

Contents

1	Introduction	1
1.1	State of the Art	3
1.2	Objectives and Research Contributions	4
1.3	Scope and Outline	5
2	Distributed Radar Fundamentals	7
2.1	Frequency Modulated Continuous Wave Radar	7
2.1.1	Antenna Arrays	10
2.1.2	Signal Processing	12
2.1.3	Resolution and Accuracy	13
2.2	Classes of Distributed Radar	14
2.3	Synchronization Errors in Quasi-Coherent Radars	17
2.4	Velocity Vector Estimation	19
2.5	Equivalent Angular Resolution	22
3	Experimental Bistatic Radar System	25
3.1	Radar Evaluation Module	25
3.2	Bistatic Trilateration	27
3.3	Velocity Vector Estimation	30
3.3.1	Measurement Setup	31
3.3.2	Velocity Vector Estimation Results	32
3.4	Closing Remarks on the Experimental Measurements	36
4	Radar Scattering	37
4.1	Basics of Radar Cross Section	37
4.1.1	Polarization Scattering Matrix	38
4.2	Radar Cross Section of Basic Scatterers	39
4.2.1	Spheres	39
4.2.2	Plates	40
4.2.3	Cylinders	40
4.2.4	Other Objects and Bodies of Revolution	41
4.2.5	Corner Reflectors	41
4.2.6	Planar Radar Reflectors	45
4.3	The Far-Field Criterion for Radar Scatterers	46
4.3.1	Measurement Setup	47
4.3.2	Measurement Results	49

4.4	Automobiles as Complex Radar Scatterers	51
4.4.1	Categories of Fluctuating Targets	51
4.4.2	Statistical Modeling	53
4.4.3	Ray Tracing Simulations	54
4.4.4	Modeling Accuracy	55
4.4.5	Aspects of Polarization	58
4.4.6	Comparative Analysis of Simulation Results	59
4.5	Bistatic Radar Cross Section	63
4.5.1	Bistatic Scattering of Basic Scatterers	65
4.5.2	Bistatic Scattering of Automobiles	67
4.6	Closing Remarks on Radar Scattering	68
5	Dielectric Corner Reflectors	71
5.1	Dielectric Scattering	72
5.1.1	Working Principle of Dielectric Corner Reflectors	74
5.1.2	Radar Cross Section of Dielectric Surfaces	75
5.2	Manufacturing of Dielectric Corner Reflectors	76
5.2.1	3D Printing and Additive Manufacturing	76
5.2.2	Permittivity Measurements	78
5.3	Radar Cross Section Measurements	80
5.4	Analysis of Wave Interference	81
5.4.1	Experimental Interference Analysis	83
5.4.2	Analytical Interference Model	86
5.4.3	Evaluation of the Interference Model	88
5.5	Dielectric Losses in Dielectric Corner Reflectors	89
5.6	High Permittivity Materials	90
5.6.1	Anti-Reflective Coatings	92
5.6.2	Design of Anti-Reflective Coatings	94
5.7	Bistatic Scattering of Dielectric Corner Reflectors	97
5.8	Closing Remarks on Dielectric Corner Reflectors	98
6	Conclusion	101
