

List of Figures **I**

1	Introduction	1
1.1	Motivation	1
1.2	Summary of Chapter 2	6
1.3	Summary of Chapter 3	16
1.4	Summary of Chapter 4	23
1.5	Acknowledgments	29
2	Optimization in General Markets under a Shortfall Risk Constraint	31
2.1	Preliminaries	31
2.2	General model	32
2.2.1	Financial market	33
2.2.2	Utility functions	35
2.2.3	Risk measures	40
2.2.4	Optimization problem	46
2.3	Solution in incomplete markets	51
2.3.1	Conditions on the asymptotic elasticity	51
2.3.2	Main theorem	55
2.4	Solution in complete markets	63
2.4.1	Main theorem	64
2.4.2	Extensions in the Black-Scholes market	66
2.4.3	Examples	70
2.5	Concluding remarks	74

3	Optimization under a Risk Constraint and Incomplete Information	77
3.1	Preliminaries	77
3.2	General model	78
3.2.1	Generated filtrations	81
3.2.2	Optimization problem	83
3.3	Solution of the optimization problem under different information . . .	85
3.3.1	The initially enlarged filtrations	85
3.3.2	The progressively enlarged Brownian filtrations	104
3.3.3	The price process filtration	118
3.3.4	Utility indifference value	125
3.4	Concluding remarks	127
4	Green Capital Requirements, ESG Rating Uncertainty, And Greenwash-	
	ing	129
4.1	Preliminaries	129
4.2	Model	130
4.2.1	Market participants	130
4.2.2	Imperfect information	134
4.3	Results	136
4.3.1	Over- and underestimating of firm types	137
4.3.2	The effect of green- and brownwashing	140
4.3.3	The effect of jumps in ESG ratings	149
4.3.4	Optimal behavior of the regulator	151
4.4	Extensions	157
4.5	Concluding remarks	158
A	Publication Details	161
B	Supplementary Material for Chapter 2	165
B.1	Optimal investment and consumption	165
C	Supplementary Material for Chapter 3	171
C.1	Existence of Lagrange multipliers	171

D	Supplementary Material for Chapter 4	183
D.1	Proofs	183
D.2	Extra-ordinary cases	191
D.3	Funding to firms depending on the size of equity	195
D.4	Common capital requirement function	199
D.5	Capital requirements as step functions	208
	Bibliography	218
