Preface XI

Permission Acknowledgements XVI

List of Illustrations and Tables XVII

Abbreviations XXI

1 Overview of the Synthetic Fuel Industry 1

1 Introductory 1

2 Global Energy Situation 1910–90s: Energy Crises and Revivals 3

3 Impact of Hydraulic Fracturing (Fracking) Revolution on Natural
Petroleum and Synthetic Fuel Production 5

4 Scientific and Engineering Advances in Synthetic Fuel Research and
Development 10

5 Economics and Politics of Synthetic Fuel Development 12

6 Chapter Titles and Summaries 14

7 A Note on Sources 18

2 Friedrich Bergius, Franz Fischer and Hans Tropsch: The Rise of the German Synthetic Fuel Industry 21

1 Introductory 21

2 Hydrogenation Begins 24

3 First Industrial Application of High-Pressure Hydrogenation 28

4 Friedrich Bergius: Background to High-Pressure Coal
Hydrogenation 31

4.1 *Early Studies on the Composition of Coal* 37

4.2 *New Method for Producing Hydrogen Gas* 40

4.3 *Early Experiments on Coal Hydrogenation* 42

4.4 *Moves to Essen and Rheinau: World War I* 47

4.5 *International Development of the Bergius Process* 58

4.6 *Bergius's Related Scientific Projects and Later Activities* 64

5 IG Farben Process and Its Industrialization in Germany 68

6 Fischer-Tropsch Synthesis 70

6.1 *Early Development of the F-T Synthesis: Catalysts, Reaction
Conditions, and Converters* 71

7 Conclusion 77

3 Germany's Synthetic Fuel Industry 1927–45 78

1 Introductory 78

2	Germany's Energy Plan	80
3	BASF-IG Farben's Coal Hydrogenation Program	84
3.1	<i>Period of Development: Synthesis of Ammonia and Methanol</i>	84
3.2	<i>Hydrogenation at Ludwigshafen 1924–27</i>	87
3.3	<i>Hydrogenation 1927–32: Beginning of Leuna</i>	95
3.4	<i>Engineering and the Economics of Hydrogenation</i>	98
3.5	<i>International Developments: IG Farben-Standard Oil Connection</i>	100
3.6	<i>Research and Development at IG Farben in the 1930s–40s: Technical Advances</i>	108
3.7	<i>Germany's Coal Hydrogenation Industry 1933–39</i>	113
3.8	<i>Germany's Coal Hydrogenation Industry 1939–45</i>	126
4	Industrial Development of the F-T Synthesis	138
5	Summary of Synthetic Fuel Industrial Development in Germany 1927–45	157
6	Labor Force in the Synthetic Fuel Plants	161
7	Conclusion	165
4	From Birmingham to Billingham: High-Pressure Coal Hydrogenation in Great Britain	167
1	Introductory	167
2	Fischer-Tropsch Synthesis and the Beginning of Coal Hydrogenation in Britain: Birmingham	170
3	Coal Hydrogenation at the Fuel Research Station	182
4	Influence of Variables on the Conversion Process	187
5	Development of a Small-Size Continuous Plant	188
6	ICI and the Billingham Plant	190
7	Politics and Economics	195
8	Conclusion	203
5	Synthetic Fuel Production in Prewar and World War II Japan: A Study in Technological Failure	205
1	Introductory	205
2	Overview of Japan's Coal Conversion Processes, Seven Year Energy Plan	206
3	Development of Japan's Oil Shale, Derived and Synthetic Liquid Fuel Sources to 1930	211
4	Government Support of Japan's Synthetic Fuel Industry	220
5	Oil Shale and LTC Emerge as Major Sources of Liquid Fuel	228

- 6 Research and Development of the Fischer-Tropsch Synthesis: A Promising Beginning 238
- 7 Coal Hydrogenation: High Hopes but Little Success 244
- 8 Japan's IG Farben Connection 251
- 9 Conclusion 259

- 6 Canada's Mines Branch and Its Synthetic Fuel Program for Energy Independence 262**
 - 1 Introductory 262
 - 2 Early Concern for Fuel Supply 264
 - 3 Synthetic Fuel Research at the Mines Branch 273
 - 4 Wartime Developments on Synthetic Fuel 280
 - 5 Postwar Developments on Oil Sands Separation 282
 - 6 The Blair Report, Athabasca Conference, and the State of Canadian Fuel Research 286
 - 7 Canada's Changing Energy Situation 292
 - 8 Conclusion 300

- 7 The United States Bureau of Mines' Synthetic Fuel Program 1920s–50s: German Connections and American Advances 302**
 - 1 Introductory 302
 - 2 Early Bureau of Mines, European, and Japanese Research and Development of Derived and Synthetic Liquid Fuel 306
 - 3 Liquid Fuel Developments in the United States 314
 - 4 Development of the F-T Synthesis 318
 - 5 Early Research on Coal Hydrogenation 322
 - 6 Coal Hydrogenation and F-T Synthesis at the Bureau of Mines, the Synthetic Liquid Fuels Act of 1944 325
 - 7 The Demonstration Synthetic Fuel Plants in Louisiana, Missouri 334
 - 8 Industrial Development of F-T and Coal Hydrogenation 346
 - 9 Concluding the Bureau's Synthetic Fuel Program 348

- 8 Epilogue: Post-World War II Synthetic Fuel Development and the Emergence of Environmental Concerns 353**
 - 1 Introductory 353
 - 2 Pre-World War II Small-Scale Synthetic Fuel Developments: Italy and France 1920s–40s 355
 - 3 Post-World War II Synthetic Fuel Developments: Sasol 1950s–2000s 357

4 Post-World War II Synthetic Fuel Developments: United States
1960s–80s 358

5 Fossil Fuel, Synthetic Fuel, the Environment 367

5.1 *Fossil Fuel, Synthetic Fuel Impact on Environment* 367

5.2 *Environmental Impact: Climate Change-Global Warming and
Acid Rain* 369

6 Oil Crises 1990s, Oil Shale Fracking Revolution and Its
Consequences 379

7 Conclusion 381

Bibliography 385

Index 395
