Preface	vii
Introduction	xiii
Definition of Sudden Death	xv
1. Personal Studies	1
Comparative Pathological Study in Different Clinical Patterns of Fatal Ischemic Heart Disease	1
Other Pertinent Personal Studies	10
Findings in Our Comparative Pathological Study	12
Pertinent Findings From Other Personal Studies	35
2. Sudden Coronary Death—Findings in the Literature	39
Gender and Age Distribution	40
Coronary Atherosclerosis	40
Acute Coronary Thrombosis	41
Acute Myocardial Necrosis	43
Type of Coronary Distribution	43
Collaterals	43
Heart Weight	44
Morphologic Variables of the Atherosclerotic Plaque	44
Intramural Vascular Lesions	45
Conduction System	47
Sudden Coronary Death and Exercise	49
3. Natural History of Ischemic Heart Disease	55
Natural History of the Atherosclerotic Plaque— Blood Vessels and Hemodynamics	56
Physiological and Pathological Changes in Human Extramural Coronary Arteries	56
Natural History of Coronary Occlusion in Ischemic Heart Disease	64
Natural History of Collaterals	67
Natural History of Myocardial Cell Necrosis	74
Other Morphologic Variables in the Natural History of Sudden Death and Ischemic Heart Disease	83
Clinical Types of Sudden Cardiac Arrest	85
Myocardial Morphology in Ventricular Fibrillation	88
Silent Ischemic Heart Disease	89

4. Functional Significance of Structural Changes in Sudden Death and Ischemic Heart Disease	91
Collaterals	91
Coronary Stenosis/Occlusion	98
Different Forms of Myocardial Necrosis	103
Lesions of Intramyocardial or Intramural Coronary Arterial Vessels (Small Vessel Disease)	104
Findings in Sudden and Unexpected Coronary Death	105
5. Pathologic Background and Pathogenesis of Sudden Death/ Ischemic Heart Disease: A Personal Viewpoint	107
Coronary Atherosclerotic Plaque Growth	107
Coronary Stenosis and Ischemia	109
Collateral Function	109
Plaque Rupture	110
Coronary Occlusive Thrombosis	111
Myocardial Damage	118
Small Vessel Disease	119
A Comparison of Sudden Coronary Death vs Myocardial Infarct vs Unstable Angina	122
Cause and Pathogenesis in Sudden Death/Ischemic Heart Disease— Alternate Hypotheses	126
Is “Ischemic” or “Coronary” Heart Disease the Correct Definition?	129
6. Summary	131
7. Illustrations	135
