

Contents

Introduction — 1

1 Basic properties of special relativity — 3

- 1.1 Special relativity as a special case of general relativity — 3
- 1.2 Connecting Lorentz transformations and Lorentz matrices — 7
- 1.3 Group properties — 10

2 Further properties of Lorentz matrices — 13

- 2.1 Supplements to Proposition 1.7 — 13
- 2.2 Proper, orthochronous, and antichronous Lorentz matrices — 15
- 2.3 Special Lorentz matrices — 18
- 2.4 Subgroups of $\mathcal{L}$ — 21

3 Further properties of Lorentz transformations — 23

- 3.1 Subgroups of $\mathcal{P}$ — 23
- 3.2 A condition for special Lorentz transformations — 24
- 3.3 A condition for orthochronous Lorentz transformations — 27

4 Decomposition of Lorentz matrices and Lorentz transformations — 29

- 4.1 The decomposition theorem for Lorentz matrices — 29
 - 4.1.1 Notations and assumptions — 29
 - 4.1.2 Theorem and proof — 30
 - 4.1.3 Remarks on the interpretation of the decomposition theorem — 34
 - 4.1.4 Decomposition of nonorthochronous Lorentz matrices — 35
- 4.2 The decomposition theorem for Lorentz transformations — 35
- 4.3 Nonuniqueness of the decomposition of Lorentz matrices — 36
- 4.4 The decomposition of products — 39
 - 4.4.1 Preliminary remarks — 39
 - 4.4.2 The theorem of relativistic addition of velocities — 39
 - 4.4.3 Decomposition of a product $L = L' \cdot L''$ — 40
- 4.5 Parameter representation of Lorentz matrices — 40

5 Further structures on M^s — 43

- 5.1 Introductory remarks — 43
- 5.2 Vector space structure — 43
- 5.3 Topology on M^s — 46

6	Tangent vectors in $\mathcal{M}^s$ — 47
6.1	Decomposition of Lorentz vector spaces — 47
6.2	Timelike tangent vectors — 47
6.3	Spacelike tangent vectors — 49
6.4	Some conclusions — 51
6.5	Non-Minkowskian coordinates — 52
7	Orientation — 55
7.1	Time orientation — 55
7.1.1	Definitions — 55
7.1.2	Time orientation on $\mathcal{M}^s$ — 56
7.2	Orientation of vector bases — 60
7.3	Orientations on M^s — 61
7.3.1	Introductory remarks — 61
7.3.2	Time orientation — 61
7.3.3	Chronal and causal relations — 62
8	Kinematics on M^s — 65
8.1	Introductory remarks — 65
8.2	Worldlines, signals, observers — 65
8.3	Clocks — 71
8.4	Newtonian notions in special relativity — 74
8.5	Radar charts in $\mathcal{M}^s$ — 79
8.6	Time dilation — 81
8.7	Length contraction — 82
8.8	Aberration of light — 87
9	Some basic notions of relativistic theories — 91
9.1	Manifolds — 91
9.2	Tangent vectors — 92
9.3	Cotangent vectors — 96
9.4	Lorentz vector spaces — 98
9.5	Direct decomposition of Lorentz vector spaces — 104
9.6	Tensors — 108
9.7	Lorentzian manifolds — 113

Epilogue — 117

Bibliography — 119

Index — 121
