

INDEX – Volume 1

SECTION 1

FUTURE BUSINESS MODELS IN THE AUTOMOTIVE INDUSTRY

Chairperson: Prof. Dr. Jochen Wiedemann

- Automotive landscape 2030+ – Pole position for Germany in autonomous driving** **1**
Steffen Gänzle, A.T. Kearney GmbH
- Make or break – Automotive business models at crossroads** **3**
Ralf Kalmbach, Bain & Company Germany, Inc.
- Digital value chain 2030+ – 360°** **5**
Jörg Gnam, Bain & Company Germany, Inc.

DRIVING DYNAMICS

Chairperson: Prof. Dr. Ferit Küçükay

- Analysis of rollover behavior of SUVs in the early phase of chassis development** **7**
Fan Chang, G. Prokop, IAD, TU Dresden; S. van Putten, AUDI AG
- Next generation 3D vehicle dynamics test system – Software and control concept** **23**
Alexander Ahlert, D. Zeitvogel, W. Krantz, IVK, Universität Stuttgart;
J. Neubeck, FKFS; J. Wiedemann, FKFS/IVK, Universität Stuttgart;
F. Boone, R. Orange, MTS Systems Corporation
- Driving dynamics in the Formula Student** **39**
Marc Möckl, Christian Lichtenberg, Rennteam Uni Stuttgart e.V.

HYBRID I

Chairperson: Prof. Dr. Christian Beidl

- High-level phlegmatization of an ICE for the use in a serial hybrid powertrain** **41**
Bojan Jander, R. Baar, TU Berlin

- Combustion engine concepts with extended expansion in hybrid powertrains** **59**
Morris Langwiesner, C. Krüger, S. Donath, Daimler AG;
M. Bargende, FKFS/IVK, Universität Stuttgart

- Adaptive energy management strategy for a heavy-duty truck with a P2-hybrid topology** **75**
Sven Schulze, M. Mühleisen, G. Feyerl, FH Aachen; S. Pischinger, VKA, RWTH Aachen University

TURBO CHARGING

Chairperson: Prof. Dr. Roland Baar

- Modeling of a map based turbocharger in a three dimensional engine environment** **91**
Andreas Kächele, M. Chiodi, FKFS; M. Bargende, FKFS/IVK, Universität Stuttgart

- Impact of compressor induced acoustic excitations on the accuracy of the air flow measuring signal** **105**
Matthias Hamann, L. Erbig, M. Matt, Y. Bogachik,
O. Kalkan, M. Onischke, Daimler AG

- CFD simulation of scroll compressors with axial and radial clearances and thermal deformation** **123**
Jan Hesse, A. Spille-Kohoff, R. Andres, F. Hetze,
CFX Berlin Software GmbH

NETWORKING AND ARCHITECTURE I

Chairperson: Prof. Dr. Karl-Ludwig Krieger

**Towards a standardized reference architecture for
vehicle-to-backend platforms: Motivation and benefits** 139
Markus Glaab, Elektrobit Automotive GmbH

Safe computing with central ECUs 155
Drazen Baic, P. Langjahr, W. Haas, A. Fessard,
Bosch Engineering GmbH

**From the environmental model to
the intelligent engine stop start system** 165
Elias Wiedemann, M. Karl, C. Ebner, A. Sonntag, BMW AG

FUTURE OF AUTOMOTIVE ASSEMBLY I

Chairperson: Thomas Dietz

Challenges of a safe value-added production logistics of the future 179
Karl-Heinz Wehking, D. Korte, M. Hagg, IFT, Universität Stuttgart

**Flexible production systems as an answer
to a volatile environment** 189
Werner Köhl, C. Siedelhofer, G. Siegmund,
C. Schuster, S. Mayer, A. Bloemer, BMW Group

Basic principles of agile assembly in the automotive industry 203
Petra Foith-Förster, T. Dietz, T. Bauernhansl, Fraunhofer IPA

SECTION 2

POWERTRAIN CONCEPTS

Chairperson: Prof. Dr. Michael Bargende

Homogeneous lean burn engine combustion system development – Concept study	205
Pawel Luszcz, K. Takeuchi, P. Pfeilmaier, M. Gerhardt, Toyota Motorsport GmbH; P. Adomeit, A. Brunn, C. Kupiek, B. Franzke, FEV Europe GmbH	
AUDI h-tron – A key-technology to meeting the requirements for sustainable drive concepts	225
Jürgen Jablonski, P. Hackenberg-Wiedl, S. Rank, AUDI AG	
The new Porsche GT engine family: The perfect link between motorsports and road car engines	233
Roland Sargenti, W. Buck, T. Mader, M. Hendess, D. Raabe, Dr. Ing. h.c. F. Porsche AG	
Development of an innovative combustion process: Spark-assisted compression ignition	247
Marco Chiodi, A. Kächele, FKFS; M. Bargende FKFS/IVK, Universität Stuttgart; D. Koch, G. Wachtmeister, TU München; D. Wichelhaus, Volkswagen Motorsport (until Nov. 2017)	

EMISSIONS

Chairperson: Prof. Dr. Stefan Pischinger

Measures to fulfill “Real Driving Emission (RDE)” with Diesel passenger cars	257
Dirk Naber, S. Bareiss, A. Kufferath, M. Krüger, H. Schumacher, Robert Bosch GmbH	
Additive manufactured open cell structures: Promising substrates for automotive catalysts	279
Panayotis Dimopoulos Eggenschwiler, V. Papetti, Empa; F. Lucci, Philip Morris Products S.A.; A. Ortona, SUPSI Institute CIM for Sustainable Innovation	
CFD framework for the modeling of aftertreatment systems: Application to the study of an electrically heated DOC for Diesel engines	291
Gianluca Montenegro, A. Della Torre, A. Onorati, Politecnico di Milano	
How to compare global and local pollutant emissions	311
Friedrich Dinkelacker, F. Galli, ITV, Leibniz Universität Hannover	

CHASSIS CONTROL SYSTEMS

Chairperson: Prof. Dr. Corinna Salander

Suspension influences on a steer-by-wire torque vectoring vehicle **327**
Gerald Reiter, K. Polmans, C. Miano, thyssenkrupp Presta AG;
A. Hackl, C. Lex, FTG, TU Graz

Vehicle simulation environment enabling model-based systems engineering of chassis control systems **343**
Christopher Braunholz, W. Krantz, IVK, Universität Stuttgart; J. Wiedemann, FKFS/IVK, Universität Stuttgart; I. Scharfenbaum, U. Schaaf, A. Ohletz, AUDI AG

Control strategy for electromechanical active roll stabilization **363**
Igor Illg, A. Freuer, M. Eisenbarth, G. Nareyko,
T. Koch, Dr. Ing. h.c. F. Porsche AG

Innovative torque vectoring control concept to generate predefined lateral driving characteristics **377**
Alexander Fridrich, W. Krantz, IVK, Universität Stuttgart;
J. Wiedemann, FKFS/IVK, Universität Stuttgart; J. Neubeck, FKFS

SMALL ENGINES / PREDICTIONS

Chairperson: Prof. Dr. Bernhard Geringer

Image-producing knocking investigations in a two-stroke SI engine **395**
Florian Schumann, K. W. Beck, T. Seidel, T. Gegg, ANDREAS
STIHL AG & Co. KG; J. Weßling, F. Sobek, B. Kehrwald, MOT GmbH

Analysis of the impact of information about future driving situations on the energy consumption **413**
Tobias Schürmann, D. Görke, S. Schmiedler, J. Strenkert, Daimler AG;
K. A. Böhm, Hochschule Esslingen; M. Bargende, FKFS/IVK, Universität Stuttgart

Investigation of the holistic energy demand of different power train topologies under realistic boundary conditions **425**
Benedikt Hollweck, J. Wind, Daimler AG; C. Schnapp, F. Stöber,
D. Pfeffer, NuCellSys GmbH

Metal matrix composites in handheld power tools **443**
Niklas Enander, Andreas Hillby, Husqvarna AB

NETWORKING AND ARCHITECTURE II

Chairperson: Prof. Dr. Klaus Dietmayer

Centralized administration of diagnostic and update processes for cloud mirrored vehicles **455**

Michael Eberspächer, M. Grimm, FKFS; H.-C. Reuss,
FKFS/IVK, Universität Stuttgart

Big data for assisted and autonomous driving **467**

Tobias Abthoff, A. Pawlik, T. Bonfert, N. John, S. Karl,
T. Klein, L. Oser, F. Navarrete, J. Ventura, J. Villaveces,
A. Villwock, NorCom Information Technology AG

The connected car and its new possibilities for diagnosis of the internal combustion engine **477**

Lars Hagen, A. Walter, Robert Bosch GmbH; M. Bargende,
FKFS/IVK, Universität Stuttgart

Requirements and systems engineering for complex systems **493**

Christof Ebert, Vector Consulting Services GmbH;
F. Kirschke-Biller, Ford

FUTURE OF AUTOMOTIVE ASSEMBLY II

Chairperson: Prof. Dr. Karl-Heinz Wehking

The future of manufacturing: The first modular seat factory in Eastern Europe **499**

Lutz Wünn, Brose Fahrzeugteile GmbH & Co. KG

Challenges for car body shops of electric sports cars **507**

Marian Bichler, T. Böhm, Dr. Ing. h.c. F. Porsche AG;
A. Kampker, J. Triebs, RWTH Aachen University

SECTION 3

HYBRID II

Chairperson: Prof. em. Dr. Günter Hohenberg

48 V by Mercedes-Benz	523
Thomas Mundinger, K. Wanner, M. Weber, Daimler AG	
A modular concept for hybridized manual transmissions	537
Frank Casimir, GETRAG FORD Transmissions GmbH – Magna Powertrain	
Development of a 48V P0 demonstration vehicle with eBooster® air charging	551
Wolfgang Wenzel, Sara Mohon, M. Griffen, P. Keller, K. Van Maanen, L. Xiaobing, BorgWarner Inc.; V. Negandhi, EngSim Corporation	
Development of 48V powertrain systems at Mercedes-Benz	567
Michael Timmann, R. Inderka, T. Eder, Daimler AG	

INJECTION (DIESEL / UREA)

Chairperson: Prof. Dr. Georg Wachtmeister

Double injection SCR – Bosch’s development for future emission regulations	579
Tobias Bayer, D. Samuelsen, S. Bareiss, M. Chaineux, Robert Bosch GmbH	
Reduction of perturbations on spray force measurements for quantification of Diesel sprays	595
Hans Römisch, T. Hergemöller, Daimler AG; M. Bargende, FKFS/IVK, Universität Stuttgart	
Validation of design- and development-tools for Diesel injectors with measurements from a single cylinder research engine	609
Martin Drescher, F. Pinkert, FVTR GmbH; I. Najar, IKV, Universität Rostock	
Investigation on the influence of nozzle geometry variations on Diesel jets	625
Corina Slocinski, T. Hergemöller, Daimler AG; M. Bargende, FKFS/IVK, Universität Stuttgart	

AUTOMATED DRIVING / HMI

Chairperson: Prof. Dr. Clemens Gühmann

**The automotive digitization – The way from driving yourself
to highly automated driving** **639**
Thomas Stottan, AUDIO MOBIL GmbH

**Cognitive ergonomics: Extravagance or
mandatory functional safety requirement** **647**
Marc Schneider, MBtech Group GmbH & Co. KGaA

**Framework for interactive testing and development
of highly automated driving functions** **659**
Martin Kehler, J. Pitz, T. Rothermel, FKFS;
H.-C. Reuss, FKFS/IVK, Universität Stuttgart

**Definition of critical traffic scenarios to evaluate
trigger criteria for collision avoidance** **671**
Andreas Homann, T. Bertram, RST, TU Dortmund; M. Buß, M. Keller,
K.-H. Glander, ZF TRW Active & Passive Safety Technology

NVH I

Chairperson: Prof. Dr. Frank Gauterin

**Requirements on driving dynamics in autonomous driving
with regard to motion and comfort** **683**
Georg Burkhard, S. Vos, N. Munzinger, BMW Group; E. Enders, TU München;
D. Schramm, ISYM, Universität Duisburg-Essen

Process for early prediction of noise induced by damper struts **699**
Tobias Brenner, T. Hofmann, J. Hupfeld, Daimler AG;
D. Bestle, BTU Cottbus-Senftenberg

Simplified model for self-excited rear-axle-vibrations **715**
Sebastian Wagner, G. Vena, BMW Group;
D. Schramm, ISYM, Universität Duisburg-Essen

Generation of optimal shim stacks for valves in automotive dampers **729**
Timo Hofmann, T. Brenner, J. Hupfeld, Daimler AG;
D. Bestle, BTU Cottbus-Senftenberg

SENSORS / ACTUATORS / COMPONENTS

Chairperson: Prof. Dr. Dr. Gerhard Hettich

- Sensor fault-tolerance for the actuator of an electric power steering system** **745**
Philipp Keßler, R. Isermann, IAT, TU Darmstadt
- Rotational speed sensor for high temperature** **761**
Klemens Gintner, HS Karlsruhe
- Synthetic oil filter media facing present challenges in mobility** **773**
Richard Bernewitz, B. Meister-Magsino, F. van Uffelen, N. Werchner,
A. Kilian, A.-L. Winkler, H. Banzhaf, MANN+HUMMEL GmbH
- Innovative filtration solutions for electric mobility** **783**
Michael Harenbrock, MANN+HUMMEL GmbH

DIGITALIZATION I

Chairperson: Thomas Dietz

- Seamless simulation toolchain for virtual engineering and virtual commissioning of smart factories** **797**
Jos Höll, C. König, Y. Ritter, TWT GmbH; F. Auris, T. Bär, S. Stüb,
Daimler AG; M. Paul, Festo AG & Co. KG
- Manufacturing Smart Services for automotive production lines** **813**
Ulrich Odefey, F. Baumann, G. Grünert, S. Hudert, TWT GmbH;
M. Zimmermann, M. Falkenthal, F. Leymann, IAAS, Universität Stuttgart
- A container-based architecture for the flexible coupling of communication protocols** **827**
Timur Tasci, A. Schmidt, M. M. Strljic, A. Verl, ISW, Universität Stuttgart
- A data model to data gathering from heterogeneous IoT and industry 4.0 applications** **843**
Matthias Milan Strljic, T. Tasci, A. Schmidt, T. Korb,
O. Riedel, ISW, Universität Stuttgart
