

## **Introduction — 1**

### **Chapter 1 Procurement as a Policy Enabler — 13**

- 1.1 Enhancing service delivery and driving public value — 14
- 1.2 Building public trust in institutions — 15
- 1.3 Setting expectations where laws are absent — 16
- 1.4 Leveraging external expertise — 16
- 1.5 Driving innovation — 17
- 1.6 Support economic development and domestic business — 17

### **Chapter 2 Stages of Procurement — 19**

- 2.1 Definition of artificial intelligence — 22
- 2.2 How is AI different from traditional software? — 25

### **Chapter 3 Why Is Procurement of AI Different? — 28**

- 3.1 Government rules and guidelines for AI systems — 42

### **Chapter 4 Trustworthiness — 45**

- 4.1 Crosswalk for trustworthy AI principles — 47
- 4.2 Is AI the solution? — 52
- 4.3 Who makes the decisions? — 57
- 4.4 Risk and impact assessment — 59

### **Chapter 5 Policy and Value (Mis)alignment — 66**

### **Chapter 6 Organizational Capability and Capacity — 73**

- 6.1 Impact on decision-making processes — 77
- 6.2 Human agency and oversight — 80
- 6.3 Siloed organizations — 82
- 6.4 Agile development — 87

### **Chapter 7 Data and Model Performance — 92**

- 7.1 Bias and non-discrimination — 93
- 7.2 Data quality — 95
  - 7.2.1 Fit for purpose — 95
  - 7.2.2 Representativeness — 97
  - 7.2.3 Completeness — 100

|       |  |     |
|-------|--|-----|
| 7.2.4 | Consistency and duplication —          | 100 |
| 7.2.5 | Data Accuracy —                        | 101 |
| 7.2.6 | Timeliness —                           | 101 |
| 7.3   | Model selection —                      | 102 |
| 7.4   | Sandbox testing —                      | 103 |
| 7.5   | Performance metric selection —         | 104 |
| 7.6   | Technical elements of trustworthy AI — | 108 |
| 7.6.1 | Model Accuracy —                       | 109 |
| 7.6.2 | Explainability —                       | 110 |
| 7.6.3 | Interpretability —                     | 111 |
| 7.6.4 | Traceability —                         | 112 |
| 7.6.5 | Reliability —                          | 114 |
| 7.6.6 | Reproducibility —                      | 115 |
| 7.6.7 | Replicability —                        | 115 |
| 7.6.8 | Contestability —                       | 116 |
| 7.6.9 | Validity —                             | 118 |

## **Chapter 8 Fairness — 121**

## **Chapter 9 Socio-Technical Systems — 127**

|     |                              |     |
|-----|------------------------------|-----|
| 9.1 | Feedback loops —             | 127 |
| 9.2 | Interconnected systems —     | 129 |
| 9.3 | Data or performance drifts — | 133 |

## **Chapter 10 Transparency — 135**

|      |   |     |
|------|---|-----|
| 10.1 | Public AI use case registries —                       | 136 |
| 10.2 | AI in procurement databases —                         | 139 |
| 10.3 | Intellectual property protections and trade secrecy — | 143 |
| 10.4 | Data and model documentation —                        | 145 |

## **Chapter 11 Safety and Security — 151**

|      |                              |     |
|------|------------------------------|-----|
| 11.1 | Robustness —                 | 151 |
| 11.2 | Resiliency —                 | 152 |
| 11.3 | Adversarial attacks —        | 152 |
| 11.4 | Bans or moratorium —         | 154 |
| 11.5 | Privacy impact assessments — | 155 |
| 11.6 | Possible tradeoffs —         | 157 |

## **Chapter 12 Distributed Responsibility — 160**

|      |                       |     |
|------|-----------------------|-----|
| 12.1 | Contractual clauses — | 162 |
|------|-----------------------|-----|

**Chapter 13 Oversight and Accountability — 167**

**13.1 Fair treatment of vendors — 169**

**Chapter 14 Are Generative AI Systems Different? — 174**

**Chapter 15 Conclusion and Recommendations — 177**

**Appendix I Expert Interview Questions — 183**

**Appendix II Procurement Questions as per Sections — 184**

**Bibliography — 192**

**Index — 226**
