Preface *xiii*

About the Editors *xv*

Part I Atroposelective Synthesis 1

1 Introduction 3

Mohamed S. H. Salem and Shinobu Takizawa

1.1 Molecular Chirality and Atropisomerism 3

1.1.1 Molecular Chirality 3

1.1.2 Axial Chirality and Atropisomerism 4

1.2 Atropisomerism in Asymmetric Organic Synthesis 6

1.3 Atropisomerism: Challenges and Applications 10

1.3.1 Axially Chiral Ligands and Organocatalysts 10

1.3.2 Natural Product Synthesis 13

1.3.3 Atropisomerism in Drug Discovery and Development 13

References 16

2 Iron- and Ruthenium-Catalyzed Atroposelective Synthesis of Axially Chiral Compounds 21

Tatsuya Uchida

2.1 Introduction 21

2.2 Oxidative Homo-coupling of 2-Naphthols to BINOL and Its Derivatives 22

2.3 Oxidative Cross-coupling of 2-Naphthols to Asymmetric BINOLs 29

2.4 Oxidative Spirocyclization of 2-Naphthols 38

2.5 Conclusion 41

References 42

3	Vanadium-Catalyzed Atroposelective Coupling of Arenols and Application in the Synthesis of Polycyclic Heteroaromatics (PHAs) 45
	<i>Mohamed S. H. Salem and Shinobu Takizawa</i>
3.1	Introduction 45
3.2	Chiral Vanadium Catalysis in Homo-Coupling of Hydroxycarbazoles 47
3.3	Chiral Vanadium Catalysis in Hetero-Coupling of Hydroxycarbazole with 2-Naphthols 50
3.4	Enantioselective Synthesis of Oxa[9]helicenes <i>via</i> Chiral Vanadium Complex-Catalyzed Homo-Couplings of Polycyclic Phenols 55
3.5	Enantioselective Synthesis of Oxaza[7]dehydrohelicenes <i>via</i> Chiral Vanadium Complex-Catalyzed Hetero-Couplings of 3-Hydroxycarbazoles and 2-Naphthols 58
3.6	Summary and Conclusion 62
	References 63
4	Atroposelective Suzuki–Miyaura Coupling Toward Axially Chiral Biaryls: Mechanistic Insight 69
	<i>Toshinobu Korenaga</i>
4.1	Introduction 69
4.2	Mechanism Insight of SMC Reaction and Enantiodetermining Step 70
4.3	Asymmetric SMC Reaction 72
4.3.1	Examples of Early Studies 72
4.3.2	Consideration of the Asymmetric SMC: Cases Dependent on a Directing Group 74
4.3.3	Consideration of the Asymmetric SMC: Cases Independent of a Directing Group 79
4.4	Conclusion 85
	References 85
5	Organocatalytic Enantioselective Formation of Atropisomers 91
	<i>Chiara Portolani, Giovanni Centonze, and Giorgio Bencivenni</i>
5.1	Introduction 91
5.2	Aminocatalysis 92
5.2.1	Atropisomeric Synthesis of C—C Biaryls <i>via</i> Aminocatalysis 92
5.2.2	Atropisomeric Synthesis of C—C Non-biaryls <i>via</i> Aminocatalysis 94
5.2.3	Atropisomeric Synthesis of C—N Scaffolds <i>via</i> Aminocatalysis 97
5.3	Brønsted Base Catalysis 99
5.3.1	Atropisomeric Synthesis of C—C Biaryls and Heterobiaryls <i>via</i> Base Catalysis 100
5.3.2	Atropisomeric Synthesis of C—C Non-biaryls <i>via</i> Base Catalysis 105

5.3.3	Atropisomeric Synthesis of C—N Scaffolds <i>via</i> Base Catalysis	106
5.3.4	Atropisomeric Synthesis of N—N Scaffolds <i>via</i> Base Catalysis	111
5.4	Phase Transfer Catalysis	112
5.4.1	Atropisomeric Synthesis of C—C Biaryls, Heterobiaryls, and Non-biaryls <i>via</i> PTC	113
5.4.2	Atropisomeric Synthesis of C—N Scaffolds <i>via</i> PTC	117
5.4.3	Atropisomeric Synthesis of C—O Scaffolds <i>via</i> PTC	118
5.4.4	Atropisomeric Synthesis of N—N Scaffolds <i>via</i> PTC	118
5.5	Chiral Phosphoric Acids	120
5.5.1	Atropisomeric Synthesis of C—C Biaryls and Heterobiaryls <i>via</i> CPA	121
5.5.2	Atropisomeric Synthesis of C—N Scaffolds <i>via</i> CPA	124
5.5.3	Atropisomeric Synthesis of C—O Scaffolds <i>via</i> CPA	128
5.5.4	Atropisomeric Synthesis of C—B Scaffolds <i>via</i> CPA	130
5.5.5	Atropisomeric Synthesis of N—N Scaffolds <i>via</i> CPA	130
5.6	Conclusions	131
	References	132

6 Synthesis of Atropisomers *via* Enantioselective Ring-Opening Reactions

Longhui Duan and Zhenhua Gu

6.1	Introduction	137
6.2	Asymmetric Ring Opening of Biaryl Lactones and Their Derivatives	137
6.2.1	Preliminary Findings	137
6.2.2	Catalytic Asymmetric Reactions	139
6.3	Asymmetric Ring-Opening Reactions <i>via</i> C—I Bond Cleavage	145
6.4	Asymmetric Ring-Opening Reactions <i>via</i> C—N and C—P Bonds Cleavage	153
6.5	Asymmetric Ring-Opening Reactions <i>via</i> C—C and C—Si Bond Cleavage	155
6.6	Asymmetric Ring-Opening Reactions <i>via</i> C—O and C—S Bond Cleavage	159
6.7	Oriented Asymmetric Ring Opening <i>via</i> Transient Pentacyclic Metal Species	162
6.8	Summary and Conclusions	164
	References	164

Part II Challenges and Applications

7 Axially Chiral Ligands and Catalysts Derived from Atropisomeric Binaphthyl Structures

Shouyi Cen and Zhipeng Zhang

7.1	Introduction	173
7.2	Chiral Ligands Derived from BINOLs	174

7.2.1	Phosphorus-Containing Ligands	174
7.2.2	Rare Earth-Alkali Metal–BINOL (REMB) Complexes and Linked BINOLs	177
7.2.3	BINOL-Derived Salen Ligands	178
7.2.4	Sulfur-Containing Ligands	178
7.2.5	Oxazoline-Containing Ligands	179
7.2.6	Vanadium Complexes for Enantioselective Oxidative Coupling of Phenols	179
7.2.7	Binaphthyl-Based Chiral Diene Ligands and Cyclopentadienyl Ligands	180
7.2.8	Binaphthyl-Based Monocarboxylic Acid Ligands	182
7.2.9	Axially Chiral Ligands and Catalysts Containing a Phenanthroline or Pyridine Unit	183
7.3	Chiral Ligands Derived from BINAMs	185
7.4	Chiral Ligands Derived from NOBINs	187
7.5	Chiral Organocatalysts Derived from BINOLs	189
7.5.1	Acid Organocatalysts Derived from BINOLs	189
7.5.2	Base Organocatalysts Derived from BINOLs	192
7.5.3	Phase-Transfer, Cation-Bonding, and Ammonium Betaine Catalysts	194
7.5.4	Chiral Ketone and Aldehyde Organocatalysts Derived from BINOLs	194
7.5.5	BINOL-Derived Catalysts for Hypervalent Iodine Organocatalysis	196
7.6	Chiral Organocatalysts Derived from BINAMs	197
7.7	Chiral Organocatalysts Derived from NOBINs	199
7.8	Chiral Ligands and Catalysts Derived from Other Binaphthyl Motifs	199
7.9	Summary and Outlook	201
	References	202
8	Multinuclear Zinc Catalysts with Axial Chirality	219
	<i>Takayoshi Arai</i>	
8.1	Pioneering Works on BINOL-Zn System	219
8.2	Enantioselective Addition Reaction of Dialkylzinc to Aldehydes Using BINOL Additive	219
8.3	Catalytic Asymmetric Alkynylation of Aldehydes	223
8.4	Catalytic Asymmetric Diels–Alder Reaction	224
8.5	Catalytic Asymmetric Epoxidation of Enones	225
8.6	Catalytic Asymmetric Direct Aldol Reaction	226
8.7	Catalytic Asymmetric Iodofunctionalization of Alkenes	230
8.8	Conclusions	233
	References	233

9	Binaphthyl-Based Chiral DMAP Derivatives in Enantioselective Transformations	237
	<i>Hiroki Mandai and Seiji Suga</i>	
9.1	Introduction	237
9.2	Binaphthyl-Based Chiral DMAP Derivatives	240
9.2.1	Catalyst Design	240
9.2.2	Catalyst Synthesis	241
9.3	Intramolecular Acyl Transfer Reactions	242
9.3.1	O- to C-Acyl Transfer Reaction	242
9.4	Intermolecular Acyl Transfer Reactions	247
9.4.1	Kinetic Resolution of Alcohols	247
9.4.2	Desymmetrization of Alcohols	253
9.4.3	Dynamic Kinetic Resolution	258
9.5	Summary and Conclusions	260
	References	261
10	Catalytic Atroposelective Oxidative Coupling in Natural Product Synthesis	267
	<i>Houng Kang and Marisa C. Kozlowski</i>	
10.1	Introduction	267
10.2	Copper-Catalyzed Asymmetric Oxidative Coupling to Construct a Chiral Axis	273
10.2.1	Nigerone	273
10.2.2	Perylenequinones	276
10.2.3	Bisoranjidiol	282
10.3	Vanadium-Catalyzed Asymmetric Oxidative Coupling to Construct a Chiral Axis	283
10.3.1	Viriditoxin	283
10.3.2	Sorazolon E2	288
10.3.3	Chaetoglobin A	288
10.3.4	Gonytolide A	291
10.4	Enzymatic Strategies to Synthesize Natural Products <i>via</i> Atroposelective Coupling	295
10.4.1	Kotanin	295
10.4.2	Phlegmacins	297
10.5	Conclusion	297
	References	298
11	Atropisomerism in Drug Discovery and Development	309
	<i>Khaled M. Darwish, Asmaa S. A. Yassen, Ebtehal M. Husseiny, Mohammed I. A. Hamed, and Mohamed A. Helal</i>	
11.1	Introduction	309
11.2	Configuration Assignment of Atropisomeric Drugs	309

I

11.3	Classification of Atropisomeric Drugs According to the Rotational Energy Barrier	310
11.4	Analysis of Atropisomeric Drugs Across the Pharmaceutical Market	311
11.4.1	Biaryls and Heterobiaryls	312
11.4.2	Diaryl Ethers	316
11.4.3	Diaryl Amines	317
11.4.4	Benzamides	318
11.4.5	Macrocycles	319
11.5	Introducing Atropisomerism to Modulate Selectivity	320
11.6	Challenges for Atropisomerism within Drug Discovery	323
11.7	Conclusion	326
	References	326
