Preface	v
Mathematics and Chance	1
I Probability Theory	5
1 Principles of Modelling Chance	7
1.1 Probability Spaces	7
1.2 Properties and Construction of Probability Measures	14
1.3 Random Variables	19
Problems	23
2 Stochastic Standard Models	26
2.1 The Uniform Distributions	26
2.2 Urn Models with Replacement	29
2.3 Urn Models without Replacement	34
2.4 The Poisson Distribution	37
2.5 Waiting Time Distributions	39
2.6 The Normal Distributions	44
Problems	46
3 Conditional Probabilities and Independence	50
3.1 Conditional Probabilities	50
3.2 Multi-Stage Models	56
3.3 Independence	63
3.4 Existence of Independent Random Variables, Product Measures	69
3.5 The Poisson Process	73
3.6 Simulation Methods	78
3.7 Tail Events	82
Problems	84

4	Expectation and Variance	90
4.1	The Expectation	90
4.2	Waiting Time Paradox and Fair Price of an Option	98
4.3	Variance and Covariance	105
4.4	Generating Functions	108
	Problems	112
5	The Law of Large Numbers and the Central Limit Theorem	117
5.1	The Law of Large Numbers	117
5.2	Normal Approximation of Binomial Distributions	129
5.3	The Central Limit Theorem	136
5.4	Normal versus Poisson Approximation	141
	Problems	143
6	Markov Chains	149
6.1	The Markov Property	149
6.2	Absorption Probabilities	152
6.3	Asymptotic Stationarity	157
6.4	Recurrence	169
	Problems	177
II	Statistics	185
7	Estimation	187
7.1	The Approach of Statistics	187
7.2	Facing the Choice	191
7.3	The Maximum Likelihood Principle	195
7.4	Bias and Mean Squared Error	201
7.5	Best Estimators	203
7.6	Consistent Estimators	209
7.7	Bayes Estimators	213
	Problems	217
8	Confidence Regions	222
8.1	Definition and Construction	222
8.2	Confidence Intervals in the Binomial Model	228
8.3	Order Intervals	234
	Problems	238

9	Around the Normal Distributions	241
9.1	The Multivariate Normal Distributions	241
9.2	The χ^2 -, F - and t -Distributions	244
	Problems	251
10	Hypothesis Testing	255
10.1	Decision Problems	255
10.2	Neyman–Pearson Tests	261
10.3	Most Powerful One-Sided Tests	266
10.4	Parameter Tests in the Gaussian Product Model	269
	Problems	278
11	Asymptotic Tests and Rank Tests	283
11.1	Normal Approximation of Multinomial Distributions	283
11.2	The Chi-Square Test of Goodness of Fit	290
11.3	The Chi-Square Test of Independence	297
11.4	Order and Rank Tests	303
	Problems	313
12	Regression Models and Analysis of Variance	318
12.1	Simple Linear Regression	318
12.2	The Linear Model	322
12.3	The Gaussian Linear Model	326
12.4	Analysis of Variance	334
	Problems	342
	Tables	349
	References	355
	List of Notation	359
	Index	363
