## Introduction — 1

## Part I: Ergodic Rates for Markov Chains and Processes

### 1 Markov Chains with Discrete State Spaces — 7

- 1.1 Basic Definitions and Facts — 7
- 1.2 Ergodic Theorem — 9
  - 1.2.1 Ergodic Theorem for Finite MCs — 9
  - 1.2.2 “Analytic” Proof of Theorem 1.2.1: Contraction Argument — 11
  - 1.2.3 “Probabilistic” Proof of Theorem 1.2.1: Coupling Argument — 13
  - 1.2.4 Recurrence and Transience. Ergodic Theorem for Countable MCs — 15
- 1.3 Stationary MCs: Ergodicity, Mixing, and Limit Theorems — 17
- 1.4 Comments — 23

### 2 General Markov Chains: Ergodicity in Total Variation — 25

- 2.1 Basic Definitions and Facts — 25
- 2.2 Total Variation Distance and the Coupling Lemma — 27
- 2.3 Uniform Ergodicity: The Dobrushin theorem — 33
- 2.4 Preliminaries to Nonuniform Ergodicity: Motivation and Auxiliaries — 36
- 2.5 Stabilization of Transition Probabilities: Doob’s Theorem — 40
- 2.6 Nonuniform Ergodicity at Exponential Rate: The Harris Theorem — 45
- 2.7 Nonuniform Ergodicity at Subexponential Rates — 50
- 2.8 Lyapunov-Type Conditions — 55
  - 2.8.1 Linear Lyapunov-Type Condition and Exponential Ergodicity — 55
  - 2.8.2 Lyapunov-Type Condition for Cesàro Means of Moments — 58
  - 2.8.3 Sublinear Lyapunov-Type Conditions and Subexponential Ergodicity — 59
- 2.9 Dobrushin Condition: Sufficient Conditions and Alternatives — 67
- 2.10 Comments — 71

### 3 Markov Processes with Continuous Time — 73

- 3.1 Basic Definitions and Facts — 73
- 3.2 Ergodicity in Total Variation: The Skeleton Chain Approach — 74
- 3.3 Diffusion Processes — 85
  - 3.3.1 Lyapunov-Type Conditions — 85
  - 3.3.2 Dobrushin Condition — 90
  - 3.3.3 Summary — 91
- 3.4 Solutions to Lévy-Driven SDEs — 93
  - 3.4.1 Lyapunov-Type Condition: “Light Tails” Case — 94
  - 3.4.2 Lyapunov-Type Condition: “Heavy Tails” Case — 103
  - 3.4.3 Dobrushin Condition — 107

3.4.4	Summary —	109
3.5	Comments —	112
<b>4</b>	<b>Weak Ergodic Rates —</b>	<b>114</b>
4.1	Markov Models with Intrinsic Memory —	114
4.2	Dissipative Stochastic Systems —	117
4.2.1	“Warm-up” Calculation: Diffusions —	117
4.2.2	Dissipativity for a Solution to SDDE —	119
4.3	Coupling Distances for Probability Measures —	122
4.4	Measurable Selections and General Coupling Lemma for Probability Kernels —	128
4.5	Weak Ergodic Rates —	133
4.6	Application to Stochastic Delay Equations —	140
4.6.1	Lyapunov-Type Conditions —	141
4.6.2	Generalized Couplings and Construction of $d(x, y)$ —	143
4.6.3	Summary —	153
4.7	Comments —	155

## **Part II: Limit Theorems**

<b>5</b>	<b>The Law of Large Numbers and the Central Limit Theorem —</b>	<b>159</b>
5.1	Preliminaries —	159
5.2	The CLT for Weakly Ergodic Markov Chains —	166
5.2.1	The Martingale CLT —	166
5.2.2	The CLT for a Weakly Ergodic Markov Chain —	170
5.3	Extensions —	175
5.3.1	Non-Stationary Setting —	175
5.3.2	Continuous-Time Setting —	178
5.4	Comments —	181
<b>6</b>	<b>Functional Limit Theorems —</b>	<b>183</b>
6.1	Preliminaries —	183
6.2	Autoregressive Models with Markov Regime —	186
6.3	The Time Delay Method for General Autoregressive Models —	205
6.3.1	General Statements —	206
6.3.2	Averaging Principle and Diffusion Approximation for Systems with Fast Markov Perturbations —	216
6.3.3	A Fully Coupled System with Dissipative Fast Component —	230
6.4	Comments —	246

**Bibliography — 249**

**Index — 255**
