

Contents

Introduction — V

Yu Deng, Hans-Jürgen Fischer, and Bernd Hofmann

- 1 The degree of ill-posedness for some composition governed by the Cesàro operator — 1**

Elena Beretta, M. Cristina Cerutti, Dario Pierotti, and Xinran You

- 2 Some remarks on a nonlinear model arising from cardiac electrophysiology — 15**

Andrea Aspri and Sonia Foschiatti

- 3 A logarithmic stability estimate for anisotropic polyhedral inclusions — 29**

Clemens Kirisits, Kemal Raik, Otmar Scherzer, Christina Strohmer, and Jikai Yan

- 4 Using the transport of intensity and the transport of phase equation for phase retrieval — 53**

Elizabeth Newman, Jack Michael Solomon, and Matthias Chung

- 5 Image reconstructions using sparse dictionary representations and implicit, nonnegative mappings — 69**

Alexandra Borkowski and Martin Burger

- 6 Motion corrected image reconstruction — 97**

Henning U. Voss

- 7 MRI pulse wave analysis of the human brain — 135**

Lukas Weissinger, Simon Hubmer, Bernadett Stadler, and Ronny Ramlau

- 8 Singular value and frame decomposition-based reconstruction for atmospheric tomography — 151**
