

Contents

1.	Introduction and Notes on Materials and Methods (M. Dvořák)	7
2.	Submicroscopic Structure and Ultracytochemistry of Segmenting Rat Ova (M. Dvořák and J. Šťastná)	8
2.1.	One-Cell Ovum	8
2.1.1.	Nucleus	9
2.1.2.	Cytoplasm	11
2.1.3.	Zona Pellucida	19
2.2.	Two-Cell Ovum	19
2.2.1.	Nucleus	19
2.2.2.	Cytoplasm	23
2.2.3.	Zona Pellucida	28
2.3.	Four-Cell Ovum	28
2.3.1.	Nucleus	28
2.3.2.	Cytoplasm	29
2.3.3.	Zona Pellucida	33
2.4.	Eight-Cell Ovum	33
2.4.1.	Nucleus	35
2.4.2.	Cytoplasm	37
2.4.3.	Zona Pellucida	43
2.5.	Morula	43
2.5.1.	Nucleus	43
2.5.2.	Cytoplasm	45
2.5.3.	Zona Pellucida	50
2.6.	Early Blastocyst	50
2.6.1.	Embryoblast Cells	52
2.6.2.	Trophoblast Cells	57
2.6.3.	Zona Pellucida	62
2.7.	Late Blastocyst	62
2.7.1.	Embryoblast Cells	64
2.7.2.	Trophoblast Cells	68
2.7.3.	Zona Pellucida	73
2.8.	Conclusion	73
3.	Morphologic and Functional Relationship During the Cleavage of Mammalian Ova	74
3.1.	Surface Coats and Cell Contacts of the Ovum, Their Differentiation and Function During Cleavage (M. Dvořák)	74
3.1.1.	Some Remarks on the Structure and Function of the Cell Membrane, the Glycocalyx, and the Zona Pellucida	75
3.1.2.	Morphology of the Ovum Surface During Cleavage	76
3.1.3.	Development of Contacts and Junctional Structures Between the Cells of the Segmenting Ovum and the Blastocyst	77

3.1.4.	Structure of the Zona Pellucida During Cleavage	78
3.1.5.	Exchange of Substances Between the Segmenting Ovum and the Environment of the Tuba Uterina and the Uterus	79
3.1.6.	Conclusion	81
3.2.	Nucleus, Nucleoprotein Structures, and Proteosynthesis in the Segmenting Ova (P. Trávník)	82
3.2.1.	Ultrastructure of the Nucleus, Ribosomes, and Granular Endoplasmic Reticulum in the Segmenting Mammalian Ova	82
3.2.2.	Synthesis of DNA, RNA, and Proteins in the Segmenting Mammalian Ova .	87
3.2.3.	Conclusion	90
3.3.	Mitochondria and Energetic Metabolism of Segmenting Ova (D. Horký) . .	91
3.3.1.	Principles of Energetic Metabolism of the Cell	91
3.3.2.	Changes in Mitochondria During the Cleavage of the Mammalian Ovum . .	92
3.3.3.	Energetic Metabolism of Mammalian Ovum	94
3.3.4.	Conclusion	96
3.4.	Lysosomes and Their Importance for the Differentiation and Nutrition of the Segmenting Ovum (J. Šťastná)	97
3.4.1.	Intracellular Hydrolysis and Lysosomal Conception	97
3.4.2.	Forms and Representation of Lysosomes in the Segmenting Ovum	98
3.4.3.	Conclusion	104
3.5.	Occurrence of Stored Material and Its Metabolism in Segmenting Ova (S. Čech)	104
3.5.1.	Glycogen	105
3.5.2.	Lipids	109
3.5.3.	Proteins	111
3.5.4.	Conclusion	111
