	Preface	<i>XI</i>
	List of Examples	<i>XIII</i>
	Introduction	<i>1</i>
	References	<i>2</i>
1	Prologue	<i>3</i>
1.1	Tides in Newton's Gravity	<i>3</i>
1.2	Relativity	<i>8</i>
2	A Brief Review of General Relativity	<i>11</i>
2.1	Differential Geometry	<i>12</i>
2.1.1	Coordinates and Distances	<i>12</i>
2.1.2	Vectors	<i>14</i>
2.1.3	Connections	<i>16</i>
2.1.4	Geodesics	<i>24</i>
2.1.5	Curvature	<i>25</i>
2.1.6	Geodesic Deviation	<i>31</i>
2.1.7	Ricci and Einstein Tensors	<i>32</i>
2.2	Slow Motion in Weak Gravitational Fields	<i>32</i>
2.3	Stress-Energy Tensor	<i>34</i>
2.3.1	Perfect Fluid	<i>36</i>
2.3.2	Electromagnetism	<i>38</i>
2.4	Einstein's Field Equations	<i>38</i>
2.5	Newtonian Limit of General Relativity	<i>40</i>
2.5.1	Linearized Gravity	<i>40</i>
2.5.2	Newtonian Limit	<i>43</i>
2.5.3	Fast Motion	<i>44</i>
2.6	Problems	<i>45</i>
	References	<i>47</i>
3	Gravitational Waves	<i>49</i>
3.1	Description of Gravitational Waves	<i>49</i>
3.1.1	Propagation of Gravitational Waves	<i>55</i>

3.2	Physical Properties of Gravitational Waves	58
3.2.1	Effects of Gravitational Waves	58
3.2.2	Energy Carried by a Gravitational Wave	66
3.3	Production of Gravitational Radiation	69
3.3.1	Far- and Near-Zone Solutions	69
3.3.2	Gravitational Radiation Luminosity	74
3.3.3	Radiation Reaction	78
3.3.4	Angular Momentum Carried by Gravitational Radiation	80
3.4	Demonstration: Rotating Triaxial Ellipsoid	80
3.5	Demonstration: Orbiting Binary System	84
3.6	Problems	91
	References	95
4	Beyond the Newtonian Limit	97
4.1	Post-Newtonian	97
4.1.1	System of Point Particles	104
4.1.2	Two-Body Post-Newtonian Motion	109
4.1.3	Higher-Order Post-Newtonian Waveforms for Binary Inspiral	114
4.2	Perturbation about Curved Backgrounds	114
4.2.1	Gravitational Waves in Cosmological Spacetimes	119
4.2.2	Black Hole Perturbation	123
4.3	Numerical Relativity	130
4.3.1	The Arnowitt–Deser–Misner (ADM) Formalism	130
4.3.2	Coordinate Choice	139
4.3.3	Initial Data	141
4.3.4	Gravitational-Wave Extraction	143
4.3.5	Matter	143
4.3.6	Numerical Methods	144
4.4	Problems	145
	References	147
5	Sources of Gravitational Radiation	149
5.1	Sources of Continuous Gravitational Waves	151
5.2	Sources of Gravitational-Wave Bursts	157
5.2.1	Coalescing Binaries	157
5.2.2	Gravitational Collapse	165
5.2.3	Bursts from Cosmic String Cusps	169
5.2.4	Other Burst Sources	170
5.3	Sources of a Stochastic Gravitational-Wave Background	171
5.3.1	Cosmological Backgrounds	172
5.3.2	Astrophysical Backgrounds	191
5.4	Problems	194
	References	196
6	Gravitational-Wave Detectors	197
6.1	Ground-Based Laser Interferometer Detectors	198

6.1.1	Notes on Optics	203
6.1.2	Fabry–Pérot Cavity	207
6.1.3	Michelson Interferometer	211
6.1.4	Power Recycling	214
6.1.5	Readout	216
6.1.6	Frequency Response of the Initial LIGO Detector	221
6.1.7	Sensor Noise	226
6.1.8	Environmental Sources of Noise	230
6.1.9	Control System	239
6.1.10	Gravitational-Wave Response of an Interferometric Detector	241
6.1.11	Second Generation Ground-Based Interferometers (and Beyond)	244
6.2	Space-Based Detectors	251
6.2.1	Spacecraft Tracking	251
6.2.2	LISA	252
6.2.3	Decihertz Experiments	256
6.3	Pulsar Timing Experiments	256
6.4	Resonant Mass Detectors	260
6.5	Problems	265
	References	267
7	Gravitational-Wave Data Analysis	269
7.1	Random Processes	269
7.1.1	Power Spectrum	270
7.1.2	Gaussian Noise	273
7.2	Optimal Detection Statistic	275
7.2.1	Bayes's Theorem	275
7.2.2	Matched Filter	276
7.2.3	Unknown Matched Filter Parameters	277
7.2.4	Statistical Properties of the Matched Filter	279
7.2.5	Matched Filter with Unknown Arrival Time	281
7.2.6	Template Banks of Matched Filters	282
7.3	Parameter Estimation	286
7.3.1	Measurement Accuracy	286
7.3.2	Systematic Errors in Parameter Estimation	289
7.3.3	Confidence Intervals	291
7.4	Detection Statistics for Poorly Modelled Signals	293
7.4.1	Excess-Power Method	293
7.5	Detection in Non-Gaussian Noise	295
7.6	Networks of Gravitational-Wave Detectors	298
7.6.1	Co-located and Co-aligned Detectors	298
7.6.2	General Detector Networks	300
7.6.3	Time-Frequency Excess-Power Method for a Network of Detectors	303
7.6.4	Sky Position Localization for Gravitational-Wave Bursts	305
7.7	Data Analysis Methods for Continuous-Wave Sources	307
7.7.1	Search for Gravitational Waves from a Known, Isolated Pulsar	309

7.7.2	All-Sky Searches for Gravitational Waves from Unknown Pulsars	316
7.8	Data Analysis Methods for Gravitational-Wave Bursts	317
7.8.1	Searches for Coalescing Compact Binary Sources	318
7.8.2	Searches for Poorly Modelled Burst Sources	332
7.9	Data Analysis Methods for Stochastic Sources	333
7.9.1	Stochastic Gravitational-Wave Point Sources	344
7.10	Problems	345
	References	347
8	Epilogue: Gravitational-Wave Astronomy and Astrophysics	349
8.1	Fundamental Physics	349
8.2	Astrophysics	351
	References	353
	Appendix A Gravitational-Wave Detector Data	355
A.1	Gravitational-Wave Detector Site Data	355
A.2	Idealized Initial LIGO Model	359
	References	361
	Appendix B Post-Newtonian Binary Inspiral Waveform	363
B.1	TaylorT1 Orbital Evolution	366
B.2	TaylorT2 Orbital Evolution	366
B.3	TaylorT3 Orbital Evolution	367
B.4	TaylorT4 Orbital Evolution	368
B.5	TaylorF2 Stationary Phase	369
	References	370
	Index	371
