

Contents

1	Introduction	1
1.1	Motivation	2
1.2	Structure of the Thesis	3
2	The Electric Power Plant Business	5
2.1	Potential Analysis of Investment Decisions	6
2.1.1	Theoretical Potential	7
2.1.2	Technical Potential	8
2.1.3	Practical Potential	8
2.1.4	Sustainable Potential	9
2.2	Electricity Markets and Trading	9
2.2.1	Futures Markets	12
2.2.2	Spot Markets	13
2.2.3	Over-the-Counter	14
2.3	Financial Indicators for Power Plants: Variable Costs and Spreads . .	15
2.3.1	Marginal Cost	16
2.3.2	Levelized Cost of Electricity	17
2.3.3	Spreads as Indicators	18
2.4	Valuation Methods for Determining Investment Framework and In- vestment Values	19
2.4.1	Relative Valuation	20
2.4.2	Discounted Cash-Flow Valuation	21
2.4.3	Contingent Claim Valuation	23
2.5	Discourse of Existing Valuation Methods in the Energy Sector	26
2.5.1	Status Quo of Qualitative Literature for Valuation	26
2.5.2	Status Quo of Quantitative Literature for Valuation	31
2.5.3	Summary of the Discourse and Results of the Literature Review	34
3	Application of Valuation Methods for Power Plants	37
3.1	Specification of the Valuation Objective and Assumptions	38
3.1.1	Deterministic Valuation Assumption	39

3.1.2	Valuation Period Assumption	40
3.1.3	Geographical Focus Assumption	41
3.1.4	Selection of Power Plant Technologies	41
3.2	Data basis Power Plant Metrics	42
3.2.1	Investment Metrics	43
3.2.2	Operative Plant Metrics	44
3.2.3	Exchange Electricity Prices	45
3.3	Development of a Deterministic Price Pattern Methodology	48
3.4	Application of the Valuation Methods	63
3.4.1	Discounted Cash-Flow Method with Future Market as Data Basis	65
3.4.2	Discounted Cash-Flow Method with Future and Spot Market as Data Basis	67
3.4.3	Real Option Analysis with Spot Market as Data Basis	70
3.4.4	Results of the Valuation Methods	79
3.5	Summary and Conclusions	82
4	Quantitative Evaluation of Valuation Methods for Power Plants	85
4.1	Status Quo of Quantitative Literature for Valuation	86
4.2	Benchmark Methodology	87
4.3	Benchmark Development	89
4.3.1	Step 1 Identify the Benchmarking Subject	89
4.3.2	Step 2 Identify Benchmarking Partners	90
4.3.3	Step 3 Determine Data Collection Method and Collect Data	90
4.3.4	Step 4 Determine Current Competitive Gap	91
4.3.5	Step 5 Project Future Performance	91
4.3.6	Step 6 Communicate findings and Gain Acceptance	92
4.3.7	Step 7 Establish Functional Goals	92
4.3.8	Step 8 Develop Action Plan	94
4.3.9	Step 9 Implement Plans and Monitor Progress	94
4.3.10	Step 10 Recalibrate the Benchmark	95
4.3.11	Summary of the Benchmark Development	95
4.4	Simulation Methodology	95
4.4.1	Introduction to Simulation	95
4.4.2	Simulation Procedure	96
4.4.3	Research Project Environment	99
4.5	Simulation Development	100
4.5.1	Objectives Description	100
4.5.2	Requirement Specification	100
4.5.3	System Analysis	101

4.5.4	Data Collection	102
4.5.5	Model Formalization	102
4.5.6	Data Preparation	105
4.5.7	Model Implementation	105
4.5.8	Experimentation	106
4.5.9	Results of the Simulation	106
4.6	Application of the Benchmark	107
4.6.1	Results of the Benchmark	108
5	Summary, Conclusion & Outlook	117
5.1	Summary	117
5.2	Conclusions	119
5.3	Outlook	121
	Bibliography	125
A	Appendix	133
A.1	Appendix Section 1	133
A.2	Appendix Section 2	134
A.3	Appendix Section 3	136
A.4	Appendix Section 4	139
