

Contents

Preface — V

Sean Holman

1 Generalized Radon transforms — 1

François Monard

2 Nonstandard Sobolev scales and the mapping properties of the X-ray transform on manifolds with strictly convex boundary — 35

Mikko Salo

3 On geometric inverse problems and microlocal analysis — 77

Yiran Wang

4 Inverse problems in cosmological X-ray tomography — 139

Hanming Zhou

5 The weighted X-ray transform and applications — 167

Index — 187
