

Contents

List of Abbreviations	XIII
List of Symbols	XV
1 Introduction	1
2 Two-Stage Stochastic Programs for Pre-Positioning Problems in Disaster Management	3
2.1 Disaster Management	3
2.1.1 Introduction	3
2.1.2 Challenges	9
2.1.3 Scenario Definition in Disaster Management	10
2.2 Quantitative Models in Disaster Management: A Literature Review	11
2.2.1 Two-Stage Stochastic Programs	11
2.2.2 Pre-Positioning of Relief Items	28
2.3 The Rawls and Turnquist [2010] Model	30
2.3.1 Problem Description and Mathematical Formulation	30
2.3.2 Extensions	35
3 Solution Algorithms in Disaster Management	37
3.1 Solution Methods in Disaster Management: A Literature Review	38
3.1.1 Exact Methods	39
3.1.2 Heuristics	40
3.2 Two-Stage Stochastic Programming	45
3.2.1 Introduction	45
3.2.2 The L-Shaped Method	49
3.3 The Accelerated L-Shaped Method	55
3.3.1 The Basic Idea	55
3.3.2 Assumptions	58
3.3.3 Specialized Primal-Dual Interior-Point Method	60
4 Numerical Experiments	71
4.1 Realistic Large-Scale Case Study	71
4.1.1 Data	73
4.1.2 Technical Specifications	82
4.1.3 Computational Results	84
4.2 Case Study Based on a Hurricane Forecast	97
4.2.1 Data	98

4.2.2	Computational Results	101
4.3	Outlook	104
5	Conclusion	107
	Bibliography	111
A	Appendix	125
A.1	The Recourse Function: An Example	125
A.2	Newton's Method for Systems of Non-Linear Equations	126
A.3	Interior-Point Method: Proof of Convergence	127
A.4	Matlab Code: L-Shaped Method with Multi-Optimality Cuts	130
A.5	Matlab Code: SIMP	136
A.6	Gurobi Log Files	140
A.6.1	Small-Scale Case Study	140
A.6.2	Medium-Scale Case Study	143
A.6.3	Large-Scale Case Study	146
A.6.4	Katrina Case Study	152
