

Contents

Preface	vii
CHAPTER 1	
Transition Functions and Resolvents	
1. Markov Chains and Transition Functions: Definitions and Basic Properties	1
2. Differentiability Properties of Transition Functions and Significance of the Q -Matrix	8
3. Resolvent Functions and Their Properties	21
4. The Functional-Analytic Setting for Transition Functions and Resolvents ..	33
5. Feller Transition Functions	42
6. Kendall's Representation of Reversible Transition Functions	48
7. Appendix	54
CHAPTER 2	
Existence and Uniqueness of Q -Functions	
1. Q -Functions and the Kolmogorov Backward and Forward Equations	61
2. Existence and Uniqueness of Q -Functions	67
CHAPTER 3	
Examples of Continuous-Time Markov Chains	
1. Finite Markov Chains	92
2. Birth and Death Processes	96
3. Continuous Time Parameter Markov Branching Processes	113
CHAPTER 4	
More on the Uniqueness Problem	
1. Laplace Transform Tools	120
2. Non-uniqueness—Construction of Q -Functions Other Than the Minimal One	138
3. Uniqueness—The Non-Conservative Case	148
CHAPTER 5	
Classification of States and Invariant Measures	
1. Classification of States	155

2. Sub-invariant and Invariant Measures	166
3. Classification Based on the Q -Matrix	184
4. Determination of Invariant Measures from the Q -Matrix	191

CHAPTER 6

Strong and Exponential Ergodicity

1. The Ergodic Coefficient and Hitting Times	204
2. Ordinary Ergodicity	212
3. Strong Ergodicity	214
4. Geometric Ergodicity for Discrete Time Chains	217
5. The Croft-Kingman Lemmas	224
6. Exponential Ergodicity for Continuous-Time Chains	226

CHAPTER 7

Reversibility, Monotonicity, and Other Properties

1. Symmetry and Reversibility	233
2. Exponential Families of Transition Functions	243
3. Stochastic Monotonicity and Comparability	246
4. Dual Processes	251
5. Coupling	254

CHAPTER 8

Birth and Death Processes

1. The Potential Coefficients and Feller's Boundary Conditions	261
2. Karlin and McGregor's Representation Theorem and Duality	264
3. The Stieltjes Moment Problem	273
4. The Karlin-McGregor Method of Solution	280
5. Total Positivity of the Birth and Death Transition Function	288

CHAPTER 9

Population Processes

1. Upwardly Skip-Free Processes	292
2. Extinction Times and Probability of Extinction for Upwardly Skip-Free Processes	298
3. Multidimensional Population Processes	307
4. Two-Dimensional Competition Processes	317
5. Birth, Death, and Migration Processes	330
