Acknowledgements — V

Introduction — 1

- The transnational history of wireless — 5
 - Doing transnational research — 5
 - Transnational communication research — 10
 - The transnational approach in war studies — 15
 - Transnational science and technology studies — 17
- Archives and sources — 21
- Limitations of the present study — 28
- Chapter outline — 29

Chapter 1

The innovative and controversial wireless — 34

- What is wireless? — 34
- The controversial and contested names of wireless — 40
- Patent wars and dividing the market — 47
- The formation of the International Radiotelegraph Union — 50
- Uses and users of radiotelegraphy — 55
- Conclusions — 61

Chapter 2

Wireless for a global audience, the early 1910s — 62

- The Titanic reveals the flaws of the wireless industry — 62
- The International Radiotelegraph Conference in London — 66
- The political economy of radiotelegraphy: 'born global' firms and collaborations — 71
- Radiotelegraph networking beyond nations — 74
 - Time signals network — 75
 - Meteorological reports — 81
 - Experiments with voice and music broadcasting — 84
 - A universal language to communicate across borders — 88
- Professionals and amateurs in the wireless industry of the 1910s — 89
 - The job market in the wireless industry: Challenges and opportunities — 89
 - The scattered community of radio amateurs — 94
- Conclusions — 103

Chapter 3

European wireless at war, 1914–1918 — 106

- Military radiotelegraphic communication across the borders — 106
- Coding and encrypting, refining the technology — 112
- Restrictions and transformations of the transnational networks — 122
 - Destruction of radiotelegraph infrastructure — 122
 - Transnational projects paused or cancelled — 126
 - International conferences deferred — 129
- Amateurs beyond the battlefield: Thousands of ‘listening ears’ — 135
- Educating new users: Soldiers, amateurs, children, and women — 143
- Conclusions — 148

Chapter 4

Establishing a new order, 1918–1927 — 151

- Attempts to restore the global wireless networks — 151
 - International arenas after the war — 151
 - The 1925 International Telegraph Conference — 156
 - The proliferation of radio broadcasting stations — 157
 - The formation of the International Broadcasting Union — 162
 - The 1927 Washington Radiotelegraph Conference — 164
- Transnational networks reconfigured — 168
 - Weather reports and time signals — 168
 - Mapping global networks — 170
- Institutionalization of radio amateurism — 178
 - Amateurs introducing broadcasting — 180
 - Renegotiating gender roles — 183
 - International amateur service — 185
- Conclusions — 189

Chapter 5

The global wireless: Past and present — 191

- Wireless history as a progenitor of radio broadcasting — 191
- Wireless then and now — 200
