production — 91
- 13.4 Recycling and reuse — 92
- References — 94

14 Leather — 95

- 14.1 Introduction — 95
- 14.2 Traditional leather tanning operations — 96
- 14.3 Biotechnological developments — 97
- 14.4 Recycling — 98
- References — 98

15 Types of rubber — 101

- 15.1 Introduction — 101
- 15.2 Natural rubber — 102
- 15.3 Dandelion rubber — 102
- 15.4 Synthetic rubber — 103
- 15.5 Rubber recycling — 104
- References — 104

16 Metals — 107

- 16.1 Introduction — 107
- 16.2 Traditional metal refining — 107
- 16.2.1 Iron refining — 108
- 16.2.2 Copper and aluminum refining — 109
- 16.2.3 Scope of metals production — 109
- 16.3 Biotechnological applications, biohydrometallurgy — 110
- 16.3.1 Bioleaching — 111
- 16.3.2 Phytoremediation — 113
- References — 114

17 Textiles and detergents — 117

- 17.1 Introduction — 117
- 17.2 Traditional production — 117
- 17.2.1 Cotton — 117
- 17.2.2 Wool — 118
- 17.3 Synthetic fibers — 118
- 17.4 Biotechnology and enzymes in textile production and detergents — 119
- 17.4.1 Amylases — 120
- 17.4.2 Cellulase — 120
- 17.4.3 Lipase — 120
- 17.4.4 Protease — 121
- 17.5 Polymers — 122
- References — 122

18 Cosmetic ingredients — 125

- 18.1 Introduction — 125
- 18.2 Petroleum jelly — 125
- 18.3 Mineral oil — 127
- 18.4 Personal care mixtures — 128
- 18.4.1 Propylene glycol and 1,3-propanediol — 128
- 18.4.2 Butylene glycol — 129
- 18.5 Recycling and reuse — 129
- References — 130

19 Biotechnology in recycling — 13119.1 Introduction — **131**19.2 Microbes in recycling — **132**19.3 Recycling of plastics and biobased plastic materials — **133**19.3.1 Plastics recycling — **133**19.3.2 Biosourced plastics recycling — **134**References — **135****20 Biotechnology companies — 137****Index — 139**
