

Contents

1	Introduction — 1
2	Biology of cancer — 3
2.1	Tumorigenesis — 3
2.2	Metastasis — 7
2.2.1	Epithelial–mesenchymal transition — 7
2.2.2	Invasion and intravasation — 9
2.2.3	Stasis, adhesion, and extravasation — 10
2.2.4	Proliferation and growth at secondary sites — 11
2.3	Tumor metabolism — 11
2.4	Multimodal tumor therapy — 15
2.5	Diagnostic imaging modalities — 16
3	Biocompatible nanomaterials — 28
3.1	Plasmonic noble metal nanoparticles — 29
3.1.1	Plasmon resonance in noble metal nanostructures — 30
3.1.2	Synthesis routes for gold nanostructures — 35
3.2	Superparamagnetic iron oxide nanoparticles — 45
3.2.1	Synthesis routes for SPIONs — 47
3.3	Nanoheterostructures — 53
3.3.1	Multifunctional magneto–plasmonic nanoheterostructures — 53
3.4	Mesoporous silica nanostructures — 59
3.5	Luminescent semiconductor quantum dots — 63
3.6	Surface chemistry and functionalization — 77
3.6.1	Polymer coating — 79
3.6.2	Silica coating — 80
3.6.3	Bilayer coating — 85
3.6.4	Ligand exchange — 88
4	Cell response on nanoparticles — 93
4.1	Protein corona — 93
4.2	Cellular uptake machinery — 99
4.2.1	Cellular uptake pathways — 100
4.2.2	Effect of physicochemical properties on the cellular uptake — 122
4.3	Intracellular trafficking — 166
4.3.1	Endosomal network — 166
4.3.2	Transport of nanoparticles — 173
4.3.3	Endosomal escape — 183
4.3.4	Exocytosis — 197
4.4	Impact of nanoparticles on cell organelles — 206

VI — Contents

- 4.4.1 Cell organelles and their function — **206**
- 4.4.2 Changes in organelle function — **208**

- 5 Pharmacokinetics, pharmacodynamics, and nanotoxicology — 221**
 - 5.1 Administration routes of nanoparticles — **222**
 - 5.2 Pharmacokinetics of administration routes — **223**
 - 5.2.1 Intravenous injection — **223**
 - 5.2.2 Subcutaneous and intramuscular injection — **233**
 - 5.2.3 Dermal administration — **236**
 - 5.2.4 Inhalation — **240**
 - 5.2.5 Oral ingestion — **245**
 - 5.3 Nanotoxicology — **251**

- 6 Nanoparticles for diagnostics and therapy of cancer — 262**
 - 6.1 Tumor targeting — **262**
 - 6.1.1 Passive tumor targeting — **262**
 - 6.1.2 Active tumor targeting — **264**
 - 6.1.3 Magnetic tumor targeting — **265**
 - 6.2 Nanoparticle-based imaging techniques — **267**
 - 6.2.1 CT contrast agents — **267**
 - 6.2.2 MRI contrast agents — **269**
 - 6.2.3 Photoacoustic contrast agents — **273**
 - 6.3 Nanoparticle-based cancer therapy modalities — **276**
 - 6.3.1 Nanoparticle-enhanced radiotherapy and chemotherapy — **276**
 - 6.3.2 Magnetic hyperthermia — **319**

- Bibliography — 323**

- Index — 365**
