

H.V. Klapdor-Kleingrothaus
R.D. Viollier (Eds.)

Dark Matter in Astro- and Particle Physics

Proceedings of the International Conference
DARK 2002

Cape Town, South Africa, 4-9 February 2002

Springer

Contents

Part I Astronomical Evidence for Dark Matter

Large-Scale Structure from Galaxy and Cluster Surveys	
<i>L. Guzzo</i>	3
The Dark Mass at the Center of the Milky Way	
<i>A. Eckart and Ch. Straubmeier</i>	16
Dim Matter in the Disks of Low Surface Brightness Galaxies	
<i>B. Fuchs</i>	28
Black Holes in Active Galactic Nuclei	
<i>G.M. Madejski</i>	36
Comparison of Black Hole and Fermion Ball Scenarios of the Galactic Center	
<i>N. Bilić et al.</i>	46
Dark Matter and Baryons in Groups and Clusters of Galaxies	
<i>N. Menci, A. Cavaliere and A. Lapi</i>	53
Baryonic Dark Matter and Machos	
<i>K. Griest</i>	62
The Next Generation Microlensing Search: SuperMacho	
<i>A.J. Drake et al.</i>	71
Dynamics of Dark Matter Cusps	
<i>D. Merritt and M. Milosavljević</i>	79
Testing Hierarchical Structure Formation Scenarios	
<i>C. Cress</i>	90

Part II Cosmic Microwave Background

Cosmology Rounding the Cape	
<i>A. Melchiorri</i>	101

Large Scale Structure in an Era of Precision CMB Measurements	
<i>A.R. Cooray</i>	119
Astrophysical Constraints on Neutralino Dark Matter from Multifrequency Observations of Galaxy Clusters	
<i>S. Colafrancesco</i>	131
Part III Thermodynamics of Dark Matter	
On the Formation of Degenerate Heavy Fermion Stars	
<i>R. Lindebaum et al.</i>	149
The Self-Gravitating Fermi Gas	
<i>P.-H. Chavanis</i>	156
Dark Matter in the Halo of the Galaxy	
<i>N. Bilić, G.B. Tupper and R.D. Viollier</i>	164
Part IV Supersymmetry and Dark Matter	
Supersymmetry and Dark Matter	
<i>R. Arnowitt and B. Dutta</i>	175
On WIMP Detection Rates in Constrained SUSY	
<i>L. Roszkowski</i>	189
Status of Supersymmetry in the Light of Recent Experiments	
<i>U. Chattopadhyay, A. Corsetti and P. Nath</i>	202
Theoretical Directional and Modulated Rates for Direct SUSY Dark Matter Detection	
<i>J.D. Vergados</i>	217
Nonthermal Production of Gravitinos and Inflatinos in the Inflationary Universe	
<i>P. Nilles and M. Peloso</i>	228
Supersymmetric Dark Matter and Recent Experimental Constraints	
<i>A.B. Lahanas, D.V. Nanopoulos and V.C. Spanos</i>	238
Axinos as Cold Dark Matter Candidate	
<i>J.E. Kim</i>	246
LEP Constraints on Susy Dark Matter	
<i>S. Rosier-Lees</i>	255

Part V Inflation and Dark Energy

Cosmology from Large Scale Structure	
<i>A.J.S. Hamilton et al.</i>	267
Natural Quintessence and the Brane World	
<i>C.P. Burgess</i>	274
Self-Tuning Solution of the Cosmological Constant Problem with Antisymmetric Tensor Field	
<i>H.M. Lee</i>	285
Bad News for Tracking Quintessence	
<i>S.A. Bludman</i>	293
Gauged Inflation	
<i>R. Hofmann and M.Th. Keil</i>	296
Dark Matter, Dark Energy and Chaplygin Gas	
<i>N. Bilić, G.B. Tupper and R.D. Viollier</i>	306
Dark Matter Distribution from Gravitational Entropy Evolution	
<i>M.P. Leubner</i>	312
Cosmology with a Long-Range Repulsive Force	
<i>W.H. Kinney, M. Brisudova and R. Woodard</i>	322

Part VI Structure Formation and Dark Matter

Constraining Dark Matter Candidates from Structure Formation	
<i>C. Boehm, P. Fayet and R. Schaeffer</i>	333
Dark Matter-Photon Interactions: Are They Allowed?	
<i>C. Boehm and K.B. Bruce</i>	345
Scalar Field Dark Matter and Galaxy Formation	
<i>M. Alcubierre et al.</i>	356

Part VII Neutrinoless Double Beta Decay and Hot Dark Matter: Phenomenology and Experiments

Status of Evidence for Neutrinoless Double Beta Decay	
<i>H.V. Klapdor-Kleingrothaus, A. Dietz and I.V. Krivosheina</i>	367
Evidence for Neutrinoless Double Beta Decay Revisited - Reply to a Comment	
<i>H.V. Klapdor-Kleingrothaus, A. Dietz and I.V. Krivosheina</i>	404

Neutrinos: Summarizing the State-of-the-Art <i>J.W.F. Valle</i>	412
New Constraints on Massive Degenerate Neutrinos from Big-Bang Nucleosynthesis and Cosmic Microwave Background Fluctuations <i>T. Kajino et al.</i>	435
Neutrino Mass from Tritium β Decay <i>E. Otten</i>	441
KATRIN: The Future of Tritium Beta Decay Experiments <i>M. Steidl (for the KATRIN collaboration)</i>	449
Part VIII Direct Dark Matter Searches	
WIMP Search by the DAMA Experiment at Gran Sasso <i>R. Bernabei et al.</i>	459
GENIUS and GENIUS-TF - The Potential for Cold Dark Matter and Solar Neutrino Searches <i>H.V. Klapdor-Kleingrothaus and I.V. Krivosheina</i>	473
ZEPLIN III – A Two Phase Xenon Dark Matter Detector <i>J. Dawson et al.</i>	485
ZEPLIN IV: A One Ton WIMP Detector <i>D.B. Cline</i>	492
Status of Direct Dark Matter Detection Experiments at the Boulby Mine <i>N.J.T. Smith (for the Boulby Dark Matter Collaboration)</i>	499
Dark Matter Search in the EDELWEISS Experiment <i>A. Juillard et al.</i>	509
The CRESST Dark Matter Search Status and Future <i>W. Seidel et al.</i>	517
The Status of SIMPLE in 2002 <i>J.I. Collar et al.</i>	524
Part IX Indirect Dark Matter Searches	
Atmospheric Neutrinos, WIMPs and Monopoles: Physics with the AMANDA Neutrino Telescope <i>W. Rhode (for the AMANDA Collaboration)</i>	531

Dark Matter Prospects with the ANTARES Neutrino Telescope	
<i>L. Thompson (on behalf of the ANTARES Collaboration)</i>	542

Part X Neutrino Oscillation Experiments and New Underground Laboratories

Results and Implications of First SNO	
<i>A. Hime (for the SNO Collaboration)</i>	553
Long Baseline Neutrino Oscillation Experiments	
<i>K. Zuber</i>	564
Future Underground Laboratory in Finland	
<i>J. Peltoniemi (for CUPP project group)</i>	575

Part XI Cosmic Rays, Cosmic Anti-Matter and Dark Matter

Clustering, GUT Scale and Neutrino Masses in Ultrahigh Energy Cosmic Rays	
<i>Z. Fodor</i>	585
Cosmic Anti-Matter and Dark Matter Searches with AMS-02 on the International Space Station ISS	
<i>W. Wallraff (for the AMS collaboration)</i>	597
Absolute Neutrino Mass Phenomenology	
<i>H. Päs and T.J. Weiler</i>	609

Part XII Concluding Remarks

DARK 2002 and Beyond, Concluding Remarks for Dark 2002	
<i>J. Ellis</i>	627
Author Index	628
List of Participants	628
