

Contents

1	Introduction	1
1.1	Motivation.....	1
1.2	Procedure and contents	3
2	Background and Premises	5
2.1	Vehicle automation.....	5
2.1.1	Levels of vehicle automation.....	5
2.1.2	History and state of research	7
2.2	Vehicle interface.....	9
2.2.1	Steering control variants	10
2.2.2	Automated vehicle interfaces	15
2.3	Premises for this thesis	19
2.3.1	Automation capabilities and transitions	19
2.3.2	General cockpit layout	20
2.3.3	Controls and displays.....	24
2.4	Summary.....	27
3	Tasks in Highly Automated Vehicles	29
3.1	Preface	29
3.2	Manual driving task	30
3.2.1	Superior goal	30
3.2.2	Subtasks.....	31
3.2.3	Task execution.....	35
3.2.4	Assessment	38
3.3	Automated driving task.....	41
3.3.1	Superior goal	41
3.3.2	Subtasks.....	41
3.3.3	Task execution.....	43
3.4	Transition task.....	46
3.4.1	Superior goal	46
3.4.2	Subtasks.....	46
3.4.3	Guidance of visual attention.....	48
3.4.4	Motoric regaining of control.....	50
3.4.5	Taking over.....	58
3.4.6	Assessment	60
3.5	Summary.....	63
4	Steering wheel design potential	65
4.1	Preface	65
4.2	Design goals	66
4.3	Individual task potentials	68
4.4	Potential across all tasks	69
4.5	Summary and solution space	72
5	Optimization for individual tasks	75
5.1	Concept and hypotheses.....	75
5.1.1	Design for automated driving	75

5.1.2	Design for transition	78
5.2	Method	80
5.2.1	Experimental setup	80
5.2.2	Experimental design.....	83
5.2.3	Operationalization	84
5.3	Results	86
5.3.1	Comparison drive	86
5.3.2	Take-over drive	87
5.4	Discussion.....	91
6	Optimization across all tasks	95
6.1	Preface.....	95
6.1.1	Transformation principle.....	95
6.1.2	Constraints and realization variants	96
6.2	Asymmetrical transformation	101
6.2.1	Concept and hypotheses.....	101
6.2.2	Experimental setup	104
6.2.3	Experiment design	106
6.2.4	Operationalization	107
6.2.5	Results.....	111
6.2.6	Discussion	119
6.3	Symmetrical transformation	122
6.3.1	Concept and hypotheses.....	122
6.3.2	Experimental setup	125
6.3.3	Experiment design	128
6.3.4	Operationalization	129
6.3.5	Results.....	131
6.3.6	Discussion	138
7	Real driving conditions	141
7.1	Preface.....	141
7.1.1	Background.....	141
7.1.2	Steering wheel concept.....	143
7.2	Real-car study	144
7.2.1	Hypotheses.....	144
7.2.2	Experimental setup	146
7.2.3	Experiment design	151
7.2.4	Operationalization	152
7.2.5	Results.....	154
7.2.6	Discussion	166
8	Conclusion	169
8.1	Research contributions.....	169
8.2	General discussion.....	170
8.3	Future research.....	173
9	References.....	175
