

Contents

Gloria M. D'Amaral, Hannah R. Jessop, and Tricia Breen Carmichael

Beyond Moore's law to more than Moore in stretchable electronics — 1

Audithya Nyayachavadi and Simon Rondeau-Gagné

Cross-linking strategies for π -conjugated polymers in organic electronics — 41

Edward J. Barron III and Michael D. Bartlett

Soft robotics: a futuristic extension of stretchable electronics technology — 73

Young Min Song, Sehui Chang, and Ji-Eun Yeo

Stretchable photodetectors and image sensors — 105

Hyun-Joong Chung, Rosmi Abraham, Ozge Akca Zengin, Rayan A. M. Basodan, Shima Jalali, Jueun Lee, and Zhitong Lin

Engineering applications of materials and structures derived from stretchable electronics — 135

Tricia Breen Carmichael and Hyun-Joong Chung

Stretchable electronics: the next generation of emerging applications — 165

Abbreviations — 169

Mathematical symbols — 171

Index — 173
