

Combinatorial Number Theory

Proceedings of the
'Integers Conference 2005'
in Celebration of the
70th Birthday of Ronald Graham
Carrollton, Georgia, USA,
October 27–30, 2005

Editors

Contents

Preface	v
<i>B. Alexeev, J. Fox, and R. Graham</i>	
On minimal colorings without monochromatic solutions to a linear equation ...	1
<i>G. Apel, R. Blecksmith, and J. Brillhart</i>	
Algorithms for finding and proving balanced Q^2 identities	23
<i>R. Balasubramanian and G. Bhowmik</i>	
Upper bounds for the Davenport constant	61
<i>C. Ballot</i>	
An elementary method to compute prime densities in $\mathbb{F}_q[X]$	71
<i>N. D. Baruah and J. Bora</i>	
Further analogues of the Rogers-Ramanujan functions with applications to partitions	81
<i>O. Trifonov and S. E. Behum</i>	
On a problem of Ore	103
<i>A. Bialostocki</i>	
Some problems in view of recent developments of the Erdős Ginzburg Ziv theorem	111
<i>F. Chung and R. Graham</i>	
Universal juggling cycles	121
<i>S. Corteel, S. Lee, and C. D. Savage</i>	
Five guidelines for partition analysis with applications to lecture hall-type theorems	131
<i>E. Croot, I. Ruzsa, and T. Schoen</i>	
Arithmetic progressions in sparse sumsets	157
<i>S. Eliahou, J.M. Marín, and M. P. Revuelta</i>	
Zero-sum balanced binary sequences	165
<i>J. Fox, V. Jungić, and R. Radoičić</i>	
Sub-Ramsey numbers for arithmetic progressions and Schur triples	179
<i>A. S. Fraenkel</i>	
The Raleigh game	199
<i>A. Fraenkel and A. Kontorovich</i>	
The Sierpiński sieve of Nin-varieties and binomial coefficients	209

<i>R. Graham</i>	
Some of my favorite problems in Ramsey theory	229
<i>G. Grekos</i>	
Extremal problems about asymptotic bases: a survey	237
<i>S. Heubach, T. Mansour</i>	
Enumeration of 3-letter patterns in compositions	243
<i>N. Hindman</i>	
Partition regularity of matrices	265
<i>B. Hopkins and J. A. Sellers</i>	
Exact enumeration of Garden of Eden partitions	299
<i>A. Khodkar and B. Landman</i>	
Recent progress in Ramsey theory on the integers	305
<i>T. Komatsu</i>	
Some combinatorial properties of the leaping convergents	315
<i>D. Leach and M. Walsh</i>	
A characterization of lattice-ordered graphs	327
<i>T. LeSaulnier and A. Robertson</i>	
On monochromatic ascending waves	333
<i>V. F. Lev</i>	
More on points and arcs	347
<i>F. Luca and C. Pomerance</i>	
Irreducible radical extensions and Euler-function chains	351
<i>G. L. Matthews and R. S. Robinson</i>	
A variant of the Frobenius problem and generalized Suzuki semigroups	363
<i>M. B. Nathanson</i>	
Linear quantum addition rules	371
<i>J. Nešetřil and O. Serra</i>	
Semigroups with the Erdős-Turán property	381
<i>R. J. Nowakowski and A. A. Siegel</i>	
Partizan geography on $K_n \times K_2$	389
<i>K. O'Bryant</i>	
On Z.-W. Sun's disjoint congruence classes conjecture	403
<i>K. Shelton</i>	
The game of Take Turn	413

P. Stănică

Graph eigenvalues and Walsh spectrum of Boolean functions431

Z. W. Sun

On covering numbers443

D. Zeilberger

Symbolic moment calculus II:

Why is Ramsey theory sooooo eeeenormously hard?455

List of participants461

Publications of Ron L. Graham463
