Chapter 1

Basic Laser Physics and Safety. 1

RONALD G. WHEELAND

History	1
What Is Light?	1
What Is a Laser?	2
Currently Available Technology	5
How Does Laser Light Interact with Tissue?	5
What Is a Q-Switched Laser?	6
Indications	7
Vascular Lesions	7
Pigmented Lesions and Tattoos	7
Unwanted Hair	8
Ablative and Nonablative Facial Resurfacing	8
Safety	8
Training	8
Signage	8
Eye Protection	9
Laser Plume	10
Laser Splatter	10
Fire	10
Future.	10
References	10

Chapter 2

Laser Treatment of Vascular Lesions . . 13

SEAN W. LANIGAN

History	13
Port Wine Stain Treatment	13
Currently Available Lasers for Vascular Lesions	16
Indications	16
Port Wine Stains	17
Capillary (Strawberry) Hemangiomas . . .	20
Leg Veins and Telangiectasia	21

Facial Telangiectasia	24
Psoriasis	26
Scars	26
Verrucae	27
Treatment of Other Cutaneous	
Vascular Lesions	28
Disadvantages	28
Contraindications	29
Personal Laser Technique	30
Facial Telangiectasia	30
Port Wine Stains	32
Postoperative Care	33
Complications	33
The Future	34
References	34

Chapter 3

Laser Treatment of Pigmented Lesions 37

CHRISTINE C. DIERICKX

History	37
Selective Photothermolysis	37
Pigmented Lesion Removal	
by Selective Photothermolysis	37
Currently Available Technology	38
Lasers and Intense Pulsed Light Sources	
Used to Treat Pigmented Lesions	
and Tattoos	38
Indications	44
Epidermal Pigmented Lesions	44
Dermal-Epidermal Pigmented Lesions	46
Dermal Pigmented Lesions	47
Tattoos	48
Consent.	49
Personal Laser Technique	49
Q-Switched Ruby Laser (694 nm)	50
Q-Switched Nd:YAG Laser (532–1064 nm)	51
Q-Switched Alexandrite Laser (755 nm)	55
Pulsed Dye Laser (510 nm)	55

Continuous Wave (CW) Lasers	55
CO ₂ and Erbium Lasers	55
Intense Pulsed Light (IPL) Sources	55
Further Treatment Pearls	56
Complications	58
Future Developments.	59
References	59

Chapter 4

Laser Treatment of Unwanted Hair 61

DAVID J. GOLDBERG, MUSSARRAT HUSSAIN

History	61
Selective Photohermolysis	62
Extended Theory of Selective Photothermolysis.	62
Physical Basis of Laser Hair Removal	62
Pulse Duration	63
Spot Size	63
Fluence	63
Factors Affecting Efficacy/Results	63
Hair Color	63
Growth Centers of Hairs	64
Hair Cycle	64
Cooling	65
Age	65
Hormones	65
Currently Available Lasers and Light Sources Used for Hair Removal	66
Ruby Lasers	66
Alexandrite Lasers	67
Diode Lasers	68
Nd:YAG Lasers	68
Q-Switched Nd:YAG Laser	69
Intense Pulsed Light Systems	69
Advantages	70
Disadvantages	70
Indications	70
Contraindications	71
Consent.	71
Personal Laser Approach	71
Alexandrite Laser	71
Diode Laser	73
Nd:YAG Laser	73
IPL	77
Treatment Approach	78
Postoperative Considerations	79
Complications	79
Pigmentary Changes	79

Hypopigmentation	79
Hyperpigmentation	79
Pain	80
Scarring and Textural Changes	80
Effects on Tattoos and Freckles	80
Infections	80
Plume	80
The Future	80
References	80

Chapter 5

Ablative and Nonablative

Facial Resurfacing 83

SUZANNE L. KILMER, NATALIE SEMCHYSHYN

History	83
Ablative Resurfacing	84
Currently Available Technology	84
Advantages	84
Disadvantages	85
Indications	85
Contraindications	85
Consent	85
Personal Laser Technique	88
Postoperative Care and Complications	89
Results	90
The Future	90
Nonablative Resurfacing	90
Currently Available Technology	90
Advantages	92
Disadvantages	93
Indications	93
Contraindications	93
Consent	93
Personal Laser Technique	93
Postoperative Care and Complications	95
Results	95
The Future	95
References	98

Chapter 6

Lasers, Photodynamic Therapy, and the Treatment of Medical Dermatologic Conditions. 99

MICHAEL H. GOLD

History of Photodynamic Therapy.	99
Currently Available Technology	101

Photodynamic Therapy: The Experience with Actinic Keratoses in the United States	101
Photodynamic Therapy: New Indications for Photodynamic Photo- rejuvenation in the United States	103
Photodynamic Therapy: The (Primarily) European Experience with Actinic Keratoses and Skin Cancers	106
Photodynamic Therapy – Other Indications	107
Advantages	112
Psoriasis and Disorders of Hypopigmentation	113

Disadvantages	118
Contraindications	118
Personal Laser Technique	119
ALA-PDT Technique	119
Postoperative Care	119
Postoperative Care Following ALA-PDT	119
Postoperative Care for Psoriasis and Disorders of Hypopigmentations	120
The Future	120
References	120
 Subject Index	 123
