Invited Talk

Algebraic Specification and Program Development by Stepwise Refinement Extended Abstract	1
<i>Donald Sannella</i>	

Tutorials

Proof Obligations of the B Formal Method: Local Proofs Ensure Global Consistency	10
<i>Mireille Ducassé and Laurence Rozé</i>	
Constraint Logic Programming Applied to Model Checking.....	30
<i>Laurent Fribourg</i>	

Software Development

On Dynamic Aspects of OOD Frameworks in Component-Based Software Development in Computational Logic	42
<i>Juliana Küster Filipe, Kung-Kiu Lau, Mario Ornaghi, and Hirokazu Yatsu</i>	

Analysis and Specialisation

Infinite State Model Checking by Abstract Interpretation and Program Specialisation.....	62
<i>Michael Leuschel and Thierry Massart</i>	
Mode Analysis Domains for Typed Logic Programs.....	82
<i>Jan-Georg Smaus, Patricia M. Hill, and Andy King</i>	
Imperative Program Specialisation: An Approach Using CLP	102
<i>Julio C. Peralta and John P. Gallagher</i>	
Specialising Finite Domain Programs Using Polyhedra	118
<i>Jacob M. Howe and Andy King</i>	

Transformation

Roles of Program Extension	136
<i>Ralf Lämmel, Günter Riedewald, and Wolfgang Lohmann</i>	
Transformation of Left Terminating Programs	156
<i>Annalisa Bossi, Nicoletta Cocco, and Sandro Etalle</i>	

Transformation Rules for Logic Programs with Goals as Arguments	176
<i>Alberto Pettorossi and Maurizio Proietti</i>	
Making Mercury Programs Tail Recursive	196
<i>Peter Ross, David Overton, and Zoltan Somogyi</i>	
The Replacement Operation for CCP Programs	216
<i>Marco Bertolino, Sandro Etalle, and Catuscia Palamidessi</i>	

Verification

Annotations for Prolog – A Concept and Runtime Handling	234
<i>Marija Kulaš</i>	
Verification by Testing for Recursive Program Schemes	255
<i>Daniel Le Métayer, Valérie-Anne Nicolas, and Olivier Ridoux</i>	
Combined Static and Dynamic Assertion-Based Debugging of Constraint Logic Programs	273
<i>Germán Puebla, Francisco Bueno, and Manuel Hermenegildo</i>	
Context-Moving Transformations for Function Verification	293
<i>Jürgen Giesl</i>
