Dhivya Dharshini, Subbiah Murugesan and Sundaramoorthy Pavithra

1 Production strategies for carbon composites and carbon-based adsorbents — 1

- 1.1 Introduction — 1
- 1.2 Bibliometric analysis — 3
- 1.3 Carbon-based adsorbent types — 6
 - 1.3.1 Activated carbon — 6
 - 1.3.2 Biochar — 6
 - 1.3.3 Carbon nanofibers — 7
 - 1.3.4 Graphene, graphene oxide (GO), and reduced graphene oxide (rGO) — 7
 - 1.3.5 Carbon nanotubes — 8
 - 1.3.6 Carbon aerogel — 8
- 1.4 Production methods for carbon composites — 9
 - 1.4.1 Carbon-carbon composites — 9
 - 1.4.2 Carbon-metal composites synthesis — 12
 - 1.4.3 Production of carbon-fiber reinforced polymers (CFRPs) — 15
- 1.5 Conclusion and prospects — 17
- References — 18

Jeyaseelan Aravind and Peraman Muthukumaran

2 Characterization techniques for carbon-based adsorbents and carbon composites — 25

- 2.1 Introduction — 25
- 2.2 Characterization of parameters of carbon-based adsorbents — 26
 - 2.2.1 Adsorbent characteristics pore structure — 29
 - 2.2.2 Surface chemical groups — 29
 - 2.2.3 Surface characteristics — 31
- 2.3 Chemical and physical characterization of carbon adsorbents — 32
- 2.4 Conclusion and prospects — 41
- References — 41

Rameshwar Yadav Hiranmai and Ajay Neeraj

3 Activated carbon-mediated adsorption of emerging contaminants — 47

- 3.1 Introduction — 47
- 3.2 ECs in the environment — 49

3.3	Adsorption of ECs —	52
3.4	Efficiency of adsorption methods for removal of ECs —	54
3.5	Activated carbon for adsorption of ECs —	55
3.6	Activated carbon for caffeine adsorption —	58
3.7	Conclusions —	60
	References —	61

Samuel Gladstone Jeyaraj, Srinivasan Hemavarshini, Kavitha Shree GG and Jeyaseelan Aravind

4 Biochar-mediated removal of various pollutants from the environment — 67

4.1	Introduction —	67
4.2	Production strategies for biochar —	69
4.3	Biochar environmental applications —	73
4.4	Conclusion and prospects —	82
	References —	83

Ramachandran Vinoth Kumar, Naganathan Kiruthika and Gunasekaran Priya

5 Carbon metal nanoparticle composites for the removal of pollutants — 89

5.1	Introduction —	89
5.2	Production strategies for carbon-metal nanoparticle composites —	91
5.2.1	Chemical reduction method —	92
5.2.2	Dry synthesis —	94
5.3	Mechanisms of pollutant removal —	95
5.4	Applications of CNPs in pollution removal —	96
5.4.1	Removal of heavy metals —	96
5.4.2	Organic pollutant removal by CNPs —	98
5.4.3	Nitrogen compounds removal by CNPs —	100
5.4.4	Sulfur compounds removal by CNPs —	101
5.5	Conclusions —	103
	References —	103

6 Role of carbon nanotubes, carbon nano-fibres and nano-gels in eliminating pollutants from aqueous solution — 111

6.1	Introduction —	112
6.2	Role of nanotechnology in treating pollutants —	113
6.3	Significance of carbon nanotubes in pollutant treatment —	113
6.4	Role of carbon nano-fibres in pollutants treatment —	118

6.5	Role of nanogels in eliminating pollutant —	122
6.6	Conclusion —	127
	References —	127

Debolina Chatterjee and Karthikeyan Sivashanmugam

7 Utilization of graphene and rGO membranes for water and wastewater treatments — 133

7.1	Introduction —	133
7.1.1	Graphene and reduced graphene oxide —	134
7.1.2	Fabrication of graphene oxide/reduced graphene oxide membranes —	138
7.1.3	Graphene based membranes in water treatment —	138
7.1.4	GO, rGO, and hybrid membranes in water and waste water treatments —	139
7.1.5	Challenges and limitations —	143
7.1.6	Future prospects —	143
	References —	144

Suresh Babu Palanisamy

8 Carbon composites as an Avante garde material in mitigating dyes and heavy metal pollution — 151

8.1	Introduction —	151
8.2	Synthesis of carbon-based nanocomposites —	153
8.2.1	Chemical vapor deposition (CVD) —	154
8.2.2	Sol-gel methods —	154
8.2.3	Hydrothermal synthesis —	154
8.2.4	Template-assisted approaches —	154
8.3	Nanocomposites characterization techniques —	155
8.3.1	Scanning electron microscopy (SEM) —	155
8.3.2	Transmission electron microscopy (TEM) —	155
8.3.3	X-ray diffraction (XRD) —	155
8.3.4	Fourier transform infrared spectroscopy (FTIR) —	155
8.3.5	Raman spectroscopy —	155
8.3.6	Thermogravimetric analysis (TGA) —	156
8.3.7	Brunauer–Emmett–Teller (BET) surface area analysis —	156
8.4	Environmental applications of carbon-based composites —	156
8.4.1	Heavy metals and its influence in environmental health —	156
8.4.2	Effects of dyes on environment and health —	159
8.5	Cost analysis —	163
8.6	Future prospects —	164
8.7	Conclusions —	164
	References —	165

9 Carbon composites in the mitigation of micro and nanoplastics — 171

- 9.1 Introduction — **172**
- 9.1.1 Carbon-based adsorbents for removal of micro-nanoplastics — **173**
- 9.1.2 Attributes that impact the adsorption of nanoparticles by carbon
 composites — **178**
- 9.1.3 Future prospects — **182**
- 9.2 Conclusions — **183**
- References — **184**
