

Contents

1	Introduction — 1
1.1	Product design and manufacture — 1
1.2	Development of CAD/CAPP/CAM — 3
1.2.1	Computer-aided design — 3
1.2.2	Computer-aided manufacturing — 5
1.2.3	CAD/CAM software — 7
1.2.4	Computer-aided process planning — 8
1.3	Product data management — 8
1.4	Concurrent engineering — 8
1.5	Extending integration of CAD/CAPP/CAM — 9
1.6	Summary — 11
	Questions — 12
	Tasks — 12
	Further reading material — 12
	References — 13
2	Computer-aided design — 14
2.1	Introduction — 14
2.2	General product design — 15
2.2.1	General process for product design — 15
2.2.2	Top-down and bottom-up assembly approaches — 20
2.3	The brief history of CAD development — 22
2.4	Components of CAD systems — 24
2.4.1	Hardware of CAD systems — 25
2.4.2	Software of CAD systems — 26
2.4.3	Current CAD platform — 28
2.5	Mathematical models in 3D CAD systems — 28
2.5.1	Wireframe — 28
2.5.2	Surface — 30
2.5.3	Solids — 32
2.5.4	Features — 34
2.5.5	An example of 3D modeling — 34
2.6	Semantics in CAD systems — 37
2.7	CAD software packages — 38
2.8	Reverse engineering — 42
2.9	Product data exchange — 42
2.9.1	GKS — 42
2.9.2	PHIGS — 43
2.9.3	Open GL — 43

2.9.4	Direct X —	43
2.9.5	IGES —	44
2.9.6	STEP/PDES —	44
2.10	Kernels of 3D CAD systems —	44
2.10.1	Parasolid —	44
2.10.2	ACIS —	45
2.11	CAE – computer aided engineering —	46
2.11.1	Finite element analysis —	46
2.11.2	Computational fluid dynamics —	46
2.11.3	Kinematic and dynamic analysis —	47
2.12	Summary —	47
	Questions —	48
	Tasks —	48
	References —	48
3	Computer-aided process planning —	49
3.1	Introduction —	49
3.2	Manual process planning —	51
3.3	Brief history of CAPP —	52
3.4	Classification of CAPP systems —	54
3.4.1	Variant CAPP —	54
3.4.2	Generative CAPP —	60
3.4.3	Expert system-based approach for CAPP —	61
3.4.4	Neural networks-based approach for CAPP —	64
3.4.5	Hybrid CAPP system —	65
3.5	Methods/technologies of CAPP —	70
3.6	Determine dimensions and tolerances —	71
3.7	Design fixtures and jigs —	72
3.8	Some commercial CAPP systems —	72
3.9	Integration of CAD/CAPP —	76
3.10	PDM-based CAPP systems —	76
3.11	Summary —	77
	Questions —	78
	Tasks —	78
	References —	78
4	Computer aided manufacturing —	80
4.1	Introduction —	80
4.2	CNC machine tools —	82
4.2.1	Introduction to CNC machine tools —	82
4.2.2	Principal elements of a CNC machine tool —	82
4.2.3	Some new applications of CNC machine tools —	83

4.2.4	Typical CNC machine tools —	85
4.2.5	Tooling for CNC machine tools —	88
4.3	CNC programming —	92
4.4	Automatic programming tool —	94
4.5	CAD/CAM integration —	96
4.5.1	Functions of CAD/CAM system —	96
4.5.2	CAD/CAM systems —	98
4.6	STEP-NC —	99
4.7	The 3D printing technology —	100
4.7.1	The principle of 3D Printing —	100
4.7.2	Methods and technologies of 3D printing —	101
4.7.3	Industrial and personal 3D printing applications —	103
4.8	Summary —	104
	Questions —	104
	Tasks —	104
	References —	104
5	Integration of CAD/CAPP/CAM —	105
5.1	Introduction —	105
5.2	Product data exchange —	106
5.3	Some neutral data formats —	109
5.3.1	Drawing eXchange Format —	109
5.3.2	Initial graphic exchange specification —	112
5.3.3	Product data exchange specification —	113
5.3.4	Standard for the exchange of product model data —	115
5.3.5	eXtensible Markup Language —	116
5.4	Data exchange using STEP —	116
5.5	AP 213 for CAPP —	119
5.6	STEP-NC (AP238 or ISO 14649) for CAM —	119
5.7	Integration of CAD/CAPP/CAM —	123
5.8	Summary —	125
	Questions —	129
	Tasks —	130
	References —	130
6	Product data management —	131
6.1	Introduction —	131
6.2	Functions of PDM —	132
6.3	PDM software vendors —	137
6.4	Benefits of PDM systems —	139
6.5	New development of PDM —	139
6.6	Summary —	141

Extended reading — 142

Questions — 142

Tasks — 143

References — 143

7 Concurrent engineering and collaborative design — 144

7.1 Introduction — 144

7.2 Business process re-engineering of product development — 151

7.3 Key technologies of CE — 157

7.4 Example of Boeing 777-X — 160

7.5 Summary — 162

Questions — 163

Tasks — 163

References — 163

8 The future — 165

8.1 Next-generation 3D CAD — 165

8.2 CAPP in another way — 169

8.3 Next-generation CAM — 170

8.4 Integrated CAD/CAPP/CAM systems in the future — 171

Questions and tasks — 171
