

Contents

1	Introduction	1
1.1	Introduction and Overview	1
1.2	Characteristics of the Cloud	4
1.3	Terminology Cloud Computing	6
1.4	Challenges in Using the Cloud	13
1.4.1	Lifecycle and 3S	13
1.4.2	Introduction Phase	14
1.4.3	Phase of Use	17
1.4.4	Termination Phase	21
1.5	Summary	23
2	Market Overview and Cloud Canvas	25
2.1	Infrastructure as a Service	25
2.1.1	Amazon Web Services	25
2.1.2	Microsoft Azure	27
2.1.3	Google Cloud	28
2.1.4	Additional Market Participants	30
2.2	Platform as a Service	32
2.3	Software as a Service	36
2.4	Industry Specialties	38
2.5	Cloud Canvas	39
2.5.1	Idea and Structure	39
2.5.2	Cloud Service Domains	40
2.5.3	Cloud Capability Canvas	45
2.6	Summary	50
	Reference	54
3	The Three Phases of Cloud Adoption	55
3.1	Introduction	55

3.2	Stage 1—Cloud Strategy and Initial Phase	55
3.2.1	Cloud Strategy	56
3.2.2	Basics of the Cloud	56
3.3	Stage 2—Keeping Costs and Cloud Usage Under Control	57
3.3.1	FinOps	59
3.3.2	Infrastructure-as-Code	59
3.3.3	Service-Oriented Operational Offering	60
3.4	Stage 3—Use of Innovative Technologies and Expansion of Cloud Usage	61
3.4.1	Cloud Operating Model	61
3.4.2	Introduction to Cloud Native Services and Development	62
3.4.3	Cloud Native Security Concepts	64
3.5	Summary	64
4	Assessment—Determine Your Readiness Level for Cloud Readiness	67
4.1	Introduction	67
4.2	Questionnaire for the Cloud Strategy (Stage 1)	68
4.3	Questionnaire for Costs and Cloud Usage (Stage 2)	69
4.3.1	FinOps	69
4.3.2	Infrastructure-as-Code	70
4.3.3	Service-Oriented Operational Offering	72
4.4	Questionnaire for Innovative Technologies and Expansion of Cloud Usage (Stage 3)	73
4.5	Summary	74
5	Stage 1—Cloud Strategy and Launch Phase	77
5.1	Introduction	77
5.2	What is the Public Cloud?	80
5.2.1	Cloud Models	80
5.2.2	Advantages of the Public Cloud	82
5.2.3	Prerequisites for successful use of the Public Cloud	83
5.2.4	Myths about the Public Cloud	84
5.3	How is a Cloud Strategy Created?	85
5.3.1	Reasons for a Cloud Strategy	86
5.3.2	Strategic Decisions	88
5.3.2.1	Platform & Architecture	89
5.3.2.2	Organization & Governance	90
5.3.2.3	Cloudification & Migration	90
5.3.3	The Path to Cloud Strategy	91
5.4	Ensuring the Required Basics	92
5.4.1	Cloud Readiness Assessment	92
5.4.2	Single or Multi-Cloud?	94

5.4.3	Selection of Cloud Providers	98
5.4.4	Cloud Foundation.	99
5.4.5	Service Catalog	100
5.4.6	Security Baseline	101
5.4.6.1	Cloud vs. On-Premise	102
5.4.6.2	Security Measures in the Cloud	103
5.4.6.3	Zero-Trust Approach.	104
5.4.7	Cloud Center of Excellence (CCoE)	105
5.4.8	Roadmap of a Migration	106
5.5	The Core Issue: Operating Model	108
5.6	Preparation for “Cloud-Native”	110
5.6.1	What is “Cloud Native”?	110
5.6.2	Automation & Scalability	111
5.6.3	Cloudification vs. Lift & Shift	112
5.7	Sustainability	113
5.8	Practical Tips and Advice.	114
5.8.1	Lessons Learned.	114
5.8.1.1	Goals & Planning	115
5.8.1.2	Setup & Preparation	115
5.8.1.3	Organization	116
5.8.1.4	Optimized Operation.	117
5.8.2	Don’ts.	117
5.9	Client Cases and Examples	118
5.9.1	Mobility and Transport Group	118
5.9.2	Global Consumer Goods Corporation	119
5.10	What’s next	120
	Reference	121
6	Stage 2—Keeping Costs and Cloud Usage Under Control	123
6.1	Introduction	123
6.2	What’s in the Box?.	123
6.2.1	Managing and Optimizing Cloud Costs.	124
6.2.1.1	Introduction to FinOps	124
6.2.1.2	The FinOps Framework	125
6.2.1.3	Principles & Methodology	125
6.2.1.3.1	Phase 1: Inform	127
6.2.1.3.2	Phase 2: Optimize	128
6.2.1.3.3	Phase 3: Operate	129
6.2.1.4	People	131
6.2.1.4.1	Governance Model	131
6.2.1.4.2	FinOps Roles.	133
6.2.1.5	Processes.	135

- 6.2.1.5.1 Process Taxonomy. 135
 - 6.2.1.5.2 Cost Allocation Process
(Showback & Chargeback) 137
 - 6.2.1.6 Tools 140
 - 6.2.1.6.1 Tagging 140
 - 6.2.1.6.2 Native Cost Management Tools 141
 - 6.2.1.6.3 Criteria for Selecting a Third-Party Tool . . . 142
 - 6.2.1.7 Cost Optimization 143
 - 6.2.2 Automate and Standardize Cloud Technologies 146
 - 6.2.2.1 Introduction to Infrastructure-as-Code (IaC) 146
 - 6.2.2.2 Principles. 148
 - 6.2.2.3 Pipelines 148
 - 6.2.2.4 Stacks 149
 - 6.2.2.5 Patterns 150
 - 6.2.2.6 Approach according to DevOps 150
 - 6.2.2.7 Quality Checks 152
 - 6.2.3 Service-Oriented Operational Offering 152
 - 6.2.3.1 Introduction to Service Orientation 153
 - 6.2.3.1.1 What is a Service? 153
 - 6.2.3.1.2 Added Value of Service Orientation 154
 - 6.2.3.2 Operational Responsibilities in the Public Cloud 155
 - 6.2.3.3 Service Categorization According to TBM. 157
 - 6.2.3.4 Distinguishing Between TBM and FinOps. 164
 - 6.2.3.5 Security Policies and IT Audits. 164
- 6.3 Enablement 166
 - 6.3.1 Establishment of FinOps 166
 - 6.3.1.1 Organizational Readiness & Communication. 167
 - 6.3.1.2 Responsibilities in the FinOps Operating Model 168
 - 6.3.1.3 Tool Decision 169
 - 6.3.1.4 Cost Optimization 171
 - 6.3.1.5 Roadmap 173
 - 6.3.2 Technological Automation and Standardization 175
 - 6.3.2.1 Technical Enablement through Tools 175
 - 6.3.2.1.1 Infrastructure-as-Code Development
Tools 175
 - 6.3.2.1.2 Configuration Management Tools 177
 - 6.3.2.1.3 Native Tools of Public Cloud
Hyperscalers 177
 - 6.3.2.2 Repository Structure 179
 - 6.3.2.3 Structuring a Project in a Repository 181
 - 6.3.2.4 Organizational Provision of Capabilities 182
 - 6.3.2.5 Roadmap 183

6.3.3	Building a Service-Oriented Operational Offering	184
6.3.3.1	Information Collection of Services	184
6.3.3.2	Determination of Responsibilities	186
6.3.3.3	Application of the TBM Taxonomy	186
6.3.3.4	Documentation and Tooling	187
6.3.3.5	Conducting an IT Audit	189
6.3.3.6	Roadmap	192
6.4	Client Cases/Examples	193
6.4.1	Global Consumer Goods Corporation	193
6.4.2	Europe-wide Retail Company	194
6.4.3	Internationally Active Logistics Corporation	198
6.5	What's next?	199
	References	200
7	Stage 3—Using Innovative Technologies and Expanding Cloud Usage	203
7.1	Introduction	203
7.2	What's in the box?	203
7.2.1	From Standard IT Operating Model to Cloud Operating Model	203
7.2.1.1	Basics & Challenges of the IT Operating Model	204
7.2.1.2	Variants of the Cloud Operating Model	209
7.2.1.3	Introduction to Cloud-native Services and Development	220
7.2.1.4	What is behind Cloud-native Services and Development?	221
7.2.1.5	Containers—Does a Company Need Them?	224
7.2.2	Cloud Native Security Concepts	226
7.2.2.1	Cyber Security On-Premise and in the Cloud	226
7.2.2.2	From Prophylactic to Reactive Security	227
7.2.2.3	Security Tools in the Cloud	228
7.2.2.4	Cloud Native Application Protection Platform (CNAPP)	229
7.3	Enablement	230
7.3.1	Establishment of the Cloud Operating Model	230
7.3.2	Establishment of a Resilience Team	237
7.3.3	Reconstruction of the Application Portfolio	240
7.3.3.1	What is Application Modernization?	240
7.3.3.2	Cloudification	241
7.3.3.3	What methods of application modernization are available?	243
7.3.3.4	Approach to Application Modernization	243

7.4	Outlook	245
7.4.1	Innovation PowerHouse.....	245
7.4.1.1	Innovation	245
7.4.1.2	Cloud as a core element of innovation	246
7.4.1.3	Access to new technologies and increased agility in business model development	246
7.4.1.4	Hyperscalability	247
7.4.1.5	Start-ups start with cost-efficient and flexible cloud solutions	247
7.4.1.6	Faster idea validation with lower risk	247
7.4.1.7	Collaboration and Networking of Actors in the Ecosystem	247
7.4.1.8	Accessibility and Open Innovation.....	248
7.4.1.9	Conclusion and Outlook	248
7.4.2	Cloud No-Opps—the Next Generation of Cloud Managed Services	248
7.4.3	Platform Business Models—Hype or Dead End	251
	References.....	253
8	Summary and Outlook	255
