## Parallel and Distributed Computing

|                                                                                                                                                                            |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| An Overview of High Performance Computing and Challenges for the Future . . . . .                                                                                          | 1  |
| <i>Jack Dongarra</i>                                                                                                                                                       |    |
| Parallelization of Sphere-Decoding Methods . . . . .                                                                                                                       | 2  |
| <i>Rafael A. Trujillo, Antonio M. Vidal, Víctor M. García, and Alberto González</i>                                                                                        |    |
| Improving the Performance of a Verified Linear System Solver Using Optimized Libraries and Parallel Computation . . . . .                                                  | 13 |
| <i>Mariana Kolberg, Gerd Bohlender, and Dalcidio Claudio</i>                                                                                                               |    |
| Parallelisation of the CFD Code of a CFD-NWP Coupled System for the Simulation of Atmospheric Flows over Complex Terrain . . . . .                                         | 27 |
| <i>Fernando A. Castro, Castro M.P. Silva Santos, and José M.L.M. Palma</i>                                                                                                 |    |
| High Performance Computing for Eigenvalue Solver in Density-Matrix Renormalization Group Method: Parallelization of the Hamiltonian Matrix-Vector Multiplication . . . . . | 39 |
| <i>Susumu Yamada, Masahiko Okumura, and Masahiko Machida</i>                                                                                                               |    |
| Tunable Parallel Experiments in a GridRPC Framework: Application to Linear Solvers . . . . .                                                                               | 46 |
| <i>Yves Caniou, Jean-Sébastien Gay, and Pierre Ramet</i>                                                                                                                   |    |

## Cluster and Grid Computing

|                                                                                                         |    |
|---------------------------------------------------------------------------------------------------------|----|
| The Rise of the Commodity Vectors . . . . .                                                             | 53 |
| <i>Satoshi Matsuoka</i>                                                                                 |    |
| MOPS – A Morphodynamical Prediction System on Cluster Computers . . . . .                               | 63 |
| <i>Hartmut Kapitza</i>                                                                                  |    |
| Implementing a Parallel NetCDF Interface for Seamless Remote I/O Using Multi-dimensional Data . . . . . | 69 |
| <i>Yuichi Tsujita</i>                                                                                   |    |
| Vectorized AES Core for High-throughput Secure Environments . . . . .                                   | 83 |
| <i>Miquel Pericàs, Ricardo Chaves, Georgi N. Gaydadjiev, Stamatis Vassiliadis, and Mateo Valero</i>     |    |

|                                                                                           |     |
|-------------------------------------------------------------------------------------------|-----|
| A Matrix Inversion Method with YML/OmniRPC on a Large Scale Platform .....                | 95  |
| <i>Marime Hugues and Serge G. Petiton</i>                                                 |     |
| Can We Connect Existing Production Grids into a World Wide Grid? .....                    | 109 |
| <i>Peter Kacsuk, Attila Kertesz, and Tamas Kiss</i>                                       |     |
| A List Scheduling Algorithm for Scheduling Multi-user Jobs on Clusters .....              | 123 |
| <i>Jorge Barbosa and António P. Monteiro</i>                                              |     |
| Data Locality Aware Strategy for Two-Phase Collective I/O .....                           | 137 |
| <i>Rosa Filgueira, David E. Singh, Juan C. Pichel, Florin Isaila, and Jesús Carretero</i> |     |

**Problem Solving Environment and Data Centric**

|                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------|-----|
| A Grid-Aware Web Portal with Advanced Service Trading for Linear Algebra Calculations .....                               | 150 |
| <i>Hrachya Atsatryan, Vladimir Sahakyan, Yuri Shoukouryan, Michel Daydé, Aurelie Hurault, Marc Pantel, and Eddy Caron</i> |     |
| Resource Matching in Non-dedicated Multiclustere Environments .....                                                       | 160 |
| <i>Josep Lluís Lérida, Francesc Solsona, Francesc Giné, Jose Ramon García, and Porfidio Hernández</i>                     |     |
| A Parallel Incremental Learning Algorithm for Neural Networks with Fault Tolerance .....                                  | 174 |
| <i>Jacques M. Bahi, Sylvain Contassot-Vivier, Marc Sauget, and Aurélien Vasseur</i>                                       |     |
| High-Performance Query Processing of a Real-World OLAP Database with ParGRES .....                                        | 188 |
| <i>Melissa Paes, Alexandre A.B. Lima, Patrick Valdúriez, and Marta Mattoso</i>                                            |     |
| Improving Search Engines Performance on Multithreading Processors ...                                                     | 201 |
| <i>Carolina Bonacic, Carlos Garcia, Mauricio Marín, Manuel Prieto, Francisco Tirado, and Cesar Vicente</i>                |     |

**Numerical Methods**

|                                                                                                                                            |     |
|--------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Accomplishments and Challenges in Code Development for Parallel and Multimechanics Simulations .....                                       | 214 |
| <i>Tony Degroot, Robert Ferencz, Mark Havstad, Neil Hodge, Jerry Lin, Dennis Parsons, Michael Puso, Jerome Solberg, and Edward Zywickz</i> |     |

|                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------|-----|
| An Algorithm-by-Blocks for SuperMatrix Band Cholesky Factorization .....                                                        | 228 |
| <i>Gregorio Quintana-Ortí, Enrique S. Quintana-Ortí, Alfredo Remón, and Robert A. van de Geijn</i>                              |     |
| An Efficient and Robust Decentralized Algorithm for Detecting the Global Convergence in Asynchronous Iterative Algorithms ..... | 240 |
| <i>Jacques M. Bahi, Sylvain Contassot-Vivier, and Raphaël Couturier</i>                                                         |     |
| A Parallel Implementation of the Trace Minimization Eigensolver .....                                                           | 255 |
| <i>Eloy Romero and Jose E. Roman</i>                                                                                            |     |
| A Load Balancing Knapsack Algorithm for Parallel Fuzzy c-Means Cluster Analysis .....                                           | 269 |
| <i>Marta V. Modenesi, Alexandre G. Evsukoff, and Myrian C.A. Costa</i>                                                          |     |
| Scalable Parallel 3d FFTs for Electronic Structure Codes .....                                                                  | 280 |
| <i>Andrew Canning</i>                                                                                                           |     |

## Linear Algebra

|                                                                                               |     |
|-----------------------------------------------------------------------------------------------|-----|
| Evaluation of Sparse LU Factorization and Triangular Solution on Multicore Platforms .....    | 287 |
| <i>Xiaoye Sherry Li</i>                                                                       |     |
| A Parallel Matrix Scaling Algorithm.....                                                      | 301 |
| <i>Patrick R. Amestoy, Iain S. Duff, Daniel Ruiz, and Bora Uçar</i>                           |     |
| Design, Tuning and Evaluation of Parallel Multilevel ILU Preconditioners .....                | 314 |
| <i>José I. Aliaga, Matthias Bollhöfer, Alberto F. Martín, and Enrique S. Quintana-Ortí</i>    |     |
| On the I/O Volume in Out-of-Core Multifrontal Methods with a Flexible Allocation Scheme ..... | 328 |
| <i>Emmanuel Agullo, Abdou Guermouche, and Jean-Yves L'Excellent</i>                           |     |
| Parallel Eigensolvers for a Discretized Radiative Transfer Problem .....                      | 336 |
| <i>Paulo B. Vasconcelos, Osni Marques, and Jose E. Roman</i>                                  |     |

## Computing in Geosciences and Biosciences

|                                                                                     |     |
|-------------------------------------------------------------------------------------|-----|
| High Performance Computing and the Progress of Weather and Climate Forecasting..... | 349 |
| <i>Philippe Bougeault</i>                                                           |     |

Simulation of Seismic Wave Propagation in an Asteroid Based upon an Unstructured MPI Spectral-Element Method: Blocking and Non-blocking Communication Strategies ..... 350  
*Roland Martin, Dimitri Komatitsch, Céline Blitz, and Nicolas Le Goff*

A Simulation of Seismic Wave Propagation at High Resolution in the Inner Core of the Earth on 2166 Processors of MareNostrum ..... 364  
*Dimitri Komatitsch, Jesús Labarta, and David Michéa*

Using a Global Parameter for Gaussian Affinity Matrices in Spectral Clustering ..... 378  
*Sandrine Mouysset, Joseph Noailles, and Daniel Ruiz*

Comparing Some Methods and Preconditioners for Hydropower Plant Flow Simulations ..... 391  
*Luiz M. Carvalho, Wagner Fortes, and Luc Giraud*

**Imaging and Graphics**

Computational Models of the Human Body for Medical Image Analysis ..... 405  
*Nicholas Ayache*

Attaining High Performance in General-Purpose Computations on Current Graphics Processors ..... 406  
*Francisco D. Igual, Rafael Mayo, and Enrique S. Quintana-Ortí*

Optimised Computational Functional Imaging for Arteries ..... 420  
*Ramiro Moreno, Ming Chau, Shirod Jeetoo, Franck Nicoud, Frédéric Viart, Anne Salvayre, and Hervé Rousseau*

Memory Locality Exploitation Strategies for FFT on the CUDA Architecture..... 430  
*Eladio Gutierrez, Sergio Romero, Maria A. Trenas, and Emilio L. Zapata*

**Computing for Aerospace and Engineering**

Large Eddy Simulation of Combustion on Massively Parallel Machines ..... 444  
*Gabriel Staffelbach, Jean Mathieu Senoner, Laurent Gicquel, and Thierry Poinso*

Variational Multiscale LES and Hybrid RANS/LES Parallel Simulation of Complex Unsteady Flows ..... 465  
*Hilde Ouvrard, Bruno Koobus, Maria-Vittoria Salvetti, Simone Camarri, and Alain Dervieux*

|                                                                                                                                      |            |
