

Table of Contents

I Communication Models

Programming Multiagent Systems without Programming Agents	1
<i>Munindar P. Singh and Amit K. Chopra</i>	
Elements of a Business-Level Architecture for Multiagent Systems	15
<i>Amit K. Chopra and Munindar P. Singh</i>	
A Computational Semantics for Communicating Rational Agents Based on Mental Models	31
<i>Koen V. Hindriks and M. Birna van Riemsdijk</i>	

II Formal Models

Multi-Agent Systems: Modeling and Verification Using Hybrid Automata	49
<i>Ammar Mohammed and Ulrich Furbach</i>	
Probabilistic Behavioural State Machines	67
<i>Peter Novák</i>	
Golog Speaks the BDI Language	82
<i>Sebastian Sardina and Yves Lespérance</i>	

III Organizations and Environments

A Middleware for Modeling Organizations and Roles in Jade	100
<i>Matteo Baldoni, Guido Boella, Valerio Genovese, Andrea Mugnaini, Roberto Grenna, and Leendert van der Torre</i>	
An Open Architecture for Service-Oriented Virtual Organizations	118
<i>Adriana Giret, Vicente Julián, Miguel Rebollo, Estefanía Argente, Carlos Carrascosa, and Vincente Botti</i>	
Formalising the Environment in MAS Programming: A Formal Model for Artifact-Based Environments	133
<i>Alessandro Ricci, Mirko Viroli, and Michele Piunti</i>	

IV Analysis and Debugging

Debugging BDI-Based Multi-Agent Programs	151
<i>Mehdi Dastani, Jaap Brandsema, Amco Dubel, and John-Jules Ch. Meyer</i>	
Space-Time Diagram Generation for Profiling Multi Agent Systems	170
<i>Dinh Doan Van Bien, David Lillis, and Rem W. Collier</i>	
Infrastructure for Forensic Analysis of Multi-Agent Based Simulations	185
<i>Emilio Serrano, Juan A. Botia, and Jose M. Cadenas</i>	

V Agent Architectures

Representing Long-Term and Interest BDI Goals	201
<i>Lars Braubach and Alexander Pokahr</i>	
Introducing Relevance Awareness in BDI Agents	219
<i>Emiliano Lorini and Michele Piunti</i>	
Modularity and Compositionality in Jason	237
<i>Neil Madden and Brian Logan</i>	

VI Applications

A MultiAgent System for Monitoring Boats in Marine Reserves	254
<i>Giuliano Armano and Eloisa Vargiu</i>	
Agent-Oriented Control in Real-Time Computer Games	266
<i>Tristan M. Behrens</i>	
Author Index	285
