

Contents

Keynote Lectures	1
Chairman : T. Tatsumi	
A Survey of the Transition Prediction Methods: from Analytical Criteria to PSE and DNS	3
<i>D. Arnal, G. Casalis, J.C. Juillen</i>	
Chairman : E. Reshotko	
Some Fundamental Problems on Transition to Wall Turbulence	15
<i>M. Nishioka</i>	
Session A : Fundamentals I	27
Chairman : H. Bippes	
Is the Classic, Weakly Nonlinear Theory of Hydrodynamic Stability Good Enough and How It Can Be Improved	29
<i>H. Zhou, K. Fujimura</i>	
Role of Non-Wave-Like Disturbances in Transition	37
<i>M.T. Landahl</i>	
Interaction of Phase-Locked Modes: A New Mechanism for the Rapid Growth of Three-Dimensional Disturbances	45
<i>X. Wu, P.A. Stewart</i>	
Stability of Two- and Three-Dimensional Time-Dependent Flows with Locally-Uniform Strain Rates	53
<i>A.D.D. Craik</i>	

Session B : Fundamentals II	59
Chairman : H. Zhou	
The Incompressible Attachment-Line Boundary-Layer Stability <i>R.S. Lin, M.R. Malik</i>	61
Secondary Instability Associated with Streamwise Vortices in a Rotating Boundary Layer <i>S. Masuda, D. Hori, M. Matsubara</i>	69
Laminar-Turbulent Transition in Spherical Couette Flow <i>K. Nakabayashi, Z. Zheng, Y. Tsuchida, Y. Morinishi</i>	77
Non Linear PSE Compared with DNS and Experiment <i>C. Airiau, G. Casalis</i>	85
Session C : Fundamentals III	93
Chairman : M. Malik	
Fine Structure of the 3-Dimensional Transition Region in the Wake behind a Thin-Shell Cylinder Placed Parallel to a Uniform Flow <i>K. Tanaka, H. Saito, H. Sato</i>	95
Transition to Turbulence in Pipe Flow <i>A.A. Draad, G.D.C. Kuiken, F.T.M. Nieuwstadt</i>	103
Subcritical Disturbance Growth Caused by Hairpin Eddies <i>M. Asai, M. Nishioka</i>	111
Session D : Flow Measurements and Controls	119
Chairman : H. G. Hornung	

In-Flight Measurements on a Laminar Wing Glove by Means of Surface Sensor Arrays <i>J. Suttan, M. Baumann, W. Nitsche</i>	121
Laminarization of Three-Dimensional Compressible Boundary-Layer Flow Using Receptivity Control <i>S.V. Manuilovich</i>	129
Relaminarisation of the Swept Wing Attachment-Line by Surface Suction <i>D.I.A. Poll, M. Danks</i>	137
Session E : Compressible Flows	145
Chairman : R. Narasimha	
Nonlocal and Local Instability Analysis of Hypersonic Flows <i>M. Simen, S. Hein, F. Bertolotti, V. Wendt, A. Hanifi, D. Henningson</i>	147
An Exploratory Study of Transition on a Slender Cone in Hypervelocity Flow <i>H.G. Hornung, P. Germain</i>	155
Session F : Poster Session I (Fundamentals, Flow Measurements, Controls, Compressible Flows and Turbulent Spot)	163
Chairman : W. S. Saric	
Turbulence in Pulsatile Flow through the Tube with Elastic Wall <i>M. Arakawa, Y. Matsunobu</i>	165
Experimental Study of Boundary Layer Suction Effects on Leading Edge Contamination along the Attachment Line of a Swept Wing <i>J.C. Juillen, D. Arnal</i>	173

Nonlinear Development of Waves in the Supersonic Boundary Layer	181
<i>S.A. Gaponov, A.D. Kosinov, I.I. Maslennikova, N.V. Semionov, S.G. Shevel'kov</i>	
Analysis of the Formation of a Turbulent Spot in a Laminar Boundary Layer	189
<i>V.A. Kazakov</i>	
Entropy- and Boundary Layer Instability of Hypersonic Cone Flows - Effects of Mean Flow Variations -	197
<i>E. Kufner, U. Dallmann</i>	
Mathematical Nature of Parabolized Stability Equations	205
<i>F. Li, M.R. Malik</i>	
High-Speed Boundary-Layer Stability and Transition	213
<i>V.I. Lysenko</i>	
"Vortex Dynamics" of a Vortex Ring Introduced into a Laminar Boundary Layer	221
<i>H. Maekawa, H. Takami, T. Nishioka</i>	
Experiments on Secondary Instability of Channel Flow with Body Forces	229
<i>M. Matsubara, P.H. Alfredsson</i>	
Numerical Simulation of Boundary Layer Flow over Suction Holes	237
<i>H.L. Meitz, H.F. Fasel</i>	
Numerical Simulation on Laminar-Turbulent Transition of the Channel Flow with Simulated Wall Roughness	245
<i>K. Yamamoto</i>	
Session G : Bypass Transition and Turbulent Spot	253
Chairman : D.I.A. Poll	

The Development of a Turbulent Spot in an Adverse Pressure Gradient Boundary Layer	255
<i>B.F.A. van Hest, D.M. Passchier, J.L. van Ingen</i>	
Spatial Simulations of Bypass Transition in Boundary Layers	263
<i>D.S. Henningson, S. Berlin, A. Lundbladh</i>	
The Natural Evolution of Turbulent Spots in a Flat Plate Laminar Boundary Layer	271
<i>F. N. Shaikh, M. Gaster</i>	
Turbulent Spot in 3-D Constant Pressure Flow	279
<i>M. Jahanmiri, A. Prabhu, R. Narasimha</i>	
Session H : Swept Wings	287
Chairman : P.H. Alfredsson	
Experimental Study of Secondary Instability and Breakdown in a Swept Wing Boundary Layer	289
<i>A. V. Boiko, V. V. Kozlov, V. V. Syzrantsev, V. A. Scherbakov</i>	
Development of Stationary Crossflow Vortices on a Swept Wing	297
<i>R.H. Radeztsky, Jr., M.S. Reibert, W.S. Saric</i>	
Session I : 3-D Boundary Layers I	305
Chairman : H. Fasel	
An Experiment on Transition of Three-Dimensional Boundary Layer	307
<i>T. Azuma</i>	
Instabilities Developing in the Three-Dimensional Boundary Layer on Concave and Convex Curved Surfaces	315
<i>H. Bippes</i>	

Effects of Wall and Streamline Curvatures on Instability of 3-D Boundary Layers <i>N. Itoh</i>	323
Session J : Poster Session II (Swept Wings, 3-D Boundary Layers, 2-D Boundary Layers and Receptivity)	331
Chairman : H. Sato	
Stability of Two-Phase Boundary Layer on a Flat Plate <i>E.S. Asmolov, S.V. Manuilovich</i>	333
On the Receptivity of a Flat Plate Boundary Layer to Localized Free Stream Disturbances <i>A.A. Bakchinov, K.J.A. Westin, V.V. Kozlov, P.H. Alfredsson</i>	341
Comparison of Asymptotic Prediction Methods for Boundary-Layer Receptivity <i>P.W. Hammerton, M. Gaster</i>	349
On Excitation of Unstable Boundary Layer Waves by Freestream Sound <i>E.S. Holm, V.S. Kosorygin</i>	357
The Resonant-Triad Interaction in Boundary-Layer Transition <i>M.J. Jennings, P.A. Stewart, X. Wu</i>	365
Experimental Study of Cross-Flow Instability of a Swept-Wing Boundary Layer with Respect to Traveling Waves <i>V.R. Gaponenko, A.V. Ivanov, Y.S. Kachanov</i>	373
Stability Characteristics of 3-D Boundary Layer on a Yawed Cone <i>A. Hanifi, A. Dahlkild</i>	381
Absolute Instability of the Rotating-Disk Boundary Layer <i>R.J. Lingwood</i>	389
Spatial Direct Numerical Simulation of Transition in a Three-Dimensional Boundary Layer <i>W. Mueller, H. Bestek, H. Fasel</i>	397

Numerical and Experimental Investigation of the K-Regime of Boundary-Layer Transition <i>U. Rist, Y.S. Kachanov</i>	405
Effect of Leading Edge on Sound Receptivity <i>W.S. Saric, W. Wei, B.K. Rasmussen</i>	413
On Similarity Law of the Crossflow Instability in Three-Dimensional Boundary Layers on Yawed Cylinders <i>S. Takagi, N. Itoh</i>	421
Numerical and Experimental Investigation of Secondary Instability in Leading Edge Boundary Layer Flow <i>V. Theofilis, D.I.A. Poll</i>	429
Comparison between the Orr-Sommerfeld and Asymptotic Theories for the Flat-Plate Boundary Layer <i>J.J. Healey</i>	437
Session K : 3-D Boundary Layers II	445
Chairman : V.V. Kozlov	
Analysis of the Instability of the Boundary Layer over a Rotating Disk <i>S. Jarre, P. Le Gal, M.P. Chauve</i>	447
Randomization Process in Crossflow Instability Dominant Three-dimensional Boundary-Layer Transitions <i>Y. Kohama, Y. Kodashima, H. Watanabe</i>	455
Session L : 2-D Boundary Layers	463
Chairman : F. Hama	
Experiments on Nonlinear Interaction between Oblique Tollmien-Schlichting Waves <i>P.A. Elofsson, P.H. Alfredsson</i>	465

Three-Dimensional Instability of the Blasius Boundary Layer <i>Y.S. Kachanov, A. Michalke</i>	473
On the Stability of a Boundary Layer with Embedded Streamwise Vortices <i>B.G.B. Klingmann, A.A. Bakchinov, G.R. Grek, V.V. Kozlov</i>	+) 491
Direct Numerical Simulation of Boundary-Layer Transition with Strong Adverse Pressure Gradient <i>M. Kloker, H. Fasel</i>	481
Session M : Receptivity I	489
Chairman : V.Ya. Levchenko	
A Partial Simulation of Receptivity and Transition in 3-D Boundary Layers <i>F.P. Bertolotti</i>	491
Distributed Excitation of Cross-Flow Vortices in Three-Dimensional Boundary Layers <i>J. D. Crouch</i>	499
The Receptivity of Flat-Plate Boundary-Layers with Two-Dimensional Roughness Elements to Freestream Sound and Its Control <i>R. Kobayashi, Y. Fukunishi, T. Nishikawa, T. Kato</i>	507
Session N : Receptivity II	515
Chairman : D. Arnal	
Laminar Boundary-Layer, Sound Receptivity and Control <i>V.S. Kosorygin, R.H. Radeztsky, Jr., W.S. Saric</i>	517
On 3-D Boundary Layer Receptivity <i>V.Ya. Levchenko, V.A. Scherbakov</i>	525

Experiments on the Response of a Laminar Boundary Layer to
Free Stream Turbulence, and the Role of TS-Waves in
the Transition Process

+))

*K.J.A. Westin, A.V. Boiko, R.G.B. Klingmann, V.V. Kozlov,
P.H. Alfredsson*
