

Content

1	Chemical Vapor Transport Reactions – an Introduction	1
1.1	Historical Development and Principles	1
1.2	Experimental	3
1.3	Thermodynamic Considerations	4
1.4	Equilibrium Solids in Source and Sink	9
1.5	Transport Agent	10
1.6	Overview of Vapor Deposition Methods	13
	Bibliography	16
2	Chemical Vapor Transport – Models	17
2.1	Thermodynamic Basis for Understanding Chemical Vapor Transport Reactions	19
2.2	Condensed Phases in a Transport Experiment – the Most Simple Case	28
2.3	Complex, Congruent Transports	31
2.4	Incongruent Dissolution and Quasi-stationary Transport Behavior	36
2.4.1	Phase Relations Accompanying Incongruent Dissolution of a Solid	36
2.4.2	The Extended Transport Model	39
2.5	Non-stationary Transport Behavior	60
2.5.1	Chemical Reasons for the Occurrence of Multi-phase Solids	60
2.5.2	The Time Dependence of Chemical Vapor Transport Experiments with Multi-Phase Solids	68
2.5.3	The Model of Co-operative Chemical Vapor Transport	75
2.6	Diffusion, Stoichiometric Flow, and Transport Rate	78
2.6.1	Steady-state Diffusion	78
2.6.2	One-dimensional Steady-state Diffusion as Rate-determining Step	78
2.6.3	The Use of λ for the Calculation of Transport Rates of Complex Transport Systems in Closed Ampoules	81
2.6.4	The Use of Solubility λ in Open Transport Systems	83
2.6.5	An Example – Calculation of the Transport Rate for the Nickel/Carbon Monoxide System	84
2.7	Diffusion Coefficients	87
2.7.1	The Binary Diffusion Coefficient D^0	87
2.7.2	D^0 in Multi-compound Systems	91
2.8	Survey of Gas Motion in Ampoules	93
2.8.1	General Remarks	93
2.8.2	Experiments on Gas Motion – Diffusion and Convection in Closed Ampoules	95
2.8.3	Experiments Concerning Thermal Convection	99

2.9	Chemical Kinetics of Heterogeneous Reactions	103
2.9.1	Reaction Behavior at an Atomic Level	103
2.9.2	Kinetic Influences Observed by Transport Experiments	105
2.9.3	Some Observations on Catalytic Effects	106
2.9.4	Indirect Transport	107
	Bibliography	108
3	Chemical Vapor Transport of Elements	113
3.1	Transport with Halogens	114
3.2	Conproportionation Reactions	118
3.3	Reversal of the Transport Direction	120
3.4	Transport via Gas Complexes	122
3.5	Transport with the Addition of Hydrogen Halides and Water	123
3.6	Oxygen as a Transport Agent	124
3.7	Technical Applications	125
	Bibliography	133
4	Chemical Vapor Transport of Metal Halides	139
4.1	Formation of Higher Halides	140
4.2	Conproportionating Reactions	141
4.3	Formation of Gas Complexes	141
4.4	Halogen Transfer Reactions	144
4.5	Formation of Interhalogen Compounds	145
	Bibliography	150
5	Chemical Vapor Transport of Binary and Multinary Oxides	153
5.1	Transport Agents	158
5.2	Solids	165
5.2.1	Group 1	165
5.2.2	Group 2	166
5.2.3	Group 3, Lanthanoids and Actinoids	168
5.2.4	Group 4	184
5.2.5	Group 5	190
5.2.6	Group 6	200
5.2.7	Group 7	206
5.2.8	Group 8	212
5.2.9	Group 9	215
5.2.10	Group 10	217
5.2.11	Group 11	222
5.2.12	Group 12	225
5.2.13	Group 13	227
5.2.14	Group 14	232
5.2.15	Group 15	240
5.2.16	Group 16	242
5.3	Overview of the Trasport of Oxides	244
	Bibliography	275

6	Chemical Vapor Transport of Oxido Compounds with Complex Anions	291
6.1	Transport of Sulfates	292
6.2	Transport of Phosphates, Arsenates, Antimonates, and Vanadates	295
6.2.1	Chlorine as Transport Agent for Anhydrous Phosphates	296
6.2.2	Halogens Combined with Reducing Additives as Transport Agents for Phosphates	297
6.2.3	Transport of Multinary Phosphates	303
6.2.4	Deposition of Thermodynamically Metastable Phosphates from the Gas Phase.....	304
6.2.5	Formation of Silicophosphates during the Transport of Phosphates	306
6.2.6	Transport of Arsenates(V), Antimonates(V), and Vanadates(V)	307
6.3	Transport of Carbonates, Silicates, and Borates	308
	Bibliography	317
7	Chemical Vapor Transport of Sulfides, Selenides, and Tellurides	321
7.1	Transport of Sulfides	322
	Bibliography of Section 7.1	349
7.2	Transport of Selenides	360
	Bibliography of Section 7.2	378
7.3	Transport of Tellurides	385
	Bibliography of Section 7.3	398
8	Chemical Vapor Transport of Chalcogenide Halides	403
8.1	Transport of Oxide Halides	410
8.2	Transport of Sulfide Halides, Selenide Halides, and Telluride Halides	421
8.3	Transport of Compounds with Chalcogen Poly-cations and Chalcogenate(IV)-halides	431
	Bibliography	445
9	Chemical Vapor Transport of Pnictides	451
9.1	Transport of Phosphides	452
	Bibliography of Section 9.1	461
9.2	Transport of Arsenides	464
	Bibliography of Section 9.2	482
10	Chemical Vapor Transport of Intermetallic Phases	487
10.1	Selected Examples	492
	Bibliography	511
11	Gas Species and their Stability	515
11.1	Halogen Compounds	515
11.2	Elements in the Gaseous State	520
11.3	Hydrogen Compounds	522
11.4	Oxygen Compounds	523
11.5	Other Substance Groups	524
	Bibliography	525

12	Thermodynamic Data	527
12.1	Determination and Tabulation of Thermodynamic Data	527
12.2	Estimation of Thermodynamic Data	528
12.2.1	Thermodynamic Data of Solids	528
12.2.2	Thermodynamic Data of Gases	533
12.3	Quantum Chemical Calculation of Thermodynamic Data	536
	Bibliography	538
13	Modeling of Chemical Vapor Transport Experiments: the Computer Programs TRAGMIN and CVTRANS	539
13.1	Purpose of Modeling of Chemical Vapor Transport Experiments.....	539
13.2	Equilibrium Calculations According to the G_{\min} Method.....	540
13.3	The Program TRAGMIN	544
13.4	The Program CVTRANS	548
	Bibliography	554
14	Working Techniques	555
14.1	Transport Ampoules and Transport Furnaces	555
14.2	Preparation of Transport Ampoules	557
14.3	The Transport Experiment	562
14.4	The Transport Balance	564
14.5	High Temperature Vapor Transport: Transport under Plasma Conditions	565
	Bibliography	566
15	Selected Experiments for Practical Work on Chemical Vapor Transport Reactions	567
15.1	Transport of WO_2 with HgX_2 ($X = \text{Cl, Br, I}$)	567
15.2	Transport of $\text{Zn}_{1-x}\text{Mn}_x\text{O}$ Mixed-crystals	578
15.3	Transport of Rhenium(VI)-oxide	581
15.4	Transport of Nickel	583
15.5	Transport of Monophosphides MP ($M = \text{Ti to Co}$)	585
15.6	Numeric Calculation of a Co-existence Decomposition Pressure	689
	Bibliography	591
16	Appendix	593
16.1	Important Thermodynamic Equations	593
16.2	Selected Physical Units, Constants, and Conversions	594
16.3	Abbreviations	597
	Index	601
	Selected Photographs
