

R. J. MacDonald
E. C. Taglauer
K. R. Wandelt (Eds.)

Surface Science

Principles and Current Applications

With 196 Figures

Springer

Contents

I. Structure at Single Crystal Surfaces

Tensor-LEED, Diffuse LEED, and LEED Holography <i>K. Heinz</i>	3
3-D Surface Structure Analysis by X-Ray Diffraction <i>W. Moritz and H. L. Meyerheim</i>	12
Surface Structural Determination by VLEED Analysis <i>S. M. Thurgate, Chang Sun and G. Hitchen</i>	29
Surface Structure Investigation with Ion Scattering and Scanning Tunneling Microscopy at Oxygen and Nitrogen Covered Cu_3Au Surfaces <i>H. Niehus, M. Voetz, C. Achete, K. Morgenstern, G. Comsa</i>	38

II. Surface Electronic Properties

Surface States on Metals <i>A. Goldmann and R. Matzdorf</i>	51
Low-Dimensional States on Metal Surfaces <i>N. Memmel and V. Dose</i>	64
Electronic Properties of Semiconductor Surfaces and Fermi Surface Studies Using Photoelectron Spectroscopy <i>J. D. Riley, R. Leckey, Y. Cai, X. Zhang and J. Con Foo</i>	76
Recent Progress in Investigation of Luminescent and Electrical Phenomena from Semiconductor Cleavage <i>D. Haneman, D. G. Li, N. S. McAlpine and C. J. Kaalund</i>	89

III. Surface Composition Analysis

Problems of Quantitative Surface Composition Analysis Using LEIS <i>R. J. MacDonald, D. J. O'Connor, B. V. King, Li Ting and Zhu Li</i>	101
Studies of Alloy Surfaces by Low-Energy Ion Scattering <i>Y. G. Shen, D. J. O'Connor, R. J. MacDonald and K. Wandelt</i>	115

Ion Beam Mixing in Metals <i>B. V. King, M. A. Sobhan and M. Petravic</i>	127
--	-----

Surface Segregation and Preferential Sputtering of Binary Alloys <i>E. Taglauer, J. du Plessis and G. N. van Wyk</i>	136
---	-----

IV. Properties and Influence of Adsorbates

The Determination of Adsorbate-Substrate Bonding via UPS <i>G. L. Nyberg and Wei Shen</i>	149
--	-----

Oxygen on Cu(100): From Physisorption to Chemically Induced Reconstruction <i>K. Baberschke</i>	161
---	-----

Inelastic Phenomena of Low-Energy Particle-Surface Interactions <i>A. Närmann, C. Höfner, T. Schlathöller and W. Heiland</i>	172
---	-----

Adsorption on Epitaxial Oxide Films as Model Systems for Heterogeneous Catalysis <i>S. Wohlrab, F. Winkelmann, J. Libuda, M. Bäumer, H. Kuhlenbeck and H.-J. Freund</i>	193
---	-----

Kinetic Oscillations on Single Crystal Surfaces <i>R. Imbihl</i>	203
---	-----

V. Thin Film Growth and Interfaces

Homoepitaxial Growth of Metals and the Role of Surfactants <i>M. Scheffler, V. Fiorentini and S. Oppo</i>	219
--	-----

Metal-on-Metal Heteroepitaxy and the Influence of a Surfactant: Cu/O/Ru(0001) <i>H. Wolter, M. Schmidt, M. Nohlen and K. Wandelt</i>	232
--	-----

Energetic Condensation as a Means of Inducing the Growth of Films Containing High Pressure Phases <i>D. R. McKenzie, N. A. Marks, P. Guan, B. A. Pailthorpe, W. D. McFall and Y. Yin</i>	250
--	-----

Atomically Abrupt Interfaces of Compound Semiconductor Heterostructures: The AlAs/GaAs Case <i>D. Bimberg, J. Christen, W. Wittke, D. Gerthsen, D. Stenkamp, D. E. Mars and J. N. Miller</i>	263
--	-----

Deposition and Characterization of Thin Polyimide Films <i>P. Y. Timbrell, R. N. Lamb, G. Comelli</i>	279
--	-----

VI. Characterization of Catalysts

The Application of Surface Physics in Catalysis Science: Understanding Heterogeneous Catalysts for Partial Oxidation <i>R. Schlögl</i>	293
--	-----

Characterization of Zeolite Catalysts and Related Materials by Multinuclear Solid-State NMR Spectroscopy <i>G. Engelhardt</i>	321
---	-----

Spectroscopic Studies of Zeolite Single Crystals <i>K. T. Jackson and R. F. Howe</i>	331
---	-----

Analysis of Alumina-Supported Catalysts by XPS <i>B. G. Baker and J. Jasieniak</i>	348
---	-----

Precious Metal-Ceria Interactions in Car Exhaust Catalysts <i>D. L. Trimm, C. Padeste, D. J. Pettigrew, B. Whittington and N. W. Cant</i>	363
--	-----
