|----------------------------------------------------------------------------------------------------------|-----|
| Exchanging More Than Complete Data .....                                                                 | 1   |
| <i>Marcelo Arenas</i>                                                                                    |     |
| Ontological Query Answering with Existential Rules .....                                                 | 2   |
| <i>Marie-Laure Mugnier</i>                                                                               |     |
| The ONTORULE Project : Where Ontology Meets Business Rules .....                                         | 24  |
| <i>Christian de Sainte Marie, Miguel Iglesias Escudero, and<br/>Peter Rosina</i>                         |     |
| Towards Farsighted Dependencies for Existential Rules .....                                              | 30  |
| <i>Jean-François Baget, Marie-Laure Mugnier, and Michaël Thomazo</i>                                     |     |
| Context-Dependent OWL Reasoning in Sindice - Experiences and<br>Lessons Learnt .....                     | 46  |
| <i>Renaud Delbru, Giovanni Tummarello, and Axel Polleres</i>                                             |     |
| Little Knowledge Rules the Web: Domain-Centric Result Page<br>Extraction .....                           | 61  |
| <i>Tim Furge, Georg Gottlob, Giovanni Grasso, Giorgio Orsi,<br/>Christian Schallhart, and Cheng Wang</i> |     |
| Conjunctive Query Answering in Probabilistic Datalog+/-<br>Ontologies .....                              | 77  |
| <i>Georg Gottlob, Thomas Lukasiewicz, and Gerardo I. Simari</i>                                          |     |
| Paraconsistent Semantics for Hybrid MKNF Knowledge Bases .....                                           | 93  |
| <i>Shasha Huang, Qingguo Li, and Pascal Hitzler</i>                                                      |     |
| Linked Rules: Principles for Rule Reuse on the Web .....                                                 | 108 |
| <i>Ankesh Khandelwal, Ian Jacobi, and Lalana Kagal</i>                                                   |     |
| Polynomial Conjunctive Query Rewriting under Unary Inclusion<br>Dependencies .....                       | 124 |
| <i>Stanislav Kikot, Roman Kontchakov, and Michael Zakharyashev</i>                                       |     |
| Reasoning as Axioms Change: Incremental View Maintenance<br>Reconsidered .....                           | 139 |
| <i>Jakub Kotowski, François Bry, and Simon Brodt</i>                                                     |     |
| Query Rewriting for Inconsistent DL-Lite Ontologies .....                                                | 155 |
| <i>Domenico Lembo, Maurizio Lenzerini, Riccardo Rosati,<br/>Marco Ruzzi, and Domenico Fabio Savo</i>     |     |

|                                                                                                                  |     |
|------------------------------------------------------------------------------------------------------------------|-----|
| Decidability of Unification in EL without Top Constructor .....                                                  | 170 |
| <i>Nguyen Thanh Binh</i>                                                                                         |     |
| On the Equivalence between the $\mathcal{L}_1$ Action Language and Partial<br>Actions in Transaction Logic ..... | 185 |
| <i>Martín Rezk and Michael Kifer</i>                                                                             |     |
| Reasoning with Actions in Transaction Logic .....                                                                | 201 |
| <i>Martín Rezk and Michael Kifer</i>                                                                             |     |
| Interpolation and Extrapolation in Conceptual Spaces: A Case Study<br>in the Music Domain .....                  | 217 |
| <i>Steven Schockaert and Henri Prade</i>                                                                         |     |
| Improve Efficiency of Mapping Data between XML and RDF with<br>XSPARQL .....                                     | 232 |
| <i>Stefan Bischof, Nuno Lopes, and Axel Polleres</i>                                                             |     |
| A Smart Campus Prototype for Demonstrating the Semantic<br>Integration of Heterogeneous Data .....               | 238 |
| <i>Aidan Boran, Ivan Bedini, Christopher J. Matheus,<br/>Peter F. Patel-Schneider, and John Keeney</i>           |     |
| An Ontological Approach for Modeling Technical Standards for<br>Compliance Checking .....                        | 244 |
| <i>Khalil Riad Bouzidi, Catherine Faron-Zucker, Bruno Fies, and<br/>Nhan Le Thanh</i>                            |     |
| Integrating Linked Data through RDFS and OWL: Some Lessons<br>Learnt .....                                       | 250 |
| <i>Aidan Hogan</i>                                                                                               |     |
| Instant Feedback on Discovered Association Rules with PMML-Based<br>Query-by-Example .....                       | 257 |
| <i>Tomáš Kliegr, Andrej Hazucha, and Tomáš Marek</i>                                                             |     |
| Local Closed World Semantics: Grounded Circumscription for<br>Description Logics .....                           | 263 |
| <i>Adila Krisnadhi, Kunal Sengupta, and Pascal Hitzler</i>                                                       |     |
| RDF Semantics for Web Association Rules .....                                                                    | 269 |
| <i>Mauricio Minuto Espil</i>                                                                                     |     |
| Root Justifications for Ontology Repair .....                                                                    | 275 |
| <i>Kodylan Moodley, Thomas Meyer, and Ivan José Varzinczak</i>                                                   |     |
| ELOG: A Probabilistic Reasoner for OWL EL .....                                                                  | 281 |
| <i>Jan Noessner and Mathias Niepert</i>                                                                          |     |

Combining Production Systems and Ontologies ..... 287  
    *Martín Rezk and Werner Nutt*

MapResolve ..... 294  
    *Anne Schlicht and Heiner Stuckenschmidt*

Inline Evaluation of Hybrid Knowledge Bases: PhD Description ..... 300  
    *Guohui Xiao and Thomas Eiter*

**Author Index** ..... 307
