

Table of Contents

1	Fundamental Principles	
1.1	Technical Principles of Diagnostic Ultrasound	1
1.1.1	Physical Factors Affecting the Ultrasound Scan (B-mode Scan)	1
1.1.2	Basic Physics of Doppler Ultrasound	2
1.1.2.1	Continuous Wave Doppler Ultrasound	3
1.1.2.2	Pulsed Wave Doppler Ultrasound/Duplex Ultrasound	3
1.1.2.3	Frequency Processing	4
1.1.2.4	Blood Flow Measurement	5
1.1.3	Physical Principles of Color-coded Duplex Ultrasound	8
1.1.3.1	Velocity Mode	8
1.1.3.2	Power (Angio) Mode	9
1.1.3.3	B-flow Mode	10
1.1.3.4	Intravascular Ultrasound (IVUS)	10
1.1.4	Factors Affecting (Color) Duplex Scanning – Pitfalls	11
1.1.4.1	Scattering, Acoustic Shadowing	11
1.1.4.2	Mirror Artifacts	11
1.1.4.3	Maximum Flow Velocity Detectable – Pulse Repetition Frequency	11
1.1.4.4	Minimum Flow Velocity Detectable – Wall Filter, Frame Rate	13
1.1.4.5	Transmit and Receive Gain	14
1.1.4.6	Doppler Angle	15
1.1.4.7	Physical Limitations of Color Duplex Ultrasound	16
1.1.5	Ultrasound Contrast Media	16
1.2	Hemodynamic Principles	18
1.2.1	Laminar Flow	18
1.2.2	Pulsatile Flow	20
1.2.2.1	Low-resistance Flow	20
1.2.2.2	High-resistance Flow	20
1.2.3	Determining the Degree of Stenosis	21
1.3	Instrument Settings	25
2	Peripheral Arteries	
2.1	Pelvic and Leg Arteries	29
2.1.1	Vascular Anatomy	29
2.1.1.1	Pelvic Arteries	29
2.1.1.2	Leg Arteries	29
2.1.2	Examination Protocol and Technique	31
2.1.2.1	Pelvic Arteries	31
2.1.2.2	Leg Arteries	32
2.1.3	Specific Aspects of the Examination from the Angiographer's and Vascular Surgeon's Perspective	33
2.1.4	Interpretation and Documentation	35
2.1.5	Normal Duplex Ultrasound of Pelvic and Leg Arteries	35
2.1.6	Abnormal Findings – Clinically Oriented Ultrasound Examination, Ultrasound Findings and Measurement Parameters, Diagnostic Role	36
2.1.6.1	Atherosclerotic Occlusive Disease	36

2.1.6.1.1	Pelvic Arteries	37
2.1.6.1.2	Leg Arteries	38
2.1.6.2	Arterial Embolism	43
2.1.6.3	Aneurysm	43
2.1.6.4	Rare Stenosing Arterial Diseases of Nonatherosclerotic Origin	44
2.1.6.4.1	Cystic Adventitial Disease	45
2.1.6.4.2	Popliteal Entrapment Syndrome	45
2.1.6.4.3	Raynaud's Disease	47
2.1.6.4.4	Paraneoplastic Disturbance of Acral Perfusion	48
2.1.6.4.5	Buerger's Disease	48
2.1.6.4.6	Inflammatory Conditions	48
2.1.7	Follow-up after Vascular Repair	48
2.1.7.1	Thromboendarterectomy (TEA)	49
2.1.7.2	Percutaneous Transluminal Angioplasty and Stent Implantation	49
2.1.7.3	Bypass Procedures	49
2.1.7.4	Ultrasound Vein Mapping prior to Peripheral Bypass Surgery	52
2.1.8	Role of (Color) Duplex Ultrasound Compared to other Modalities – Problems and Pitfalls	52
2.2	Arm Arteries	55
2.2.1	Vascular Anatomy	55
2.2.2	Examination Protocol and Technique	55
2.2.3	Clinical Role of Duplex Ultrasound	56
2.2.3.1	Atherosclerosis	56
2.2.3.2	Compression Syndromes	56
2.2.4	Documentation	56
2.2.5	Normal Findings	57
2.2.6	Abnormal Findings, Duplex Ultrasound Measurements, and Clinical Role	57
2.2.6.1	Atherosclerosis	57
2.2.6.2	Compression Syndromes	57
2.3	Atlas	60
3	Peripheral Veins	
3.1	Pelvic and Leg Veins	111
3.1.1	Vascular Anatomy	111
3.1.2	Examination Protocol	113
3.1.2.1	Thrombosis	113
3.1.2.2	Chronic Venous Insufficiency and Varicosis	115
3.1.3	Normal Findings	118
3.1.4	Documentation	119
3.1.4.1	Deep Vein Thrombosis of the Leg	119
3.1.4.2	Chronic Venous Insufficiency and Varicosis	119
3.1.5	Clinical Role of Duplex Ultrasound	119
3.1.5.1	Thrombosis and Postthrombotic Syndrome	119
3.1.5.2	Varicosis	123
3.1.6	Duplex Ultrasound – Diagnostic Criteria, Indications, and Role	124
3.1.6.1	Thrombosis	124
3.1.6.2	Chronic Venous Insufficiency	128
3.1.6.3	Varicosis	130
3.1.7	Rare Venous Abnormalities	131
3.1.7.1	Venous Aneurysm	131
3.1.7.2	Tumors of the Venous Wall	131
3.1.7.3	Venous Compression	132
3.1.8	Vein Mapping	132
3.1.9	Diagnostic Role of Ultrasound	132
3.1.9.1	Thrombosis	132
3.1.9.2	Chronic Venous Insufficiency	136
3.1.9.3	Varicosis	137

3.2	Arm Veins and Jugular Vein	138
3.2.1	Vascular Anatomy	138
3.2.2	Examination Protocol and Technique	138
3.2.3	Normal Findings	139
3.2.4	Documentation	139
3.2.5	Clinical Role	139
3.2.6	Duplex Ultrasound Findings and their Diagnostic Significance	139
3.2.7	Diagnostic Role of Duplex Ultrasound Compared with other Modalities	140
3.3	Atlas	142
4	Shunts	
4.1	Spontaneous versus Therapeutic Shunts	189
4.2	Examination Protocol, Technique, and Diagnostic Role	190
4.2.1	Congenital and Acquired Fistulae	190
4.2.2	Hemodialysis Shunts	191
4.3	Typical Shunt-related Changes of the Doppler Waveform	192
4.4	Determination of Flow Rate	192
4.5	Documentation	193
4.6	Abnormal Findings (Dialysis Problems)	193
4.6.1	Shunt Stenosis	193
4.6.2	Peripheral Ischemia	194
4.6.3	Shunt Aneurysm	195
4.6.4	Excessive Shunt Flow	195
4.7	Diagnostic Role of Duplex Ultrasound Compared with other Modalities	195
4.8	Atlas	198
5	Extracranial Arteries Supplying the Brain	
5.1	Normal Vascular Anatomy and Important Variants	207
5.2	Examination Technique and Protocol	209
5.2.1	Carotid Arteries	209
5.2.2	Vertebral Arteries	211
5.3	Documentation	211
5.4	Normal Findings	211
5.4.1	Carotid Arteries	211
5.4.2	Vertebral Arteries	212
5.5	Clinical Role of Duplex Ultrasound	212
5.5.1	Carotid Arteries	212
5.5.1.1	Defining the Degree of Stenosis	215
5.5.1.2	Plaque Morphology	215
5.5.2	Vertebral Arteries	216
5.6	Ultrasound Criteria, Measurement Parameters, and Diagnostic Role	217
5.6.1	Carotid Arteries	217
5.6.1.1	Plaque Evaluation and Morphology	217
5.6.1.2	Quantification of Stenosis	219
5.6.1.3	Occlusion	223
5.6.1.4	Postoperative Follow-up	223
5.6.2	Vertebral Arteries	225
5.6.2.1	Stenosis	225
5.6.2.2	Occlusion	225
5.6.2.3	Subclavian Steal Syndrome	225
5.7	Diagnosis of Brain Death	226
5.8	Rare (Nonatherosclerotic) Vascular Diseases of the Carotid Territory	227
5.8.1	Dissection	227
5.8.2	Inflammatory Vascular Disease (Takayasu's Arteritis)	227
5.8.3	Aneurysm	228
5.8.4	Arteriovenous Fistula	228
5.8.5	Tumorous Vessel Compression, Carotid Body Tumor	228

5.9	Diagnostic Role of Duplex Ultrasound in Evaluating the Cerebral Arteries	228
5.10	Atlas	231
6	Visceral and Retroperitoneal Vessels	
6.1	Abdominal Aorta, Visceral and Renal Arteries	253
6.1.1	Vascular Anatomy	253
6.1.1.1	Aorta	253
6.1.1.2	Visceral Arteries	253
6.1.1.3	Renal Arteries	254
6.1.2	Examination Protocol and Technique	254
6.1.2.1	Aorta	254
6.1.2.2	Visceral Arteries	254
6.1.2.3	Renal Arteries	255
6.1.3	Normal Findings	256
6.1.3.1	Aorta	256
6.1.3.2	Visceral Arteries	256
6.1.3.3	Renal Arteries	257
6.1.4	Interpretation and Documentation	258
6.1.5	Clinical Role of Duplex Ultrasound	258
6.1.5.1	Aorta	258
6.1.5.2	Visceral Arteries	259
6.1.5.3	Renal Arteries	260
6.1.6	Measurement Parameters, Diagnostic Criteria, and Role of Ultrasound	261
6.1.6.1	Renal Arteries	261
6.1.6.2	Visceral Arteries	264
6.1.6.3	Aorta	268
6.2	Visceral and Retroperitoneal Veins	270
6.2.1	Vascular Anatomy	270
6.2.1.1	Vena Cava	270
6.2.1.2	Renal Veins	270
6.2.1.3	Portal Venous System and Hepatic Veins	270
6.2.2	Examination Technique	271
6.2.2.1	Vena Cava	271
6.2.2.2	Renal Veins	271
6.2.2.3	Portal Vein and Superior Mesenteric Vein	271
6.2.3	Normal Findings	272
6.2.3.1	Vena Cava and Renal Veins	272
6.2.3.2	Portal Venous System	272
6.2.4	Documentation	272
6.2.5	Abnormal Ultrasound Findings, Measurement Parameters, and Diagnostic Role	272
6.2.5.1	Vena Cava	272
6.2.5.2	Renal Veins	273
6.2.5.3	Superior Mesenteric Vein	273
6.2.5.4	Portal and Hepatic Veins	274
6.3	Atlas	278
7	Penile and Scrotal Vessels	
7.1	Vascular Anatomy	319
7.1.1	Penile Vessels	319
7.1.2	Scrotal Vessels	319
7.2	Examination Technique	320
7.2.1	Erectile Dysfunction	320
7.2.2	Scrotal Vessels	321
7.3	Normal Findings	321
7.3.1	Penile Vessels	321
7.3.2	Scrotal Vessels	321

7.4	Documentation	321
7.5	Clinical Role of Duplex Ultrasound	321
7.5.1	Erectile Dysfunction	321
7.5.2	Acute Scrotum	322
7.5.3	Varicocele	322
7.6	Abnormal Findings: Role of Duplex Ultrasound Parameters	323
7.6.1	Erectile Dysfunction	323
7.6.2	Acute Scrotum	323
7.6.3	Varicocele	324
7.7	Atlas	325
