

Contents

Part I Introduction

1 Potential for Artificial Intelligence and Its Application	3
Thomas Barton and Christian Müller	
1.1 Legal Aspects	4
1.2 Potential Applications	4
1.3 Operational Scenarios	5

Part II Legal Aspects

2 Legal Challenges of Artificial Intelligence and How to Manage Them	9
Stephan Meyer	
2.1 Introduction	9
2.2 Machine Autonomy as a Legal Challenge: Examples	10
2.2.1 AI and Copyright Law	10
2.2.2 Autonomous Driving	12
2.2.3 Use of AI by Public Authorities	20
2.3 Regulatory Perspectives	22
2.3.1 Requirements on AI Regulation	22
2.3.2 Current Regulatory Efforts	24
References	26

Part III Application Potential

3 Application Potential of Artificial Intelligence in the Car Trade	33
Michael Gröschel, Gabriele Roth-Dietrich, and Carl-Christian Neundorf	
3.1 Introduction	34
3.2 Challenges for the Automotive Trade	34
3.2.1 Social Trends	34
3.2.2 The Car Trade of the Future	37
3.3 Business Processes in the Car Trade	39
3.3.1 Sale of Vehicles	39

3.3.2	Vehicle Repair and Maintenance	40
3.3.3	Used Car Purchase	41
3.4	Artificial Intelligence (AI)	42
3.4.1	Subfields of Artificial Intelligence	43
3.4.2	Economic Impact of Artificial Intelligence	44
3.5	Use Cases of Artificial Intelligence in the Car Trade.	45
3.5.1	Artificial Intelligence in Vehicle Sales.	45
3.5.2	Artificial Intelligence in Repair and Maintenance.	46
3.5.3	Artificial Intelligence in Used Car Purchasing	47
3.5.4	Evaluation of Artificial Intelligence Use Cases	47
3.6	Conclusion	49
	References.	49
4	Acceptance of AI Systems in Retail	53
	Georg Rainer Hofmann and Meike Schumacher	
4.1	Introduction to the Topic	53
4.2	Commerce in Transition—From e-Commerce to New Commerce	56
4.3	Acceptance of Systems and Procedures.	57
4.4	Five Scenarios of AI in Retailing	58
4.4.1	AI-Based Information Systems	59
4.4.2	AI-Based Fuzzy Matching.	59
4.4.3	AI-Based Plausibility.	60
4.4.4	AI-Based Trade Initiation	61
4.4.5	AI-Based Dynamic Pricing	61
4.5	Assessments and Synopsis by Expert Interviews	62
4.5.1	Assessment of the Importance and Definition of AI	63
4.5.2	Assessments of the Detectability of AI Applications.	63
4.5.3	Assessment of Barriers	64
4.5.4	Assessing the Role of Trust and Ethics	64
4.5.5	Confirmation of the Five AI Scenarios in the Respective Individual Assessment	65
4.6	Conclusion and Future Work	66
4.7	Best Thanks	67
	References.	67
5	Application Potential for Causal Inference in Online Marketing	69
	Thomas Barton	
5.1	Introduction	69
5.2	Causal Diagrams and Do Operator	70
5.3	Application Potentials in Online Marketing	72
5.4	Conclusion	73
	References.	73

6	Influence of Artificial Intelligence on Customer Journeys Using the Example of Intelligent Parking	75
	Dominik Schneider, Frank Wisselink, Nikolai Nölle, and Christian Czarnecki	
6.1	How Does Artificial Intelligence Influence Commercial Decisions?	76
6.2	State of Research on the Influence of AI on Customer Journeys.	77
6.3	Influence of AI on Customer Journeys Using the Example of Intelligent Parking	78
6.3.1	Identified Patterns Using the Example of Intelligent Parking	79
6.3.2	Identified Factors Using the Example of Intelligent Parking.	82
6.3.3	Identified Effects Using the Example of Intelligent Parking.	85
6.4	Generalisation and Discussion of the Results	89
6.4.1	Patterns Are the Most Granular Changes Between Customer Journeys of an AI-Based and Traditional Use Case	89
6.4.2	Factors Are Derived from Pattern Combinations.	89
6.4.3	Effects Are Derived from Factor Combinations	90
6.5	Conclusion and Outlook	92
	References.	93
7	Artificial Intelligence (AI) for Platform Business Models	97
	Gabriele Roth-Dietrich	
7.1	Platform Economy	97
7.1.1	Platforms	97
7.1.2	Network Effects	98
7.1.3	Business Model Patterns for Platform Companies	99
7.2	Artificial Intelligence (AI) for Platform Companies	102
7.2.1	AI Sub-sectors	102
7.2.2	Types of AI and Intensity of Data Use.	102
7.2.3	AI Deployment Opportunities in Platform Companies	104
7.3	Importance of AI for Design Aspects of Platform Companies	105
7.3.1	Hybridisation of Business Models.	105
7.3.2	Design of Suitable Platform Processes	106
7.3.3	Platform Launch.	109
7.3.4	Monetisation of Platform Services.	110
7.3.5	Determination of a Suitable Degree of Openness	112
7.3.6	Platform Governance	113
7.3.7	Key Figures for Platform Controlling	114
7.4	Recommendations for Action	115
7.4.1	Further Development into a Platform Company	115
7.4.2	Participation in the Value Network with Independent Platform	116
	References.	117

Part IV Operational Scenarios

8 Artificial Intelligence in Automated Document Processing Using the Example of Health Insurance Companies	121
Gerhard Hausmann and Uwe Lämmel	
8.1 Digitisation of Document Processing	121
8.2 Business Rules	122
8.3 Rule Processing for Medical Invoices	124
8.4 Artificial Neural Networks and Deep Learning	127
8.5 Deep Learning in Text Processing	128
8.6 Apply AI Methods in an Integrated Way	133
References	134
9 AI in Recruiting: Potentials, Status Quo, and Pilot Projects in Germany	137
Stephan Böhm, Olena Linnyk, Wolfgang Jäger, and Ingolf Teetz	
9.1 Recruiting as a Field of Application for AI	138
9.2 Special Requirements for the Use of AI in Recruiting	139
9.2.1 Solution Orientation	139
9.2.2 Data Centricity	140
9.2.3 Data Availability	140
9.2.4 Decision Transparency and Trustworthiness	141
9.2.5 Continuity and Robustness	142
9.3 Limitations for the Use of AI in the Recruiting Process	142
9.3.1 Acceptance of AI in the Recruiting Process	142
9.3.2 AI and Compliance with Laws and Standards	143
9.4 Systematization of Relevant Application Areas of AI in the Recruiting Process	144
9.4.1 Formulation of Job Advertisements	145
9.4.2 Publication of Job Advertisements on Job Boards and Social Networks	145
9.4.3 Structuring and Analysis of Application Data	146
9.5 Selected Practical Examples of AI in Recruiting	146
9.5.1 “BetterAds”—Performance Analysis and Augmented Writing of Job Advertisements	146
9.5.2 “CATS”—Recruiting Chatbots in Applicant Tracking Systems	149
9.6 Summary and Outlook	153
References	154
