Preface	VII
Introduction	XV
Knot theory high and low – Knotty but nice – Why 2? – The fundamental group – Local flatness – Polynomials – Seifert surfaces – Fibred knots and open books – Knot cobordism – Simple knots – Surgery theory – Algebraic transversality – The topological invariance of rational Pontrjagin classes – Localization – Algebraic K - and L -theory invariants of knots – Codimension q surgery – Fredholm localization – Structure	
Part One Algebraic K-theory	
1. Finite structures	3
1A. The Wall finiteness obstruction	3
1B. Whitehead torsion	5
1C. The mapping torus	8
2. Geometric bands	11
3. Algebraic bands	15
4. Localization and completion in K-theory	19
4A. Commutative localization	20
4B. The algebraic K -theory localization exact sequence	21
5. K-theory of polynomial extensions	27
6. K-theory of formal power series	41
7. Algebraic transversality	47
8. Finite domination and Novikov homology	57

9. Noncommutative localization	71
10. Endomorphism K-theory	79
10A. The endomorphism category	80
10B. The Fredholm localizations $\Omega_+^{-1}A[z], \tilde{\Omega}_+^{-1}A[z]$	82
10C. The A -contractible localization $\Pi^{-1}A[z, z^{-1}]$	88
11. The characteristic polynomial	97
12. Primary K-theory	105
13. Automorphism K-theory	119
13A. The Fredholm localization $\Omega^{-1}A[z, z^{-1}]$	120
13B. The automorphism category	125
14. Witt vectors	135
15. The fibering obstruction	151
16. Reidemeister torsion	159
17. Alexander polynomials	165
18. K-theory of Dedekind rings	177
19. K-theory of function fields	185

Part Two Algebraic L -theory

20. Algebraic Poincaré complexes	205
20A. L -groups	205
20B. Γ -groups	215
20C. Thickenings, unions and triads	217
21. Codimension q surgery	225
21A. Surgery on submanifolds	225
21B. The splitting obstruction	227
22. Codimension 2 surgery	233
22A. Characteristic submanifolds	233
22B. The antiquadratic construction	235
22C. Spines	242
22D. The homology splitting obstruction	251
23. Manifold and geometric Poincaré bordism of $X \times S^1$	257

24. L-theory of Laurent extensions	261
25. Localization and completion in L-theory	267
26. Asymmetric L-theory	287
27. Framed codimension 2 surgery	303
27A. Codimension 1 Seifert surfaces	303
27B. Codimension 2 Seifert surfaces	308
27C. Branched cyclic covers	314
27D. Framed spines	318
28. Automorphism L-theory	321
28A. Algebraic Poincaré bands	322
28B. Duality in automorphism K -theory	324
28C. Bordism of automorphisms of manifolds	328
28D. The automorphism signature	330
28E. The trace map χ_z	339
28F. Automorphism and asymmetric L -theory	343
29. Open books	351
29A. Geometric open books	352
29B. The asymmetric signature	359
30. Twisted doubles	369
30A. Geometric twisted doubles	371
30B. Algebraic twisted doubles	378
30C. Algebraic open books	385
30D. Twisted double L -theory	388
31. Isometric L-theory	397
31A. Isometric structures	397
31B. The trace map χ_s	410
32. Seifert and Blanchfield complexes	415
32A. Seifert complexes	417
32B. Blanchfield complexes	419
32C. Fibred Seifert and Blanchfield complexes	425
32D. Based Seifert and Blanchfield complexes	429
32E. Minimal Seifert complexes	435
33. Knot theory	443
33A. The Seifert complex of an n -knot	443
33B. Fibred n -knots	445
33C. The Blanchfield complex of an n -knot	446

33D. Simple n -knots	448
33E. The Alexander polynomials of an n -knot	450
34. Endomorphism L-theory	453
34A. Endometric structures	454
34B. The trace map χ_x	463
35. Primary L-theory	467
35A. Endomorphism L -theory	468
35B. Isometric L -theory	472
35C. Automorphism L -theory	474
35D. Asymmetric L -theory	477
36. Almost symmetric L-theory	485
37. L-theory of fields and rational localization	491
37A. Fields	491
37B. Rational localization	495
38. L-theory of Dedekind rings	499
39. L-theory of function fields	511
39A. L -theory of $F(x)$ ($\bar{x} = x$)	512
39B. L -theory of $F(s)$ ($\bar{s} = 1 - s$)	524
39C. L -theory of $F(z)$ ($\bar{z} = z^{-1}$)	532
39D. The asymmetric L -theory of F	543
39E. The automorphism L -theory of F	550
40. The multisignature	561
40A. Isometric multisignature	563
40B. Asymmetric multisignature	565
40C. The ω -signatures	567
40D. Automorphism multisignature	573
41. Coupling invariants	583
41A. Endomorphism L -theory	584
41B. Isometric L -theory	594
41C. Automorphism L -theory	599
42. The knot cobordism groups	607

Appendix

The history and applications of open books (by H.E.Winkelkemper)	615
