Preface *ix*

1	Introduction to Organocatalytic Cycloaddition Reaction	1
	<i>Yin Wei and Min Shi</i>	
1.1	General Introduction	1
1.2	General Mechanistic Insights into Cycloadditions Catalyzed by Nucleophilic Organocatalysts	2
1.2.1	Mechanisms for Common Organoamine-catalyzed Cycloaddition Reactions	2
1.2.2	Mechanisms for Common Organophosphine-catalyzed Cycloaddition Reactions	11
1.2.3	Cycloaddition Reaction Modes Influenced By Catalysts	19
	References	22
2	Organoamines-catalyzed Cycloadditions	25
	<i>Mei-Xin Zhao and Min Shi</i>	
2.1	Introduction	25
2.2	[2+2] Cycloadditions	26
2.2.1	Ketene and Their Analogs Involved [2+2] Cycloadditions	26
2.2.1.1	[2+2] Cycloadditions for the Synthesis of β -Lactones	26
2.2.1.2	[2+2] Cycloadditions for the Synthesis of β -Lactams	39
2.2.1.3	[2+2] Cycloadditions for the Synthesis of Other Four-membered Heterocycles	48
2.2.2	Allenoates and Their Analogs Involved [2+2] Cycloadditions	50
2.2.2.1	[2+2] Cycloadditions of Allenoates and Their Analogs with Imines	51
2.2.2.2	[2+2] Cycloadditions of Allenoates with Ketones	52
2.2.2.3	[2+2] Cycloadditions of Allenoates with Other Activated Double Bonds	56
2.3	[3+2] Cycloadditions	57
2.3.1	Ketenes and Their Analogs Involved [3+2] Cycloadditions	57
2.3.2	MBH Adducts Derivatives (MBHADs) Involved [3+2] Cycloadditions	59
2.3.3	Other Substrates Involved [3+2] Cycloadditions	67
2.4	[4+2] Cycloadditions	70

2.4.1	Ketene-involved [4+2] Cycloadditions	70
2.4.1.1	Ketene as Dienophile-involved [4+2] Cycloadditions	70
2.4.1.2	Vinyl Ketene as Diene-Involved [4+2] Cycloadditions	83
2.4.2	Allenoates Involved [4+2] Cycloadditions	86
2.4.2.1	Allenoates Acting as a Two-carbon Synthon in [4+2] Cycloadditions	86
2.4.2.2	Allenoate Acting as a Four-carbon Synthon in [4+2] Cycloadditions	97
2.4.3	MBHADs Involved [4+2] Cycloaddition	99
2.5	Other Cycloaddition Reactions	102
2.5.1	[2+1] Cycloadditions	102
2.5.2	[3+3] Formal Cycloadditions	107
2.5.3	Domino Reactions	117
2.5.4	Miscellaneous Cycloaddition Reactions	125
2.6	Summary	131
	References	132
3	Organophosphines-Catalyzed Cycloaddition Reactions	141
	<i>Yin Wei and Min Shi</i>	
3.1	Introduction	141
3.2	Phosphine-catalyzed [2+2] Cycloaddition Reactions	142
3.3	Phosphine-catalyzed [3+ <i>n</i>] Cycloaddition	145
3.3.1	Phosphine-catalyzed [3+2] Cycloaddition	145
3.3.1.1	Phosphine-catalyzed [3+2] Cycloaddition of Allenes with Alkenes and its Asymmetric Variant	145
3.3.1.2	Phosphine-catalyzed [3+2] Cycloaddition of Allenes with Imines and its Asymmetric Variant	161
3.3.1.3	Phosphine-catalyzed [3+2] Cycloaddition of Allenes with Other Electrophiles	171
3.3.1.4	Phosphine-catalyzed [3+2] Cycloaddition of Morita–Baylis–Hillman Alcohol Derivatives (MBHADs) with Electrophiles and its Asymmetric Variant	173
3.3.1.5	Phosphine-catalyzed [3+2] Cycloaddition of Activated Alkynes with Electrophiles and its Asymmetric Variant	181
3.3.2	Phosphine-catalyzed [3+3] Cycloaddition of Electron-deficient π -systems with Electrophiles and its Asymmetric Variant	184
3.4	Phosphine-catalyzed [4+ <i>n</i>] Cycloaddition	188
3.4.1	Phosphine-catalyzed [4+2] Cycloaddition and its Asymmetric Variant	188
3.4.1.1	Phosphine-catalyzed [4+2] Cycloaddition of Allenes with Other Electrophiles and its Asymmetric Variant	188
3.4.1.2	Phosphine-catalyzed [4+2] Cycloaddition of Alkynes with Other Electrophiles	201
3.4.2	Phosphine-catalyzed [4+1] Cycloaddition and its Asymmetric Variant	202
3.4.3	Phosphine-catalyzed [4+3] Cycloaddition and its Asymmetric Variant	208

3.5	Phosphine-catalyzed Domino Reactions	212
3.6	Miscellaneous Reactions	228
3.7	Summary	232
	References	232
4	N-Heterocyclic Carbenes Catalyzed Cycloadditions	237
	<i>Jun Zhang and Min Shi</i>	
4.1	Introduction	237
4.2	NHC-catalyzed [4+2] Cycloaddition Reaction	237
4.3	NHC-catalyzed [2+2] Cycloaddition Reaction	276
4.4	NHC-catalyzed [3+2] Cycloaddition Reaction	284
4.5	NHC-catalyzed [2+2+2] Cycloaddition Reaction	297
4.6	NHC-catalyzed Domino Reactions	302
4.7	Summary	305
	References	305
5	Synthetic Transformations of Organocatalytic Cycloadducts	309
	<i>Yin Wei and Min Shi</i>	
5.1	Introduction	309
5.2	Synthetic Applications of Organoamine-catalyzed Cycloaddition Reactions	309
5.2.1	Synthetic Applications of [2+2] Cycloadduct β -Lactones	309
5.2.2	Total Synthesis of Schulzeines	315
5.2.3	Total synthesis of HPA-12	319
5.2.4	Total Syntheses of Inthomycins	320
5.2.5	Total Synthesis of Siphonarienal	324
5.2.6	Total Syntheses of Siphonarienolone and Siphonarienedione	325
5.2.7	Total Synthesis of (+)-Maculalactone A	326
5.2.8	Synthesis of the C ₂₁ –C ₃₄ -segment of Aplyronines	327
5.2.9	Formal Synthesis of the α_{1a} Adrenergic Receptor Antagonist	330
5.2.10	Formal Synthesis of Calyxin I	332
5.2.11	Formal Synthesis of Platencin	332
5.2.12	Total Synthesis of (–)-Patchouli Alcohol	335
5.3	Synthetic Applications of Organophosphine-Catalyzed Cycloaddition Reactions	336
5.3.1	Synthesis of Pentabromopseudilin	336
5.3.2	Total Synthesis of (–)-Hinesol	338
5.3.3	Total Synthesis of (±)-Hirsutene	339
5.3.4	Total Synthesis of (±)-Ricciocarpin A	340
5.3.5	Total Synthesis of (+)-Geniposide	342
5.3.6	Formal Synthesis of (±)-Allosecurinine	342
5.3.7	Formal Synthesis of (+)-Trachelanthamidine	344
5.3.8	Total Synthesis of (+)-Ibophyllidine	345
5.3.9	Total Synthesis of (–)-Actinophyllic Acid	346
5.3.10	Formal Synthesis of (+)-Alstonerine	349
5.3.11	Total Synthesis of (+)-Hirsutine	351
5.3.12	Formal Synthesis of Reserpine	352

5.3.13	Other Synthetic Applications of Phosphine-catalyzed [3+2] Cycloadditions	354
5.3.14	Synthetic Applications of Phosphine-catalyzed [3+3] Cycloaddition	358
5.3.15	Synthetic Applications of Phosphine-catalyzed [4+2] Cycloaddition	359
5.3.16	Synthetic Applications of Phosphine-catalyzed [4+1] Cycloaddition	364
5.3.17	Synthetic Applications of Phosphine-catalyzed [4+3] Cycloaddition	364
5.4	Summary	365
	References	365
