

Table of Contents

Invited Papers

Model-Based Knowledge Representation and Reasoning Via Answer Set Programming	1
<i>Torsten Schaub</i>	
On the Algebraic Foundation of Proof Assistants for Intuitionistic Type Theory	3
<i>Andreas Abel, Thierry Coquand, and Peter Dybjer</i>	
Substructural Type Systems for Program Analysis	14
<i>Naoki Kobayashi</i>	

Refereed Papers

Constraints I

Integrating Answer Set Reasoning with Constraint Solving Techniques	15
<i>Veena S. Mellarkod and Michael Gelfond</i>	
Optimizing Compilation of CHR with Rule Priorities	32
<i>Leslie De Koninck, Peter J. Stuckey, and Gregory J. Duck</i>	

Constructive Arithmetic

Certified Exact Real Arithmetic Using Co-induction in Arbitrary Integer Base	48
<i>Nicolas Julien</i>	
Pure, Declarative, and Constructive Arithmetic Relations (Declarative Pearl)	64
<i>Oleg Kiselyov, William E. Byrd, Daniel P. Friedman, and Chung-chieh Shan</i>	

Dependent Types

On-Demand Refinement of Dependent Types	81
<i>Hiroshi Unno and Naoki Kobayashi</i>	
Proving Properties about Lists Using Containers	97
<i>Rawle Prince, Neil Ghani, and Conor McBride</i>	

Rewriting

Termination of Narrowing in Left-Linear Constructor Systems	113
<i>Germán Vidal</i>	
Complexity Analysis by Rewriting	130
<i>Martin Avanzini and Georg Moser</i>	
Rewriting and Call-Time Choice: The HO Case	147
<i>Francisco Javier López-Fraguas, Juan Rodríguez-Hortalá, and Jaime Sánchez-Hernández</i>	

Program Transformation

Semantics and Pragmatics of New Shortcut Fusion Rules	163
<i>Janis Voigtländer</i>	
A Generalization of the Folding Rule for the Clark-Kunen Semantics . . .	180
<i>Javier Álvez and Paqui Lucio</i>	

Logic and Lambda-Calculus

Types for Hereditary Head Normalizing Terms	195
<i>Makoto Tatsuta</i>	
A New Translation for Semi-classical Theories — Backtracking without CPS	210
<i>Satoshi Kobayashi</i>	

Types

Undoing Dynamic Typing (Declarative Pearl)	224
<i>Nick Benton</i>	
Typed Dynamic Control Operators for Delimited Continuations	239
<i>Yukiyoshi Kameyama and Takuo Yonezawa</i>	
Strictness Analysis Algorithms Based on an Inequality System for Lazy Types	255
<i>Hirofumi Yokouchi</i>	

Constraints II

Quantitative Logic Programming Revisited	272
<i>Mario Rodríguez-Artalejo and Carlos A. Romero-Díaz</i>	

Formalizing a Constraint Deductive Database Language Based on Hereditary Harrop Formulas with Negation	289
<i>Susana Nieva, Jaime Sánchez-Hernández, and Fernando Sáenz-Pérez</i>	

Debugging

Declarative Diagnosis of Missing Answers in Constraint Functional-Logic Programming	305
<i>Rafael Caballero, Mario Rodríguez Artalejo, and Rafael del Vado Vírveda</i>	
EasyCheck — Test Data for Free	322
<i>Jan Christiansen and Sebastian Fischer</i>	
Author Index	337
