Introduction	v
Remerciements / Acknowledgements	ix
Liste des participants / List of participants	xi
Table des matières / Table of contents	xvii
L. J. ALEX and L. L. FOSTER. <i>Exponential Diophantine equations</i>	1
A. ARENAS. <i>Quantitative aspects of the representations of integers by quadratic forms</i>	7
R.C. BAKER. <i>Diagonal cubic equations, I</i>	15
DANIEL BEREND. <i>Irrational dilations of approximate multiplicative semigroups of integers</i>	29
ROLF BERNDT. <i>Some special features of the Jacobi group</i> .	41
M.J. BERTIN. <i>Généralisation de suites de Pisot et de suites de Boyd</i>	51
DAVID W. BOYD. <i>Salem numbers of degree four have periodic expansions</i>	57
J.L. BRENNER and R.J. LIST. <i>Applications of partition theory to groups: Covering the alternating group by products of conjugacy classes</i>	65
GREGORY S. CALL. <i>Variation of local heights on an algebraic family of abelian varieties</i>	72

HENRI COHEN. <i>Sur une fausse forme modulaire liée à des identités de Ramanujan et Andrews</i>	97
DAVID R. DORMAN. <i>Global orders in definite quaternion algebras as endomorphism rings for reduced CM-elliptic curves</i> . .	108
MICHAEL DRMOTA and ROBERT F. TICHY. <i>Distribution properties of continuous curves</i>	117
D.S. DUMMIT. <i>On the torsion in quotients of the multiplicative groups in abelian extensions</i>	128
A.G. EARNEST. <i>Binary quadratic forms over rings of algebraic integers: a survey of recent results</i>	133
MICHEL EMSALEM. <i>Places totalement décomposées dans des $\mathbb{Z}_p$-extensions d'un corps de nombres</i>	160
PAUL ERDÖS et JEAN-LOUIS NICOLAS. <i>Grandes valeurs de fonctions liées aux diviseurs premiers</i>	169
J. FABRYKOWSKI and M.V. SUBBARAO. <i>The maximal order and the average order of multiplicative function $\sigma^{(e)}(n)$</i>	201
HENRI FAURE. <i>Discrépance quadratique de suites infinies en dimension un</i>	207
MARY E. FLAHIVE. <i>Integral solutions of linear systems</i> . .	213
JOHN B. FRIEDLANDER. <i>Fractional parts of sequences</i> . .	220
EDUARDO FRIEDMAN and LAWRENCE C. WASHINGTON. <i>On the distribution of divisor class groups of curves over a finite field</i>	227
AKIO FUJII. <i>Diophantine approximation, Kronecker's limit formula and the Riemann Hypothesis</i>	240
PAUL GERARDIN. <i>Le théorème de Riemann-Roch et les corps de nombres algébriques</i>	251

PAUL GERARDIN and WEN-CH'ING WINNIE LI. <i>Functional equations and periodic sequences</i>	267
R. GOLD and H. KISILEVSKY. <i>$\mathbb{Z}_p$-extensions of function fields</i>	280
DANIEL M. GORDON. <i>Pseudoprimes on elliptic curves</i> . .	290
ANDREW GRANVILLE. <i>Least primes in arithmetic progressions</i>	306
CORNELIUS GREITHER. <i>Cyclic Galois extensions and normal bases</i>	322
S. GURAK. <i>Cubic and biquadratic pseudoprimes of Lucas type</i>	330
J. L. HAFNER and A. IVIĆ. <i>On some mean value results for the Riemann zeta-function</i>	348
CHARLES HELOU. <i>Classical explicit reciprocity</i>	359
DOUGLAS HENSLEY. <i>The distribution of badly approximable numbers and continuants with bounded digits</i>	371
NORIKO HIRATA. <i>Approximation de périodes de fonctions méromorphes</i>	386
JEFF HOFFSTEIN and M. RAM MURTY. <i>L-series of automorphic forms on $GL(3, \mathbb{R})$</i>	398
MARC HUTTNER. <i>Equations différentielles Fuchsiennes et approximations diophantiennes</i>	409
MARTIN N. HUXLEY. <i>Exponential sums and the Riemann zeta function</i>	417
ALEKSANDAR IVIĆ. <i>Some recent results on the Riemann zeta-function</i>	424
C.U. JENSEN. <i>On the representations of a group as a Galois group over an arbitrary field</i>	441

S. KANEMITSU.	<i>On evaluation of certain limits in closed form</i>	459
ERNST KANI.	<i>Potential theory on curves</i>	475
I. KATAI.	<i>Characterization of arithmetical functions, problems and results</i>	544
H. KISILEVSKY and J. LABUTE.	<i>On a sufficient condition for the p-class tower of a CM-field to be infinite</i>	556
E. LAMPRECHT.	<i>Calculation of general Gauss sums and quadratic Gauss sums in finite rings</i>	561
M. LANGEVIN, E. REYSSAT and G. RHIN.	<i>Transfinite diameter and Favard's problems on diameters of algebraic integers</i>	574
BEN LICHTIN.	<i>Poles of Dirichlet series and D-modules</i> . .	579
MING-CHIT LIU and KAI-MAN TSANG.	<i>Small prime solutions of linear equations</i>	595
HELMUT MAIER and CARL POMERANCE.	<i>Unusually large gaps between consecutive primes</i>	625
HIROO MIKI.	<i>On the congruence for Gauss sums and its applications</i>	633
KATSUYA MIYAKE.	<i>On central extensions</i>	642
R.A. MOLLIN and H.C. WILLIAMS.	<i>Prime producing quadratic polynomials and real quadratic fields of class number one</i> .	654
R. MORIKAWA.	<i>Disjoint systems of rational Beatty sequences</i>	664
HANS H. MÜLLER, HARALD STRÖHER and HORST G. ZIMMER.	<i>Complete determination of all torsion groups of elliptic curves with integral absolute invariant over quadratic and pure cubic fields</i>	671

HELMUT MÜLLER. <i>On generalized zeta-functions</i>	699
T. NADESALINGAM and JANE PITMAN. <i>Bounds for solutions of simultaneous diagonal equations of odd degree</i>	703
MELVYN B. NATHANSON. <i>Long arithmetic progressions and powers of 2</i>	735
THONG NGUYEN QUANG DO. <i>Sur la cohomologie de certains modules galoisiens p-ramifiés</i>	740
GEORG WERNER NOWAK. <i>On Euler's ϕ-function in quadratic number fields</i>	755
MICHIO OZEKI. <i>Ternary code construction of even unimodular lattices</i>	772
Y.-F. S. PETERMANN. <i>On the distribution of values of an error term related to the Euler function</i>	785
PATRICE PHILIPPON et MICHEL WALDSCHMIDT. <i>Formes linéaires de logarithmes elliptiques et mesures de transcendance</i>	798
JUKKA PIHKO. <i>On a question of Tverberg</i>	806
K. RAMACHANDRA. <i>Titchmarsh series</i>	811
MICHAEL ROSEN and KARL ZIMMERMANN. <i>Galois representations associated to generic formal groups</i> . . .	816
VICTOR SNAITH. <i>A local construction of the local root numbers</i>	823
LAWRENCE SOMER. <i>On Fermat d-pseudoprimes</i>	841
ALAN H. STEIN. <i>Exponential sums of digit counting functions</i>	861
A.J. STEPHENS and H. C. WILLIAMS. <i>Some computational results on a problem of Eisenstein</i>	869

GLENN STEVENS. <i>The Eisenstein measure and real quadratic fields</i>	887
M.V. SUBBARAO and L.W. YIP. <i>Carmichael's conjecture and some analogues</i>	928
ROBERT TUBBS. <i>The algebraic independence of three numbers: Schneider's method</i>	942
ROBERT G. VAN METER. <i>The number of solutions of certain equations of the form $f(x_m) = g(y_n)$ over a finite field</i> . .	968
R. V. WALLISSER. <i>On entire functions assuming integer values in a geometric sequence</i>	981
LAWRENCE C. WASHINGTON. <i>Stickelberg's theorem for cyclotomic fields, in the spirit of Kummer and Thaine</i> . .	990
THOMAS WYLER. <i>A propos d'un lemme de K. Kato sur le groupe de Brauer en caractéristique p</i>	994
