Abstract	v
Kurzfassung	vii
1 Introduction	1
1.1 Background and Contributions	1
1.2 Notation	4
2 Shannon and Rényi Information Measures	7
2.1 Shannon Information Measures	7
2.2 Rényi Entropy	9
2.3 Arimoto–Rényi Conditional Entropy	9
2.4 Rényi Divergence	10
2.5 Relative α -Entropy	14
2.6 Rényi Measures of Dependence	16
2.7 Csiszár’s Conditional Rényi Divergence	17
2.8 Sibson’s Conditional Rényi Divergence	18
2.9 New Conditional Rényi Divergence	20
3 Two Measures of Dependence	23
3.1 Introduction	23
3.2 Related Work	25
3.3 Two Measures of Dependence	27
3.4 Proofs	33

4	Conditional Rényi Divergences	69
4.1	Introduction	69
4.2	Csiszár's Conditional Rényi Divergence	71
4.3	Sibson's Conditional Rényi Divergence	76
4.4	New Conditional Rényi Divergence	79
4.5	Relation to Arimoto's Measures	87
4.6	Relations Between the Divergences	87
5	Guessing with Distributed Encoders	91
5.1	Introduction	91
5.2	Related Work	96
5.3	Converse	96
5.4	Upper Bounds for the Power of a Sum	98
5.5	Achievability	101
6	Distributed Task Encoding	111
6.1	Introduction	111
6.2	Moments of the List Size	115
6.3	Converse	116
6.4	Achievability	117
6.5	On the Definition of the List	122
7	Testing Against Independence	125
7.1	Introduction	125
7.2	Related Work	128
7.3	Preliminaries	129
7.4	Achievable Error-Exponent Pairs	130
7.5	Error-Exponent Functions and $J_\alpha(X; Y)$	134
7.6	An Example Where $E_P(\cdot)$ Is Not Convex	137
8	Gambling and Rényi Divergence	143
8.1	Introduction	143
8.2	Horse Betting	145
8.3	Horse Betting with Side Information	150
8.4	Horse Betting with Part of the Money	154
8.5	Universal Betting for IID Races	159
	Bibliography	163
	About the Author	171
