|                                                                                                                                                                  | Page |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Preface                                                                                                                                                          |      |
| General Concepts on Structure Identification<br><i>by J.P. Bonnet and J. Delville</i> .....                                                                      | 1    |
| New Aspects of Vortex Dynamics Relevant to Coherent Structures<br>in Turbulent Flows<br><i>by W. Schoppa and F. Hussain</i> .....                                | 61   |
| Stochastic Estimation of the Structure of Turbulent Fields<br><i>by R.J. Adrian</i> .....                                                                        | 145  |
| Topological Classification and Identification<br>of Small-Scale Turbulence Structure<br><i>by J.C. Vassilicos</i> .....                                          | 197  |
| Low Dimensional Models, Wavelet Transforms and Control<br><i>by N. Aubry, G. Berkooz, B. Coller, J. Elezgaray, P. Holmes,<br/>J.L. Lumley and A. Poje</i> .....  | 271  |
| Direct and Large-Eddy Simulations of Coherent Vortices in Three-<br>Dimensional Turbulence: Geophysical and Industrial Applications<br><i>by O. Métais</i> ..... | 333  |
