## Keynote Speakers

|                                                                                        |    |
|----------------------------------------------------------------------------------------|----|
| People versus Information: The Evolution of Mobile Technology .....                    | 1  |
| <i>Richard Harper</i>                                                                  |    |
| The Zen of Everyday Encounters: Spontaneous Interaction<br>in Ubiquitous Systems ..... | 15 |
| <i>Tim Kindberg</i>                                                                    |    |

## Studying Mobile Users in Their Natural Contexts

|                                                                                                             |    |
|-------------------------------------------------------------------------------------------------------------|----|
| Understanding Mobile Contexts .....                                                                         | 17 |
| <i>Sakari Tamminen, Antti Oulasvirta, Kalle Toiskallio,<br/>and Anu Kankainen</i>                           |    |
| Motorcyclists Using Hocman - Field Trials on Mobile Interaction .....                                       | 32 |
| <i>Mattias Esbjörnsson, Oskar Juhlin, and Mattias Östergren</i>                                             |    |
| Connecting Remote Visits and Design Environment:<br>User Needs and Prototypes for Architecture Design ..... | 45 |
| <i>Giulio Iacucci, Antti Juustila, Kari Kuutti, Pekka Pehkonen,<br/>and Arto Ylisaukko-oja</i>              |    |
| Everyday Wearable Computer Use:<br>A Case Study of an Expert User .....                                     | 61 |
| <i>Kent Lyons</i>                                                                                           |    |

## Input Techniques for Mobile Devices

|                                                                                                           |     |
|-----------------------------------------------------------------------------------------------------------|-----|
| Using Mobile Keypads with Limited Visual Feedback: Implications to<br>Handheld and Wearable Devices ..... | 76  |
| <i>Mika Silfverberg</i>                                                                                   |     |
| Time-Out in Mobile Text Input: The Effects of Learning and Feedback .....                                 | 91  |
| <i>Juha Marila and Sami Ronkainen</i>                                                                     |     |
| SyncTap: An Interaction Technique for Mobile Networking .....                                             | 104 |
| <i>Jun Rekimoto, Yuji Ayatsuka, and Michimune Kohn</i>                                                    |     |

## **Location-Aware Guides and Planners**

|                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------|-----|
| Experiments with Multi-modal Interfaces<br>in a Context-Aware City Guide .....                           | 116 |
| <i>Christian Bornträger, Keith Cheverst, Nigel Davies, Alan Dix,<br/>Adrian Friday, and Jochen Seitz</i> |     |
| Design Criteria for Location-Aware, Indoor, PDA Applications .....                                       | 131 |
| <i>Carmine Ciavarella and Fabio Paternò</i>                                                              |     |
| The Design and Evaluation<br>of a Mobile Location-Aware Handheld Event Planner .....                     | 145 |
| <i>Rachel Fithian, Giovanni Iachello, Jehan Moghazy, Zachary Pousman,<br/>and John Stasko</i>            |     |

## **Bringing Mobile Services to Groups in Workplaces**

|                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------|-----|
| Supporting Local Mobility in Healthcare by Application Roaming<br>Among Heterogeneous Devices .....             | 161 |
| <i>Jakob Bardram, Thomas A. K. Kjær, and Christina Nielsen</i>                                                  |     |
| Aligning Work Practices and Mobile Technologies: Groupware Design<br>for Loosely Coupled Mobile Groups .....    | 177 |
| <i>David Pinelle, Jeff Dyck, and Carl Gutwin</i>                                                                |     |
| Encouraging Face-to-Face Collaborative Learning<br>through the Use of Handheld Computers in the Classroom ..... | 193 |
| <i>Gustavo Zurita, Miguel Nussbaum, and Mike Shaples</i>                                                        |     |

## **Mobile Gaming**

|                                                                                                                                     |     |
|-------------------------------------------------------------------------------------------------------------------------------------|-----|
| Human Pacman: A Mobile Entertainment System<br>with Ubiquitous Computing and Tangible Interaction<br>over a Wide Outdoor Area ..... | 209 |
| <i>Adrian David Cheok, Siew Wan Fong, Kok Hwee Goh, Xubo Yang,<br/>Wei Liu, Farzam Farzbiz, and Yu Li</i>                           |     |
| OpenTrek: A Platform for Developing Interactive Networked Games<br>on Mobile Devices .....                                          | 224 |
| <i>Johan Sanneblad and Lars Erik Holmquist</i>                                                                                      |     |

## **Tools and Frameworks for Mobile Interface Design and Generation**

|                                                                                                 |     |
|-------------------------------------------------------------------------------------------------|-----|
| Supporting Efficient Design of Mobile HCI .....                                                 | 241 |
| <i>Francesco Bellotti, Riccardo Berta, Alessandro De Gloria,<br/>and Massimiliano Margarone</i> |     |

|                                                                                                                   |     |
|-------------------------------------------------------------------------------------------------------------------|-----|
| Dygames: Dynamically Generating Interfaces<br>for Mobile Computing Devices and Embedded Systems .....             | 256 |
| <i>Karin Coninx, Kris Luyten, Chris Vandervelpen, Jan Van den Bergh,<br/>and Bert Creemers</i>                    |     |
| Online Transcoding of Web Pages for Mobile Devices .....                                                          | 271 |
| <i>Somnath Banerjee, Arobinda Gupta, and Anupam Basu</i>                                                          |     |
| Multi-modal Framework to Support Users with Special Needs<br>in Interaction with Public Information Systems ..... | 286 |
| <i>Kai Richter and Marita Enge</i>                                                                                |     |

## Usability and HCI Research Methods

|                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------|-----|
| Usability Evaluations for Multi-device Application Development Three<br>Example Studies .....       | 302 |
| <i>Verena Giller, Rudolf Melcher, Johann Schrammel, Reinhard Sefelin,<br/>and Manfred Tscheligi</i> |     |
| A Review of Mobile HCI Research Methods .....                                                       | 317 |
| <i>Jesper Kjeldskov and Connor Graham</i>                                                           |     |

## Short Talks

|                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------|-----|
| Exploring the Utility of Remote Messaging<br>and Situated Office Door Displays .....                   | 336 |
| <i>Keith Cheverst, Alan Dix, Dan Fitton, Adrian Friday,<br/>and Mark Rouncefield</i>                   |     |
| TimeMachine Oulu –<br>Dynamic Creation of Cultural-Spatio-Temporal Models<br>as a Mobile Service ..... | 342 |
| <i>Jaakko Peltonen, Mark Ollila, and Timo Ojala</i>                                                    |     |
| Awase-E: Image-Based Authentication<br>for Mobile Phones Using User's Favorite Images .....            | 347 |
| <i>Tetsuji Takada and Hideki Koike</i>                                                                 |     |
| Older Users' Requirements for Location<br>Based Services and Mobile Phones .....                       | 352 |
| <i>Zaheer Osman, Martin Maguire, and Mikko Tarkiainen</i>                                              |     |
| GentleGuide: An Exploration of Haptic Output<br>for Indoors Pedestrian Guidance .....                  | 358 |
| <i>S. Bosman, B. Groenendaal, J.W. Findlater, T. Visser, M. de Graaf,<br/>and P. Markopoulos</i>       |     |
| Sound Visualization and Retrieval Technique<br>for Assisting Hearing Memory of Patrol Worker .....     | 363 |
| <i>Fujio Tsutsumi</i>                                                                                  |     |

|                                                                                                                       |     |
|-----------------------------------------------------------------------------------------------------------------------|-----|
| Constructing Public Discourse with Ethnographic/SMS "Texts" .....                                                     | 368 |
| <i>Mike Ananny, Kathleen Biddick, and Carol Strohecker</i>                                                            |     |
| A Customer Satisfaction Evaluation Model for Mobile Internet Services ...                                             | 374 |
| <i>Hee-Sok Park and Seung J. Noh</i>                                                                                  |     |
| Designing Adaptive Mobile Applications:<br>Abstract Components and Composite Behaviors .....                          | 378 |
| <i>Manuel Prieto and Miguel A. Sicilia</i>                                                                            |     |
| Cinematic Techniques for Mobile Presentations .....                                                                   | 384 |
| <i>M. Zancanaro, O. Stock, and I. Alfaro</i>                                                                          |     |
| Using a Mobile Device to Vary the Pace of Search .....                                                                | 390 |
| <i>Matt Jones, Preeti Jain, George Buchanan, and Gary Marsden</i>                                                     |     |
| Designing Advanced Mobile Applications Examples<br>of UMTS Trial Applications .....                                   | 395 |
| <i>Fritjof Kaiser, Volker Gruhn, and Heinz Bergmeier</i>                                                              |     |
| iCAMS2: Developing a Mobile Communication Tool<br>Using Location Information and Schedule Information with J2ME ..... | 400 |
| <i>Yasuto Nakanishi, Shouichi Kumazawa,<br/>Takayuki Tsuji, and Katsuya Hakozaiki</i>                                 |     |
| Understanding and Modeling Physical Environments<br>for Mobile Location Aware Information Services .....              | 405 |
| <i>Jeni Paay</i>                                                                                                      |     |
| SmartLibrary - Location-Aware Mobile Library Service .....                                                            | 411 |
| <i>Markus Aittola, Tapio Ryhänen, and Timo Ojala</i>                                                                  |     |
| <br><b>Posters</b>                                                                                                    |     |
| The Human Interface in Mobile Applications .....                                                                      | 417 |
| <i>Lynne Baillie and Oliver Jorns</i>                                                                                 |     |
| I'm Here!: A Wearable Object Remembrance Support System .....                                                         | 422 |
| <i>Takahiro Ueoka, Tatsuyuki Kawamura, Yasuyuki Kono,<br/>and Masatsugu Kidode</i>                                    |     |
| Towards a Framework to Develop Plastic User Interfaces .....                                                          | 428 |
| <i>Montserrat Sendín, Jesús Lorés, Francisco Montero, and Víctor López</i>                                            |     |
| Context-Aware Interaction in a Mobile Environment .....                                                               | 434 |
| <i>Daniela Fogli, Fabio Pittarello, Augusto Celentano, and Piero Mussio</i>                                           |     |
| Platform Awareness in Dynamic Web User Interfaces Migration .....                                                     | 440 |
| <i>Renata Bandelloni and Fabio Paternò</i>                                                                            |     |
| User Needs for Development of Context Dependent Devices<br>in Mobile Home Care .....                                  | 446 |
| <i>I. Scandurra, M. Hägglund, N. Johansson, B. Sandblad, and S. Koch</i>                                              |     |

|                                                                                     |            |
|-------------------------------------------------------------------------------------|------------|
| Context Information in Mobile Telephony .....                                       | 451        |
| <i>Louise Barkhuus</i>                                                              |            |
| Component Model and Programming:                                                    |            |
| A First Step to Manage Human Computer Interaction Adaptation .....                  | 456        |
| <i>Anne-Marie Dery-Pinna, J  r  my Fierstone, and Emmanuel Picard</i>               |            |
| Mobile Tele-instruction Using Interactive Augmented Reality .....                   | 461        |
| <i>Jun Park</i>                                                                     |            |
| A Study on the Predicate Prediction                                                 |            |
| Using Symbols in Augmentative and Alternative Communication System ..               | 466        |
