

Table of Contents

Image Processing

Architecture of an Integrated Software-Hardware System for Accelerated Image Processing	1
<i>Bogusław Cyganek</i>	
A Fast Logical-Morphological Method to Segment Scratch - Type Objects	14
<i>Andreas Kuleschow, Christian Münzenmayer, and Klaus Spinnler</i>	
Spatio-Temporal Track-Before-Detect Algorithm for Interlaced and Progressive Scan Imaging Sensors	24
<i>Przemysław Mazurek</i>	
Road Lane Detection with Elimination of High-Curvature Edges	33
<i>Krzysztof Ślot, Michał Strzelecki, Agnieszka Krawczyńska, and Maciej Polańczyk</i>	

Image Quality Assessment

A Statistical Reduced-Reference Approach to Digital Image Quality Assessment	43
<i>Krzysztof Okarma and Piotr Lech</i>	
Colour Image Quality Assessment Using Structural Similarity Index and Singular Value Decomposition	55
<i>Krzysztof Okarma</i>	
Top-Down Approach to Image Similarity Measures	66
<i>Jacek Piotrowski</i>	
The Influence of Picture Quality Scale Measure on Choosing the Wavelet Transform during Image Compression	70
<i>Maria Skublewska-Paszkowska and Jakub Smółka</i>	
Image Quality Assessment Using Phase Spectrum Correlation	80
<i>Przemysław Skurowski and Aleksandra Gruca</i>	

Geometrical Models of Object and Scenes

A New Image Fusion Method for Estimating 3D Surface Depth	90
<i>Marcin Denkowski, Michał Chlebiej, and Paweł Mikotajczak</i>	

Collecting 3D Content: Examples from Art and Medicine	100
<i>Leszek Luchowski</i>	
3D Object Reconstruction from Parallel Cross-Sections	111
<i>Karolina Nurzyńska</i>	
Implementation of Progressive Meshes for Hierarchical Representation of Cultural Artifacts.....	123
<i>Krzysztof Skabek and Lukasz Zgbik</i>	

Motion Analysis, Visual Navigation and Active Vision

Multi-Object Tracking Based on Particle Filter and Data Association in Color Image Sequences	133
<i>Ayoub Al-Hamadi, Saira Saleem Pathan, and Bernd Michaelis</i>	
Residual of Resonant SVD as Salient Feature	143
<i>Dmitry Chelverikov</i>	
Building Pedestrian Contour Hierarchies for Improving Detection in Traffic Scenes.....	154
<i>Ion Giosan and Sergiu Nedevschi</i>	
Potential Field Based Camera Collisions Detection within Translating 3D Objects.....	164
<i>Adam Wojciechowski</i>	

Image and Video Coding

A Simple Quantitative Model of AVC/H.264 Video Coders	174
<i>Tomasz Grajek and Marek Domański</i>	
Approximation of Signals by Predict Wavelet Transform	184
<i>Marcin Jaromin</i>	
Homogeneous Video Transcoding of H.264/AVC Intra Coded Frames	198
<i>Jarosław Marek</i>	
Lossless and Near-Lossless Image Compression Scheme Utilizing Blending-Prediction-Based Approach	208
<i>Grzegorz Ulacha and Piotr Dziurzanski</i>	

Virtual Reality and Multimedia Applications

Marker Less Vision-Based Tracking of Partially Known 3D Scenes for Outdoor Augmented Reality Applications	218
<i>Fakhreddine Ababsa, Jean-Yves Didier, Imane Zendjebil, and Malik Mallem</i>	
Geometric and Optical Flow Based Method for Facial Expression Recognition in Color Image Sequences	228
<i>Ayoub Al-Hamadi, Robert Niese, Saira S. Pathan, and Bernd Michaelis</i>	
Local Rank Patterns – Novel Features for Rapid Object Detection	239
<i>Michal Hradis, Adam Herout, and Pavel Zemcik</i>	
Detection of Dogs in Video Using Statistical Classifiers	249
<i>Roman Juránek</i>	
Automatic Video Editing for Multimodal Meetings	260
<i>Radek Kubicek, Pavel Zak, Pavel Zemcik, and Adam Herout</i>	
Foreground Segmentation via Segments Tracking	270
<i>Bogdan Kwolek</i>	
Multi-layer Background Change Detection Based on Spatiotemporal Texture Projections	282
<i>Roland Mieziako and Dragoljub Pokrajac</i>	

Biomedical Applications

The Development and Validation of a Method for 4D Motion Reconstruction of a Left Ventricle	292
<i>Michał Chlebiej, Marcin Denkowski, and Krzysztof Nowiński</i>	
Estimation of Eye Blinking Using Biopotentials Measurements for Computer Animation Applications	302
<i>Robert Krupiński and Przemysław Mazurek</i>	
Approximation of Subtle Pathology Signs in Multiscale Domain for Computer-Aided Ischemic Stroke Diagnosis	311
<i>Artur Przelaskowski, Rafał Józwiak, Grzegorz Ostrek, and Katarzyna Sklinda</i>	
Iris Identification Using Geometrical Wavelets	322
<i>Mariusz Rachubiński</i>	
Numerical Simulation of Endoscopic Images in Photodynamic Diagnosis	333
<i>Andrzej Zacher</i>	

Practical Applications of Pattern Recognition

Mixtures of Classifiers for Recognizing Standing and Running Pedestrians	345
<i>Raluca Borca-Mureşan, Sergiu Nedevschi, and Florin Măguran</i>	
Automatic Classification of Wood Defects Using Support Vector Machines	356
<i>Irene Y.H. Gu, Henrik Andersson, and Raúl Vicen</i>	
Automatic Surveillance and Analysis of Snow and Ice Coverage on Electrical Insulators of Power Transmission Lines	368
<i>Irene Y.H. Gu, Unai Sistiaga, Sonja M. Berlijn, and Anders Fahlström</i>	
GP-GPU Implementation of the “Local Rank Differences” Image Feature	380
<i>Adam Herout, Radovan Josth, Pavel Zemcik, and Michal Hradis</i>	
Image Recognition Technique for Unmanned Aerial Vehicles	391
<i>Karol Jędrasiak and Aleksander Nawrat</i>	
The Performance of Two Deformable Shape Models in the Context of the Face Recognition	400
<i>Adam Schmidt and Andrzej Kasinski</i>	
A Hierarchical Model for the Recognition of Deformable Objects	410
<i>Martin Stommel and Klaus-Dieter Kuhnert</i>	

Computer Animation

Exploiting Quaternion PCA in Virtual Character Motion Analysis	420
<i>Tomasz Grudzinski</i>	
A Scene Graph-Oriented Particle System for Real-Time 3D Graphics ...	430
<i>Jakub Grudziński</i>	
Debugging, Object and State Management with OpenGL 1.x and 2.x ...	441
<i>Jarosław Konrad Lipowski</i>	
Estimation of State-Space Spatial Component for Cuboid Track-Before-Detect Motion Capture Systems	451
<i>Przemysław Mazurek</i>	

Visualization and Graphical Data Presentation

Automatic Extraction of Graph-Like Structures from Binary Images	461
<i>Marcin Iwanowski</i>	

‘SNN3DViewer’ - 3D Visualization Tool for Spiking Neural Network Analysis	469
<i>Andrzej Kasiński, Juliusz Pawłowski, and Filip Ponulak</i>	
Using Graph Transformations in Distributed Adaptive Design System	477
<i>Leszek Kotulski and Barbara Strug</i>	
The Lifting Scheme for Multiresolution Wavelet-Based Transformation of Surface Meshes with Additional Attributes	487
<i>Agnieszka Szczęсна</i>	
Author Index	497
