

Contents

Leopoldina Fortunati and Autumn Edwards

Introduction — 1

Section 1: Robots in Culture and Society

Matthew Lombard, Kun Xu, and Melissa E. Selverian

Future Presence: Living with Social Robots — 21

Mauro Sarrica, Simone Natale, and Elda Danese

Representing Robots in Popular Culture — 47

Serena Marchesi and Agnieszka Wykowska

**Designing Robots That are Accepted in Human Social Environments:
Anthropomorphism, the Intentional Stance, Cultural Norms and Values,
and Societal Implications — 63**

Luisa Damiano and Paul Dumouchel

Are Robotic Bodies (Part of) Social Bodies? — 85

David J. Gunkel

Persons or Things: The Role of Robots in Society — 105

Robert W. Gehl and Sean Lawson

Automated Masspersonal Social Engineering — 119

Section 2: Humanistic and Social Scientific Perspectives

Linguistics

Naomi S. Baron

AI and Human Writing: Collaboration or Appropriation? — 137

Law

Caja Thimm and Laura Thimm-Braun

Policies, Regulation, and Legal Perspectives on Social Robots — 161

Christoph Lutz, Aurelia Tamò-Larrieux, and Eduard Fosch-Villaronga
How Social Robots Affect Privacy: Navigating the Landscape — 179

Sociology

Richard Ling
Artificial Intelligence, Robotics, and the Evolution of the Social Sciences — 203

Astrid Weiss
Human Interactions With (Embodied) AI: The Future of Authenticity in Human–AI Relation(ship)s — 221

Psychology and Neuroscience

Monica Pivetti and Silvia Di Battista
Mind Perception During and After Interacting with Artificial Agents — 241

Friederike Eyssel and Giulia Perugia
How People Perceive Social Robots: The Case of Gender — 261

Kate Devlin
Relating with Social Robots: Issues of Sex, Love, Intimacy, Emotion, Attachment, and Companionship — 277

Rachel L. Severson, Sarah E. Sweezy, and Thomas M. Macko
Real or Pretend? How Children Ontologize Social Robots as Mental and Moral Others — 295

Communication and Computer Sciences

Andrea L. Guzman
Rethinking Communication between Humans and Social Robots — 313

Patric R. Spence, Chad Edwards, and Matthew Craig
Interacting with Social Robots: The Influence of their Distinctive Cues, Behavioral Capabilities, and Affordances on Social Interaction and Well-being — 335

Xianlin Jin, Patric R. Spence, and Seungahn Nah
Integrating Big-Data Tools to Study AI and Human–Machine Communication: Methodology Strengths, Future Directions, and Applications — 355

Jochen Peter and Caroline L. van Straten
Social Robots and Children: A Field in Development — 371

Section 3: Contexts of Human–Robot Interaction

Yolande Strengers, Thao Phan, Melisa Duque, and Kari Dahlgren
Anthropomorphizing Voice Assistants: A Research Agenda for Human–AI Relationships — 391

Leopoldina Fortunati and Autumn Edwards
Domestic Appliances and Household Robots: The Changing Landscape of Housework and Family — 411

Marco Dehnert
Ability and Disability: Social Robots and Accessibility, Disability Justice, and the Socially Constructed Normal Body — 429

Sawyer Collins and Selma Šabanović
Growing Old Together: The Promise and Challenge of Social Robots for Older Adults — 447

J. Nan Wilkenfeld, Norah E. Dunbar, Chengyu Fang, and Divya Srinivasan
Power and Synchrony in Human Collaboration with Exoskeletons — 467

Index — 489
