

Inhaltsverzeichnis

A “Common Core” Architecture as an Enabler for Cross-Platform Autonomous Driving

Felix Lotz, Ralph Grewe und Christopher Pinke

Towards Robust Single-Shot Monocular SLAM

Gregory Schroeder und Ahmed Hussein

Interpretable Approximation of Optimal Trajectories for Lateral Vehicle Guidance

Philip Dorpmüller, Thomas Schmitz, Martin Keller und Torsten Bertram

Improved Ultrasonic Sensing Using Machine Learning

Heinrich Gotzig, Mohamed-Elamir Mohamed, Raoul Zöllner und Patrick Mäder

Purpose-built vehicles: an evaluation of the existing knowledge and an analysis of the market potential

Martin Dorynek, Julia Winkler, Stefan Brettschneider und Klaus Bengler

AI-based perception and prediction of a critical event as a first step for shadow mode testing of the ACC function

Oliver Grüßer, Ralf Hofmann, Julien Marcelot und Jose Antonio Zarate Ramos

Digital Twins of Roads as a Basis for Virtual Driving Tests

Gunnar Gräfe und Martin Herrmann

Less is More – How to Not Test Everything

Janek Jochheim und Markus Gros

Connected Car Challenges Digital Loop – Data-Driven Development of Driving Functions

Christer Neimöck, Werner Schlecht, Marcus Berlin, Heiko Ehrich und Jann-Eve Stavesand

Test Strategies for Efficient Validation of Automated Driving Functions

Martin Herrmann

The Rules of Engagement. Exploiting driver-automation interaction in ADAS level 2 functions

Robert FUCHS, Yuuta SAKAI und Tsutomu TAMURA

HMI-Design in highly automated vehicles – everything different?

Jan Bavendiek, Adrian Zlocki, Claus Bertram Bonerz, Matthis Hötter, Christopher Brockmeier und Lutz Eckstein

Vehicle and Road Condition Monitoring as indispensable Base Layer for Automated Driving

Daniel Fischer, Andreas Kulessa und Kevin Meuer

What if Cars could be as Easy to Program as Smartphones are Today?

Jan Becker und Joe Speed

Real-World Traffic Scenarios for ADAS and AD Development

Holger Banzhaf, Jacques Kaiser und Florian Hirschmann

Predicting Sensor Contamination Using Simulation

Oliver Pettke, Christopher Franzke, Andi Petzold und Rico Baumgart

Digitalization of the automotive industry: New legal challenges for cyber security and data use

Daniel Wuhrmann und Stefan Hessel

Mobility model of the city of Hanau

Markus Henrich

Technological and infrastructural prerequisites for the deployment of the first shared Autonomous Vehicle Pilot Test Project in Malta

Manuel Cassar und Odette Lewis

How Connectivity enables new Experience & Business

Gerhard Grossberger
