

Contents

1	Introduction	1
1.1	Internet Models	1
1.1.1	Overview	1
1.1.2	Quality of Experience (QoE)	2
1.1.3	Quality of Control (QoC)	3
1.1.4	Load Models	3
1.1.5	Access Control	4
1.1.6	Infrastructure	5
1.1.7	Load Prediction	5
1.2	Julia	6
1.2.1	Getting Started	6
1.2.2	Diagrams, Animations with Plot.jl	7
2	Quality of Experience, QoE	11
2.1	Introduction	11
2.2	Multimedia Applications	12
2.2.1	Audio	12
2.2.2	Video	14
2.2.3	Web	15
2.3	Fairness	16
2.3.1	Variance	16
2.3.2	Fairness	19
2.4	Mapping QoS to QoE	20
2.4.1	Voice Transmission	20
2.4.1.1	E-Model	20
2.4.1.2	R-Value Approximation	23

2.4.2	Streaming Video	25
2.4.2.1	QoE Models	25
2.4.2.2	Fair Transmission Rate	27
2.5	Suggestions for Further Analyses	30
3	Quality of Control, QoC	31
3.1	Introduction	31
3.2	Assisted Driving	35
3.2.1	System Description	35
3.2.2	Risk Metric	40
3.2.2.1	Reliability	40
3.2.2.2	Effective Risk Factor and Packet Losses	40
3.2.2.3	Age of Information	43
3.3	Extreme Value Modelling	44
3.3.1	Introduction	44
3.3.2	Theorem of Pickands-Balkema-de Haan	45
3.3.3	Mean Residual Life Plot (MRL)	47
3.3.4	Determination of GPD Parameters	47
3.3.5	Return Level Plots (RLP)	48
3.3.6	Extreme Value Analysis with Julia	49
3.3.6.1	MRL Plot	49
3.3.6.2	GPD Parameter Determination	50
3.3.6.3	RL-Plot	51
3.3.7	Summary	53
3.4	Recommendations for Further Analysis	53
4	Load Models	55
4.1	Introduction	55
4.2	Characteristics of Load Models	56
4.2.1	Phases, Correlation	56
4.2.2	Influence of Variance Parameter	59
4.3	Model Development with Julia	61
4.3.1	Development Steps	61
4.3.2	Correlation Analysis	62
4.3.3	Histogram and Distribution Function	62
4.3.4	Distribution Test	65
4.4	Standardized Load Models	67
4.4.1	Gaming	67
4.4.2	FTP (File Transfer Protocol)	69
4.4.3	Web Browsing	71
4.4.4	Video Streaming	73
4.4.5	VoIP, Voice over IP	74
4.4.6	M2M, Machine to Machine	75

4.5	Load Generators	75
4.5.1	Basics	75
4.5.2	Random Numbers	77
4.6	Suggestions for Further Analysis	77
5	Access Control	79
5.1	Introduction	79
5.2	Session Admission	83
5.2.1	Types, Models	83
5.2.1.1	Classes	83
5.2.1.2	Full Sharing Model	87
5.2.1.3	Full Split Model	88
5.2.1.4	Russian Doll Model	88
5.2.2	Optimization	91
5.2.2.1	Simulation Model	91
5.2.2.2	Q-Learning	93
5.3	Scheduling	100
5.3.1	Throughput Increase	100
5.3.2	Reduction of the Transmission Duration	103
5.3.3	Current Developments	105
5.4	Recommendations for Further Analysis	106
6	Infrastructure	107
6.1	Introduction	107
6.2	Wireless Networks	108
6.2.1	Basics	108
6.2.2	Grid Algorithm	110
6.2.3	Implementation with Julia	113
6.2.4	5G Scenarios	117
6.3	Fixed Network	118
6.3.1	Kruskal Algorithm	118
6.3.2	Steiner Tree	120
6.3.3	Routing	121
6.4	Suggestions for Further Analysis	124
7	Prediction Models	125
7.1	Introduction	125
7.1.1	Classifications	125
7.1.2	Examples	130
7.2	Prediction Models with Julia Flux	132
7.2.1	Perceptron Basics	132
7.2.2	Perceptron Network Implementation	133

7.2.3	Flux	139
7.2.4	Experimenting with Real Measurement Data	143
7.2.4.1	Description of the Measurement Data	143
7.2.4.2	Long-term Forecast in Hourly Intervals	145
7.2.5	GPU Usage.....	146
7.3	Recommendations for Further Analysis.....	147
